

Ayoub Boukaibat

 Lille, France

 +33 7 66 63 15 01

 a.boukaibat90@gmail.com

Professional Summary

AI engineer with a Master's in Artificial Intelligence and experience in software development, data science. Built and deployed multiple intelligent systems across startups and energy companies. Passionate about building robust, scalable AI-powered products using Python, Java, and web technologies.

Technical Skills

- **Languages:** Java, Python, JavaScript, HTML, CSS, SQL
 - **AI/ML:** Scikit-learn, Darts, Pandas, NumPy, TensorFlow, PyTorch, OpenCV
 - **Frameworks:** Spring Boot, React, Node.js
 - **Databases:** MySQL, PostgreSQL, MongoDB, SQLite
 - **DevOps & Tools:** Docker, Kubernetes, Git, GitHub, GitLab CI/CD, Maven, Linux
 - **Cloud:** AWS, Azure
 - **Other:** REST API, JSON, Agile/Scrum
-

PROJECTS

RecruitPME (in progress)

- Created RecruitPME, an AI-powered SaaS platform that analyzes CVs and ranks candidates using a custom-trained model
- Built the frontend using React with Tailwind CSS and the backend using Spring Boot and Python for inference
- Automated CV parsing and matching using NLP and a scoring system

Urban Noise Classification

- Classification of various urban sounds into their respective categories using Python and Deep Learning (TensorFlow...).

Traffic Sign Detection and Recognition

- Identification and recognition of traffic signs in images using Python and Deep Learning (YOLO...).

Fine-Grained Image Classification

- Development of an algorithm to classify images of objects within the same category into specific subcategories using Python and Deep Learning (Keras...).
-

Professional Experience

Software Engineer – Idsud Energies (Marseille, France)

October 2024 – February 2025

- Developed a dashboard for monitoring solar energy plants using WinDev and API integration.
- Automated data collection from Sungrow API for real-time metrics.
- Created a dynamic UI with collapsible menu and customizable widgets.

Data Scientist – CNRS (Lens, France)

March 2024 – Septembre 2024

- Design of a prediction algorithm for Ligand/Receptor pairs.
 - Application of advanced Pattern Mining and Machine Learning techniques.
 - Development of predictive models for pair identification.
-

Education

Master's Degree in Computer Science – Artificial intelligence

Artois University, France

2023 – 2024

Bachelor's Degree in Computer Science

Institut des Arts de la Gestion, France

2022 – 2023

Languages

- French: Fluent
- English: Professional working proficiency
- Arabic: Native
