

Creating Your First Job

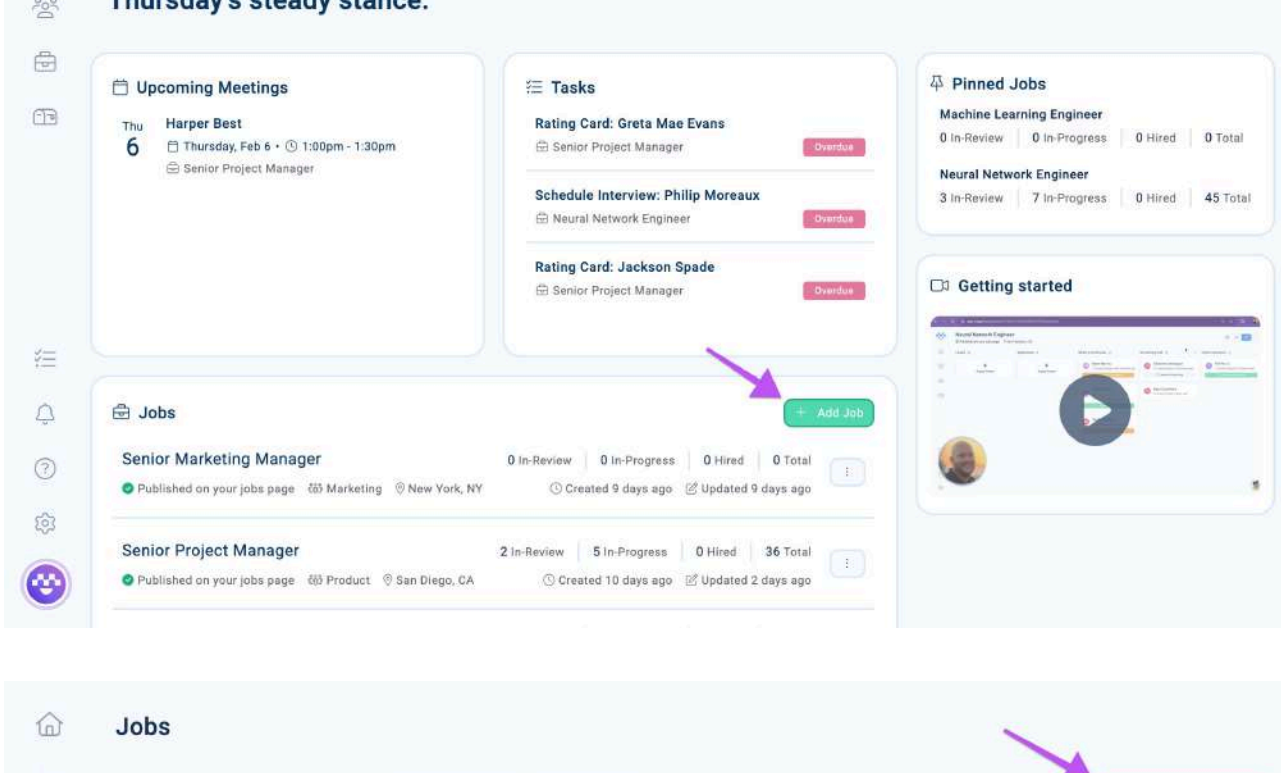

Updated over 3 months ago

Welcome! Whether it's your first time using Mega or you're a recruiting pro, we're here to walk you through how to create your first job post. Let's dive in!

How to Create a Job

There are a couple of ways to start creating a job in Mega:

- On your Home page, click the '+ Add Job' button.
- Or, head to the Jobs page and select '+ Add Job Posting'.

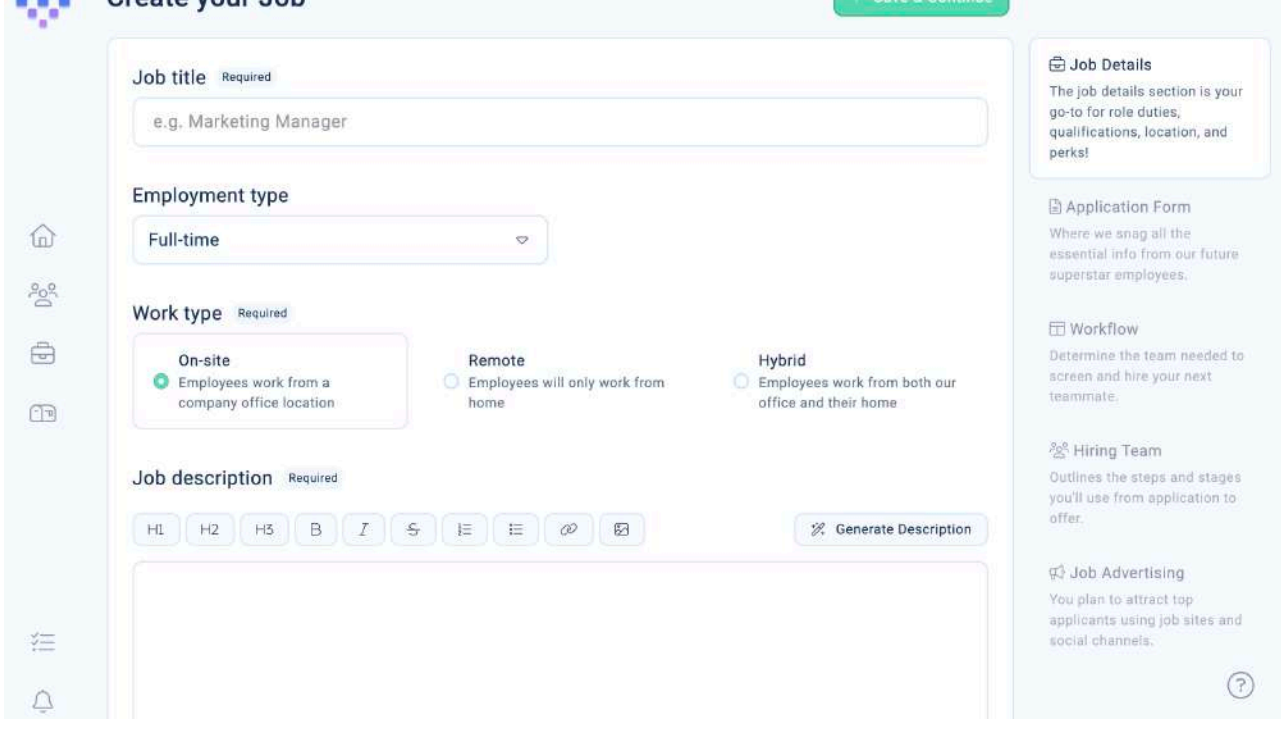

Once you've done that, a new page will pop up with five sections to complete. Here's what you'll find:

- Job Details
- Application Form
- Workflow
- Hiring Team
- Job Advertising

Pro Tip: Need to take a break? Just click 'Save Draft' at the top right. You can always come back to finish it later from your Jobs section.

Job Details

This is where you'll add all the important info candidates need to know, like the job title, description, and salary.

Job Title

Keep it simple! A few tips for the job title:

- Be specific.
- Keep it short and clear.
- Make it easy to understand.
- Avoid using ALL CAPS.

Employment Type

Choose the type of employment from the dropdown (e.g., full-time, part-time, etc.) so candidates know the job's expectations.

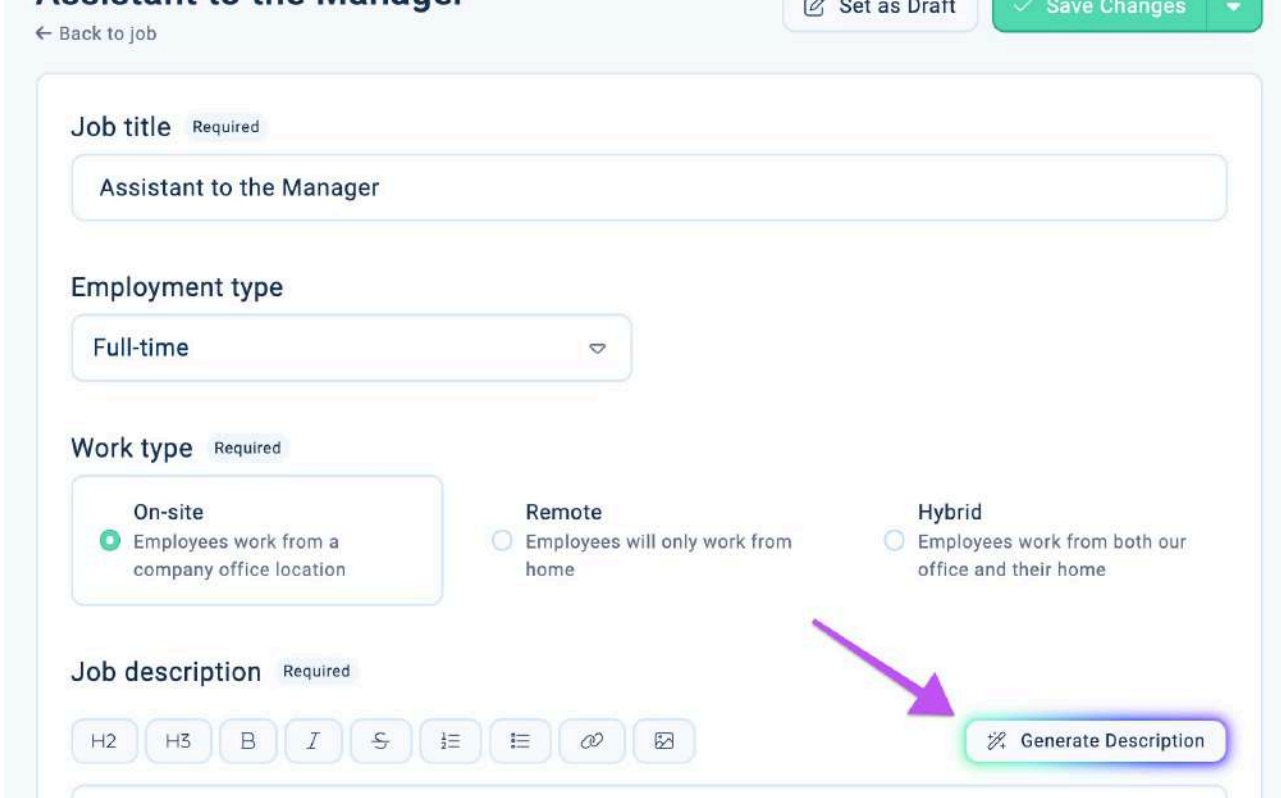

Work Type

Select whether the job is on-site, remote, or hybrid.

Job Description

Give candidates the scoop on what the job involves and what's expected. Be sure to include the duties, any specific requirements, and don't forget the perks and benefits—those can make your job stand out! ✨

Having trouble writing it? Click the 'Generate Description' button on the right to get some inspiration 💡.

Office Location

Pick an existing location from the dropdown, or if it's a new one, you can add it. If the job is remote, choose the main office or the most relevant location.

Department

Select the right department for the role from the dropdown. If you don't see the one you need, ask an Admin or Mega Admin to add it.

Job Code

If your company uses a special code for jobs, this is where you can enter it.

Salary Range, Currency, Pay Period

Add the pay details here. Want to keep the salary private? Just uncheck the box labeled 'Display salary on Careers page' 🙊.

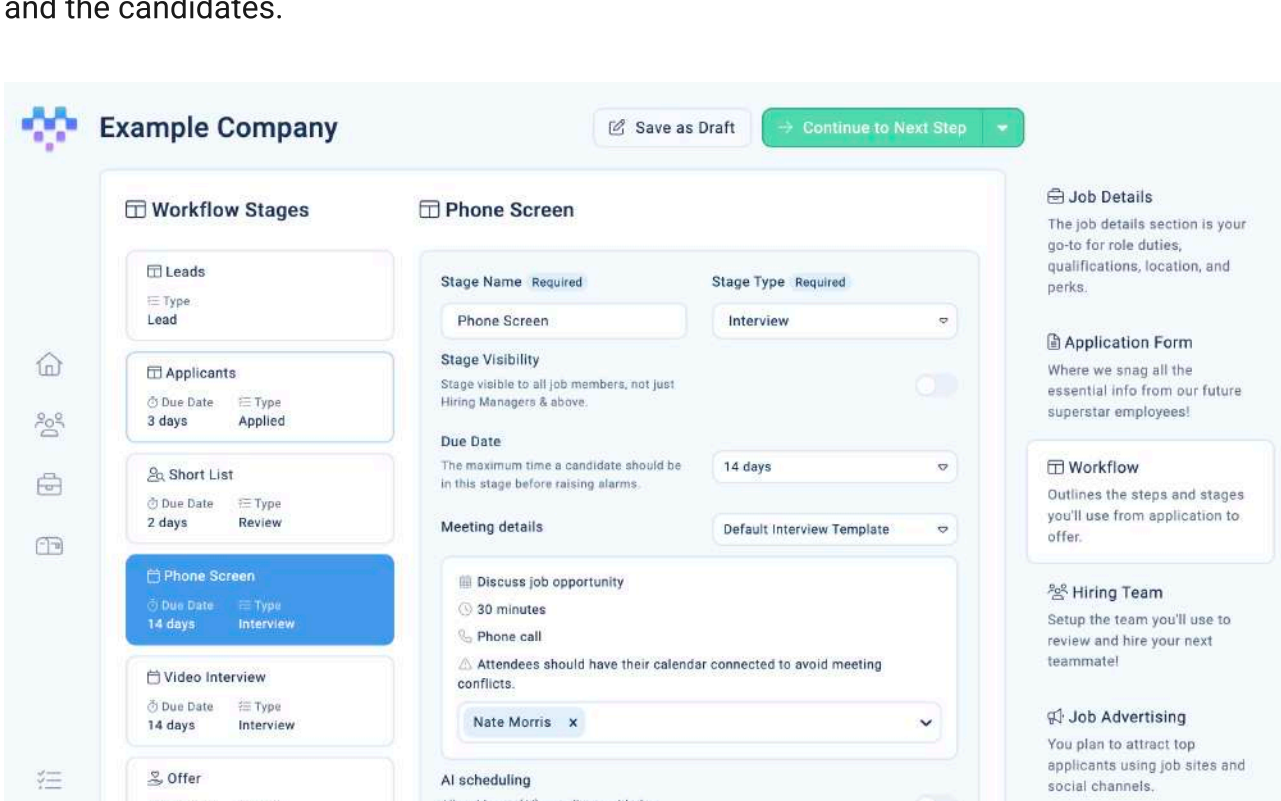

Application Form

Next, you'll decide what info you want from candidates when they apply. Name and email are always required, but the rest—like phone number or resume—you can mark as required, optional, or not needed.

Want to ask custom questions? Choose from the dropdown of common questions or create your own by clicking 'Add new question' ➕. You can also manage your saved screening questions in the Recruiting Preferences section.

Workflow

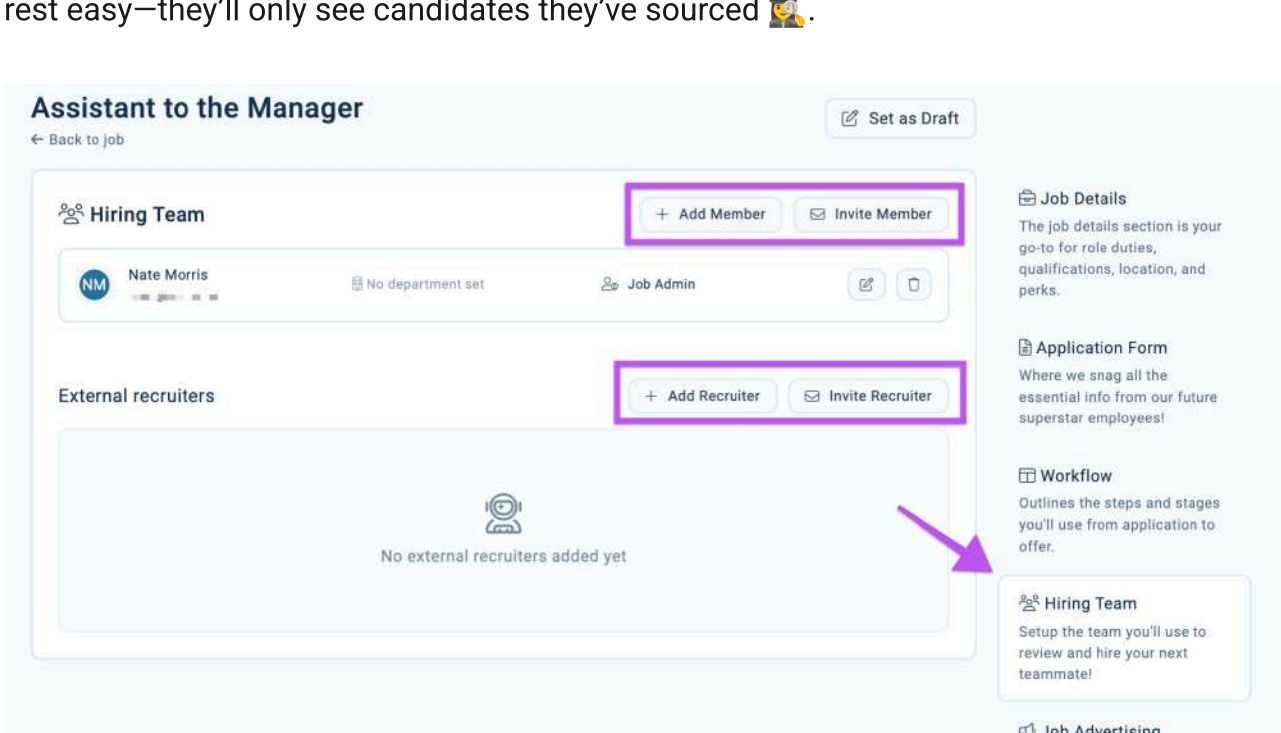

Your workflow lays out the steps from application to hire. Pick a pre-built workflow and review the stages—this includes AI screening, automated emails, rating cards, due dates, and more. The workflow is designed to make the hiring process seamless for both you and the candidates.

Hiring Team

Even though Mega helps you a lot, you can still invite your teammates to join the hiring process. Add team members who already have access to Mega, or invite others via email (if you have the right permissions) 📧.

Working with external recruiters? You can add them too! Just invite them via email, and rest easy—they'll only see candidates they've sourced 🙊.

Job Advertising

Mega makes it easy to get your job out there. You can post on your company's career site and various job boards. Mega offers both free and paid options for job advertising.

- Free job boards:** These are enabled automatically. Mega will send your job to all relevant free job boards, and they might even distribute it further to increase your reach.
- Paid job boards:** You can purchase premium job postings for a wider or more targeted audience 🎯.

Ready to Share?

Once you're all set, there are three ways to share your job:

- Publish:** Your job will be live on your career site and sent to free and paid job boards 🌐.
- Internal Only:** The job will only be visible to people within your company 🏢.
- Confidential:** Only the hiring team and Mega Administrators will see it 🙊.

That's it! Good luck with your hiring, and if you run into any questions, feel free to reach out to us; we're here to help! 🙌

Connect Your Calendar

Connect your calendar and let it handle all your scheduling! Quick setup, no more back-and-forth—smooth meetings, hassle-free! 🎉

Updated over 3 months ago

Connecting your calendar is super simple and one of the best ways to let Mega handle all your scheduling. That’s why it’s at the top of the to-do list when you’re getting started! ✅

Connecting Your Calendar is a Pretty Big Deal for You (and Us)

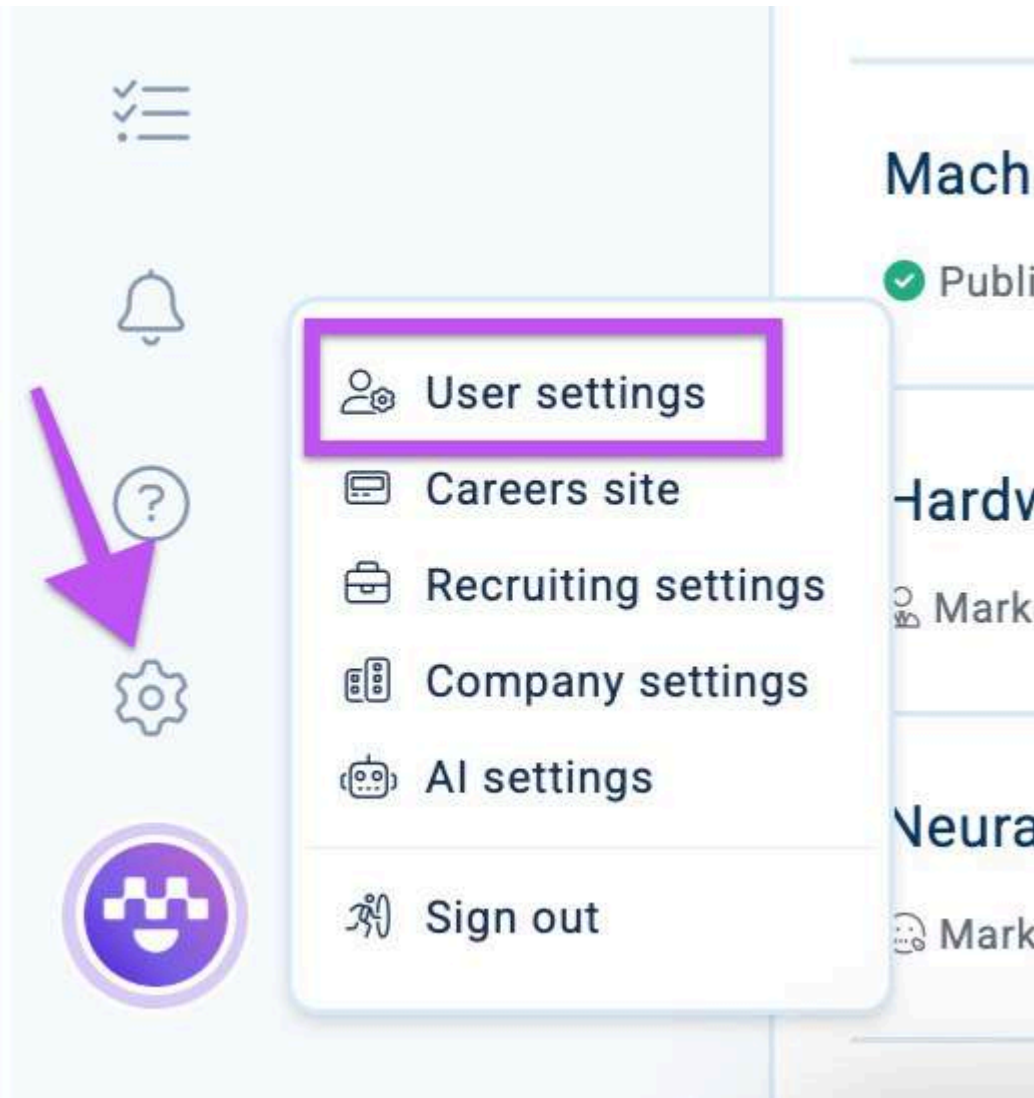

Let’s be honest—trying to find the right time to meet with candidates can be a *real* pain. You end up sending a bunch of emails back and forth, availability changes, and before you know it, days have passed. ⏳ And it gets even trickier when you throw in hiring managers and interview panels. 😞

That’s where Mega comes in! When you and your team connect your calendars, Mega does the heavy lifting. 🙌 It checks everyone’s availability and gives candidates the best options. Plus, it helps make sure everything gets scheduled quickly and smoothly. ⌚ Easy, right?

Here’s how you can connect your calendar and make things easier:

Steps to Connect Your Calendar

1. Go to **User Settings** (just click the gear icon ⚙️ in the bottom left of your screen).
2. Under **Connected Apps**, the **Calendar Integrations** list all the different Apps that Mega can connect with to access your calendar.

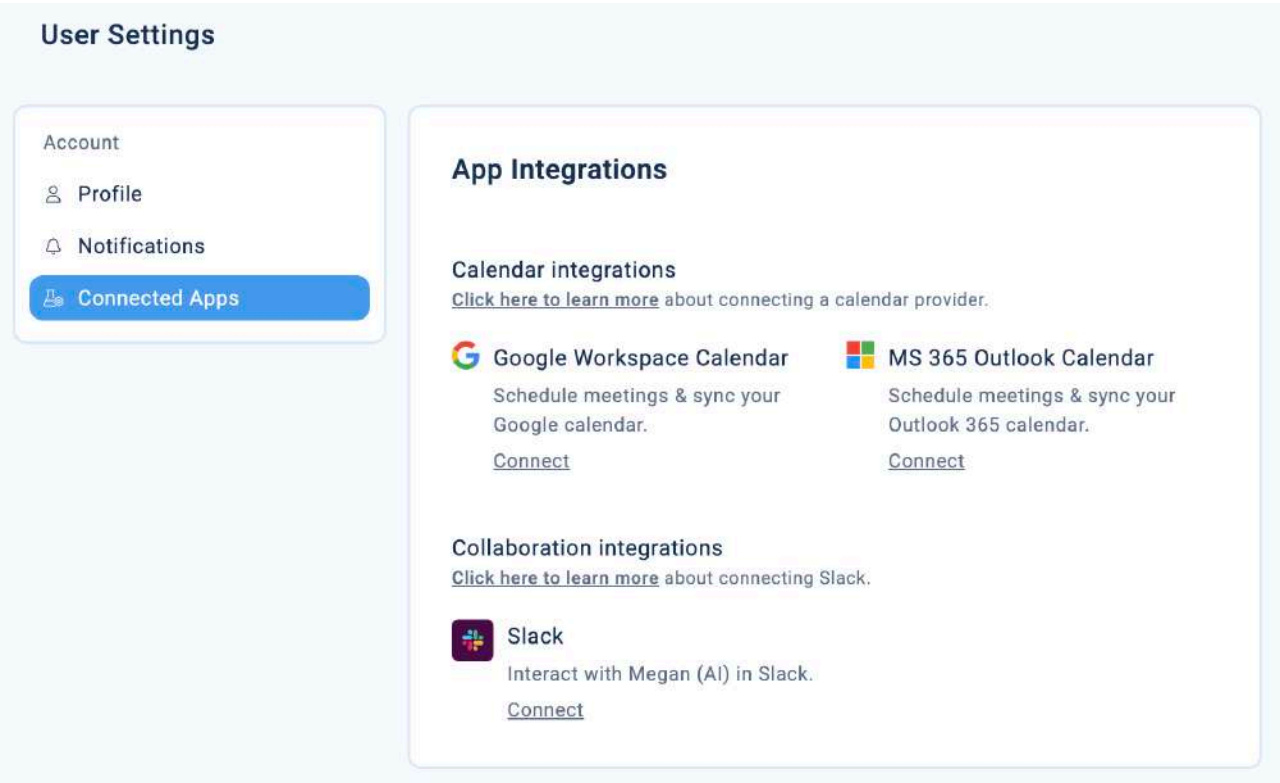

Google Workspace Calendar

1. Click **Connect**.
2. Choose the Google Account you want to link. If you’re not already signed in, you’ll need to log in to your Google Account.
3. On the Google permissions page, confirm the integration so Mega can find the best times for your meetings. Click **Allow** and you’re done! 🎉 Mega will automatically take care of your scheduling from now on.

MS 365 Outlook Calendar

1. Click **Connect**.
2. Sign in to your Microsoft Outlook account.
3. Follow the prompts to confirm the connection, and Mega will handle all your candidate meetings like magic! ✨

That’s it! In just a few quick steps, your calendar is connected, and Mega will keep your schedule running smoothly. 😊

Customize Careers Page

Updated over 3 months ago

It's important to show candidates what your company is all about, not just list a job description. Sharing company details on your careers page helps attract candidates who want to learn more and apply with enthusiasm.

Finding Your Careers Page Settings

Note: Only Admin and Mega Admin users can edit the careers page.

To get started, click the settings gear  in the bottom left corner of your screen, then select the "Careers site" option. You'll find four sections to manage:

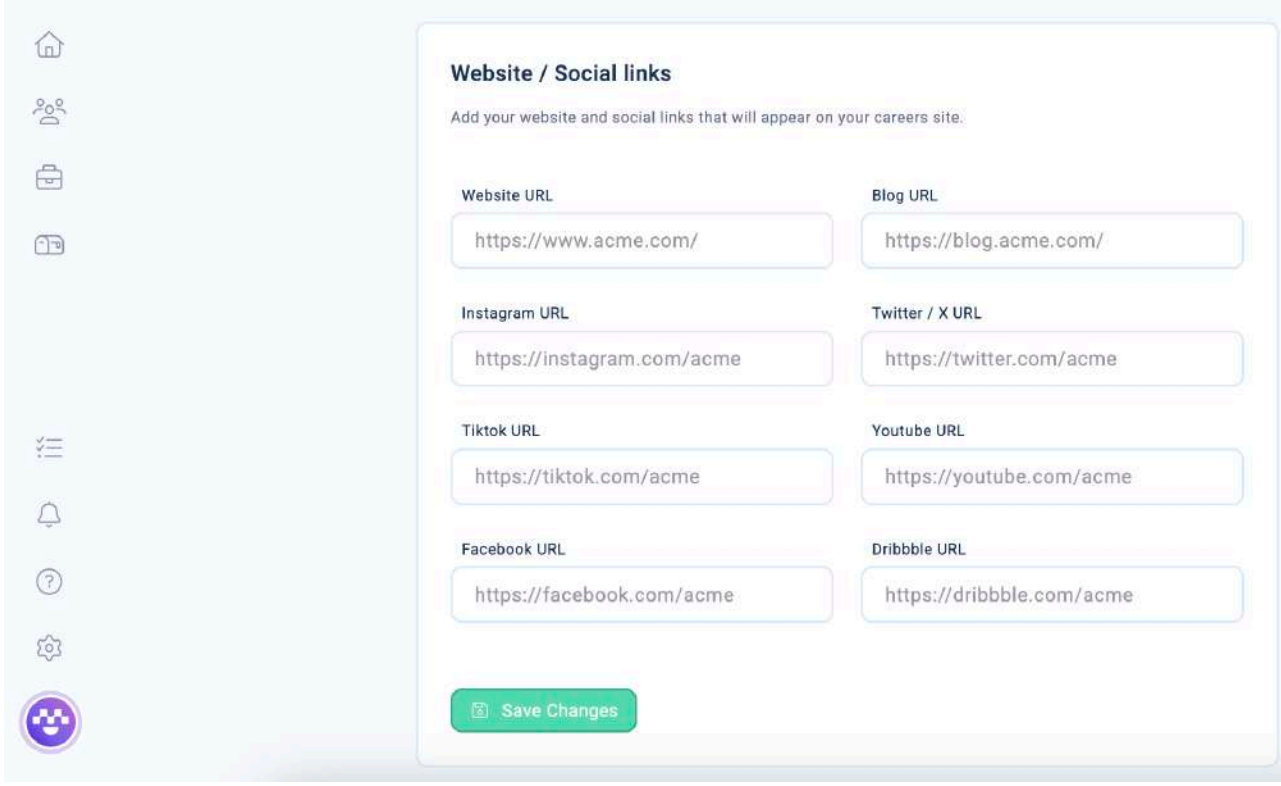

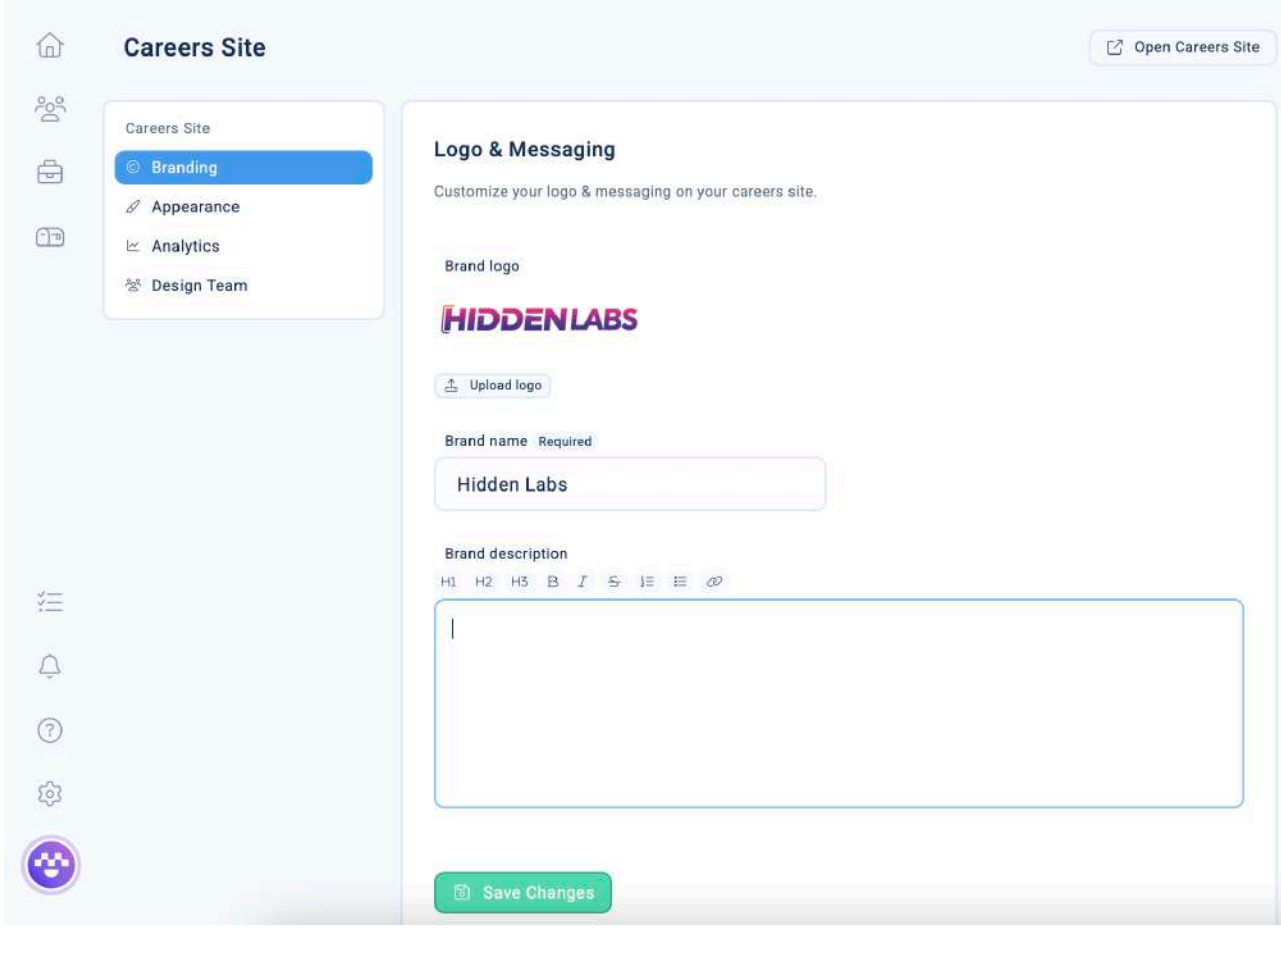

-  **Branding**
-  **Appearance**
-  **Analytics**
-  **Design Team**

Branding

In the Branding section, you can add key details like your company logo, description, and social media links. 

For the logo, we suggest using either a square or long rectangular one to best represent your brand. 

When entering your company name, use your marketing name (and leave out things like "Inc" or "LLC"). Keep it simple! ✨

Preview Your Design

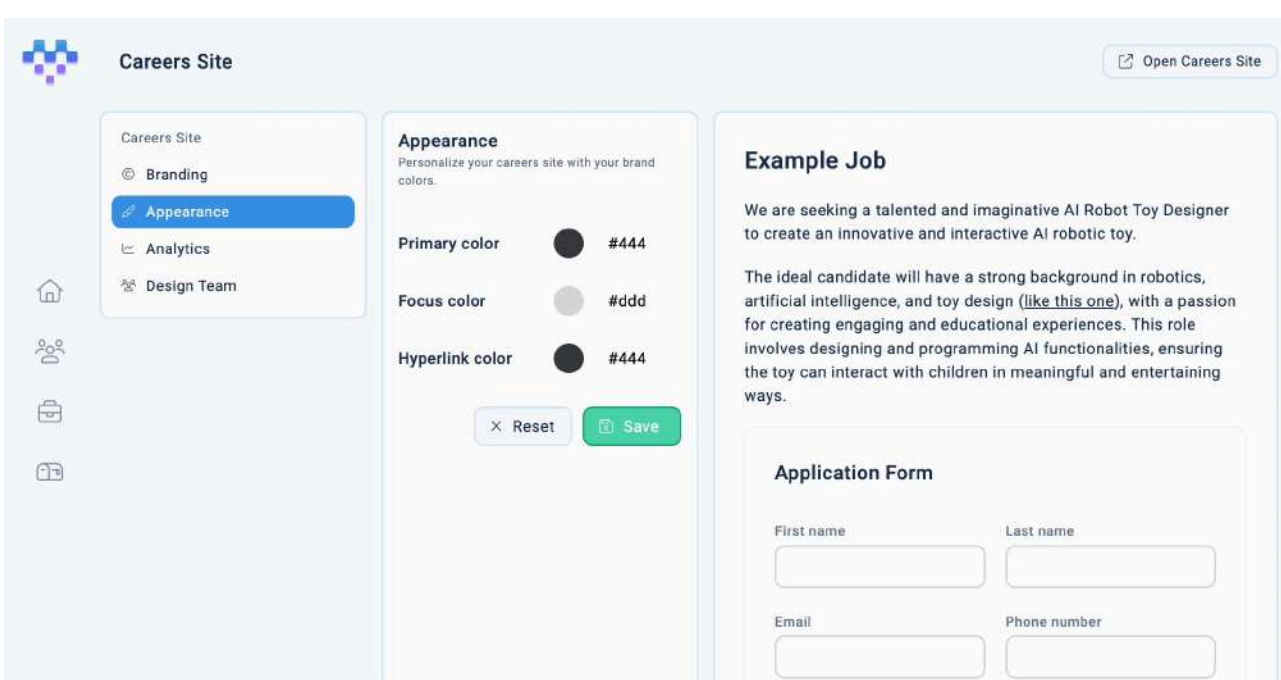

After saving your changes, you can see how everything looks by clicking "Open Careers Site" in the top right corner. 

Appearance

Your careers page is an extension of your website, so we want to make sure it matches your brand's colors. 

You can customize the **Primary**, **Focus**, and **Hyperlink** colors by clicking on the color circles and entering the hex, hsv, or rgb codes. Switch between the code types by selecting the one you need at the bottom of the pop-up window.

On the right, you'll see a preview of how these colors will appear in a job description. 

Analytics

Tracking your recruiting funnel starts with knowing how many people are visiting your job descriptions. That's why we've made it easy for you to gather all the data you need to improve your hiring process. 

You can connect either Google Analytics 4 or a tracking pixel to get insights. 

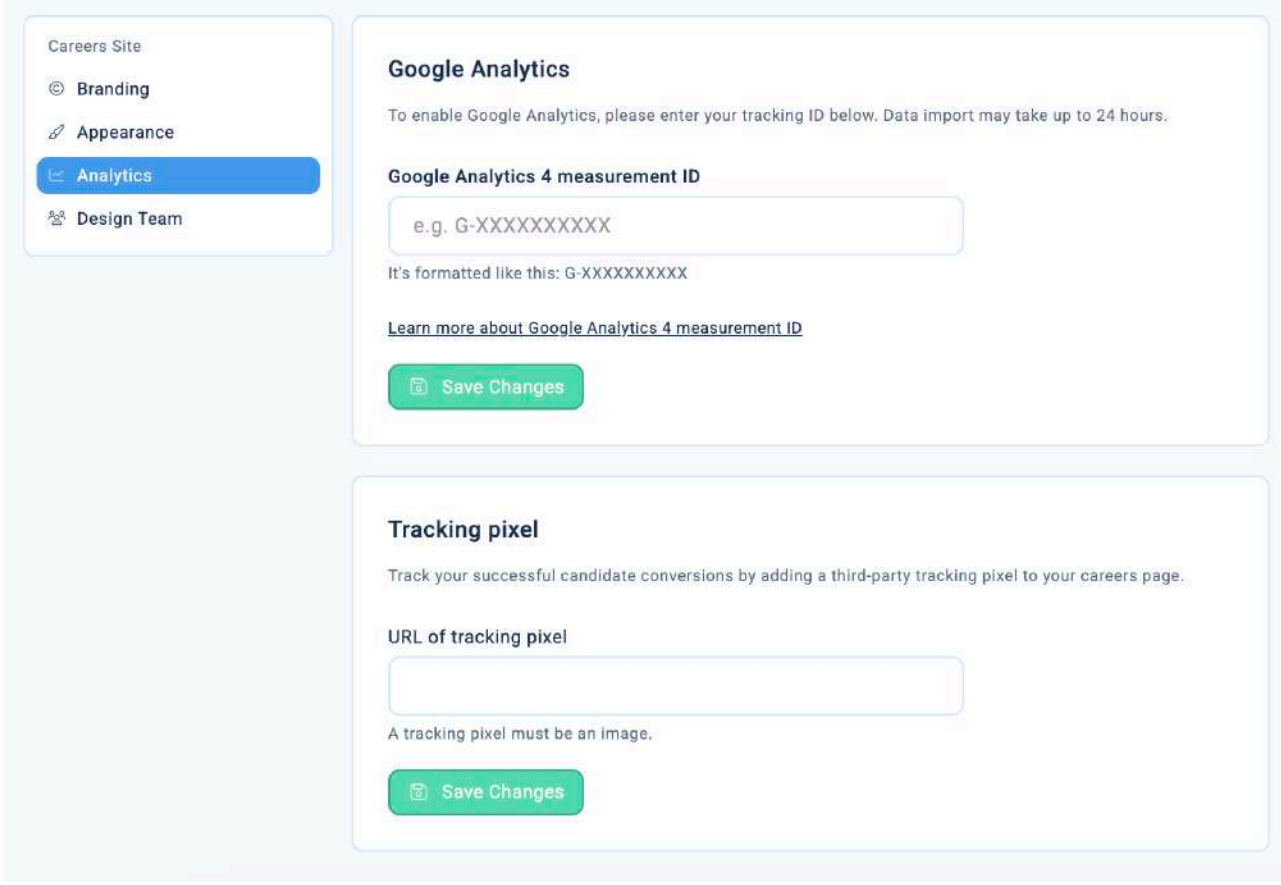

Google Analytics

To connect Google Analytics 4, just enter your measurement ID (it looks something like this: G-XXXXXXXXXX) and hit "Save Changes." 

If you need more details about Google Analytics 4, you can find them [here](#). 

Tracking Pixel

For candidate conversion insights, you can add a conversion pixel from your analytics software. Just generate a tracking pixel URL (make sure it's an image) and add it in to track views and applications. 

Design Team

If someone else in your company handles the design details, you can invite them to have access to make visual changes to your careers site. We'll be adding more features here soon, so stay tuned!

Customize User Settings

Updated over 3 months ago

It's the little things that can make a big difference when you're trying to find the right talent. That's where your user settings come in! You can manage everything from your profile picture to notifications, password, and calendar.

Locating Your User Settings

To get to your settings, just click the gear icon ⚙️ in the bottom left corner and choose 'User Settings.'

Once you're in, you'll see three main sections you can update:

1. Profile 👤
2. Notifications 🔔
3. Connected Apps 🗄️

Profile 👤

In the **Profile** section, you can update:

- First Name
- Last Name
- Job Title
- Department

If you're unsure about your department or can't find it, ask the teammate who invited you or someone with Admin/Mega Admin access. 🙋

Once you've made changes, just hit 'Save Changes.' If you're updating your password, click 'Save Password,' and you're good to go! ✅

Notifications 🔔

Stay on top of things with notifications! Whether it's updates on candidates, interviews, tasks, or anything else, we've got you covered. Let's make sure your notifications are set up just right so your inbox stays clutter-free while you find the next star for your team.

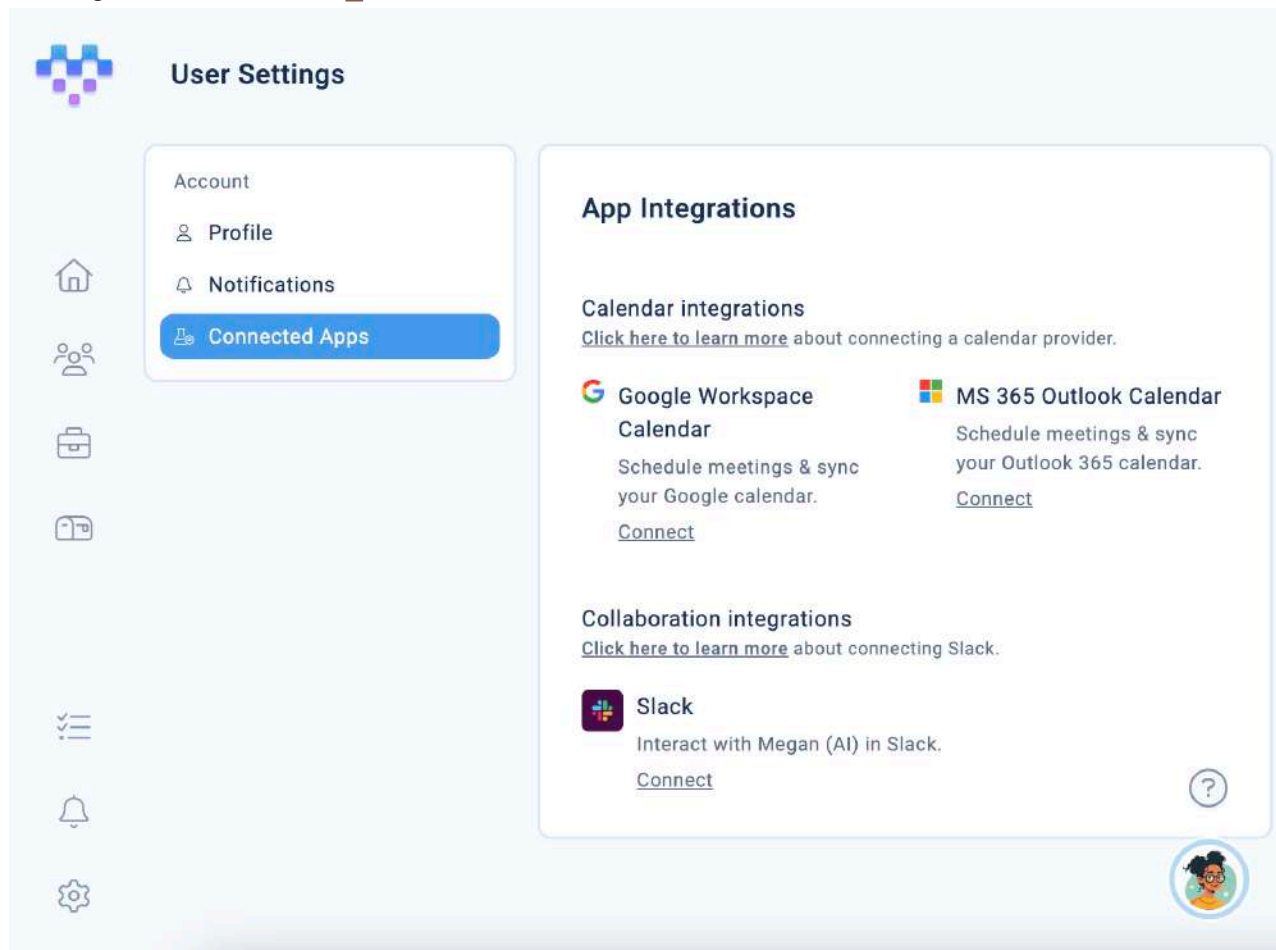

In the **Notifications** section, you can check or uncheck boxes to customize email alerts for things like:

- Candidates 👥
- Comments 💬
- Interviews 🗣️
- Tasks 📝
- Stage SLAs ⌚
- Jobs 📁
- Reports 📊

After you're done, click 'Save Changes' to lock in your preferences. 💾

Connected Apps 🗄️

Ready to supercharge your recruiting game? ⚡ By connecting your calendar and messaging apps to Mega, you'll save time on admin tasks and focus on what matters: finding the best talent! 🏆

Connecting Your Calendar 📅

This is one of the first things we recommend you do when you get started. It's super easy, and we've got a whole separate guide to walk you through it.

You can connect your calendar with:

- Google Workspace Calendar
- Microsoft 365 Outlook Calendar

Collaboration Integrations 🗣️

Meet Megan, our AI-agent! She's here to help make your recruiting process smoother by delivering info when and where you need it. 💡

Slack: Integrate Mega with Slack so you can chat with Megan and your team in the same spot.

Inviting Your Team

Updated over 3 months ago

Hiring is a team effort, so let's get your crew on board! 🧑‍🤝‍🧑

There are two ways you can invite team members to Mega—either at the company level or the job level, depending on what kind of access they need.

Company Level 🏢

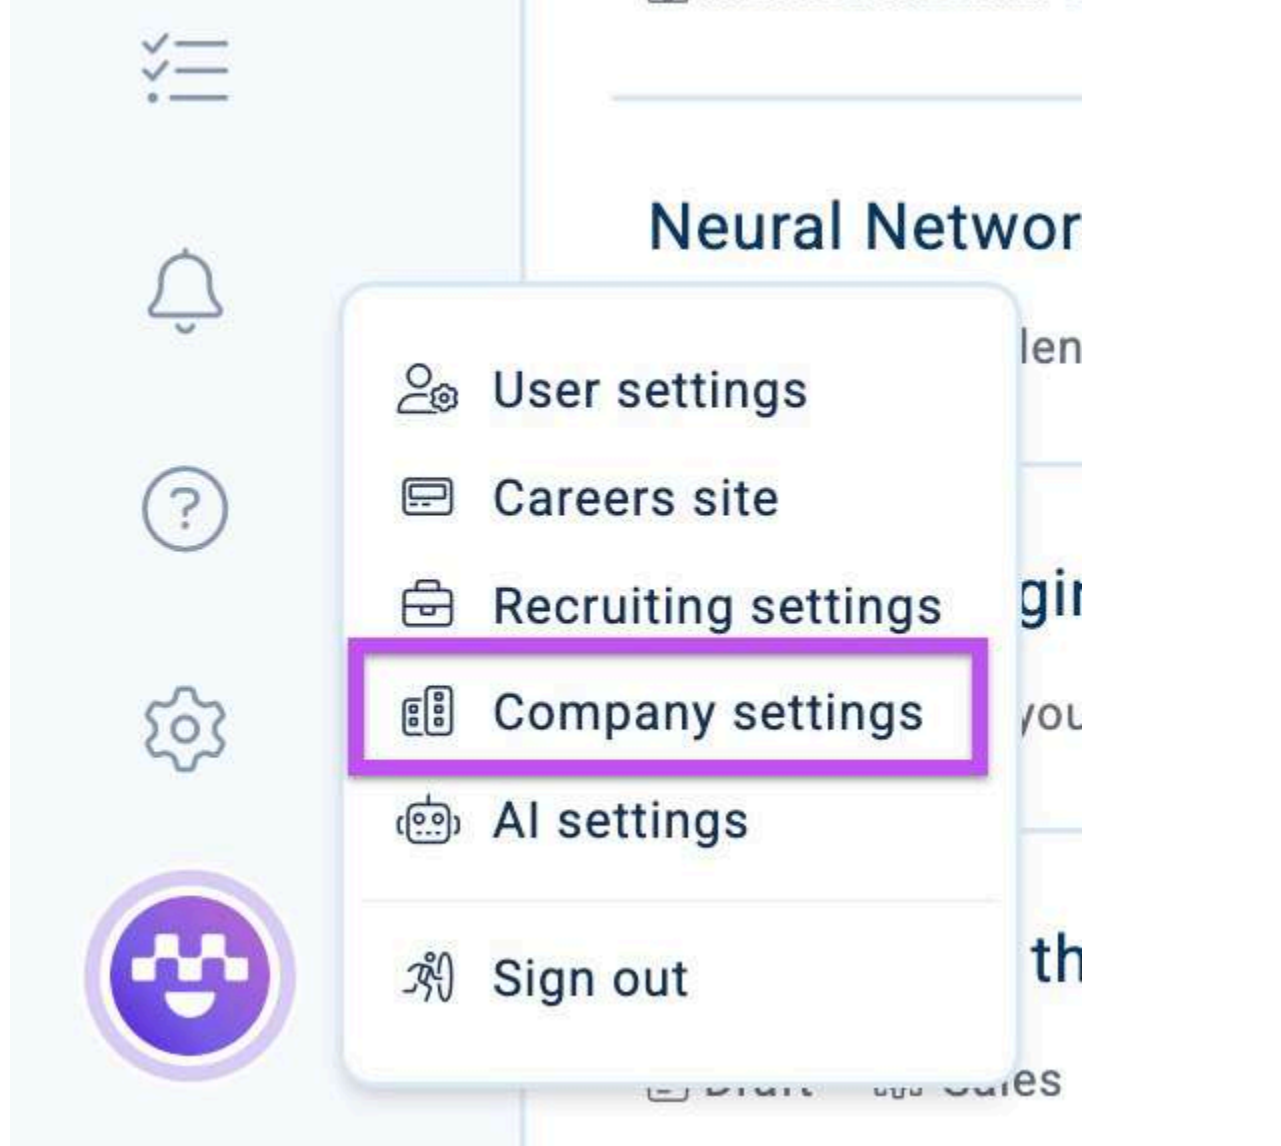

At the company level, team members get access to broader settings like Jobs, Company Preferences, Career Page Settings, and Recruiting Settings.

Job Level 📁

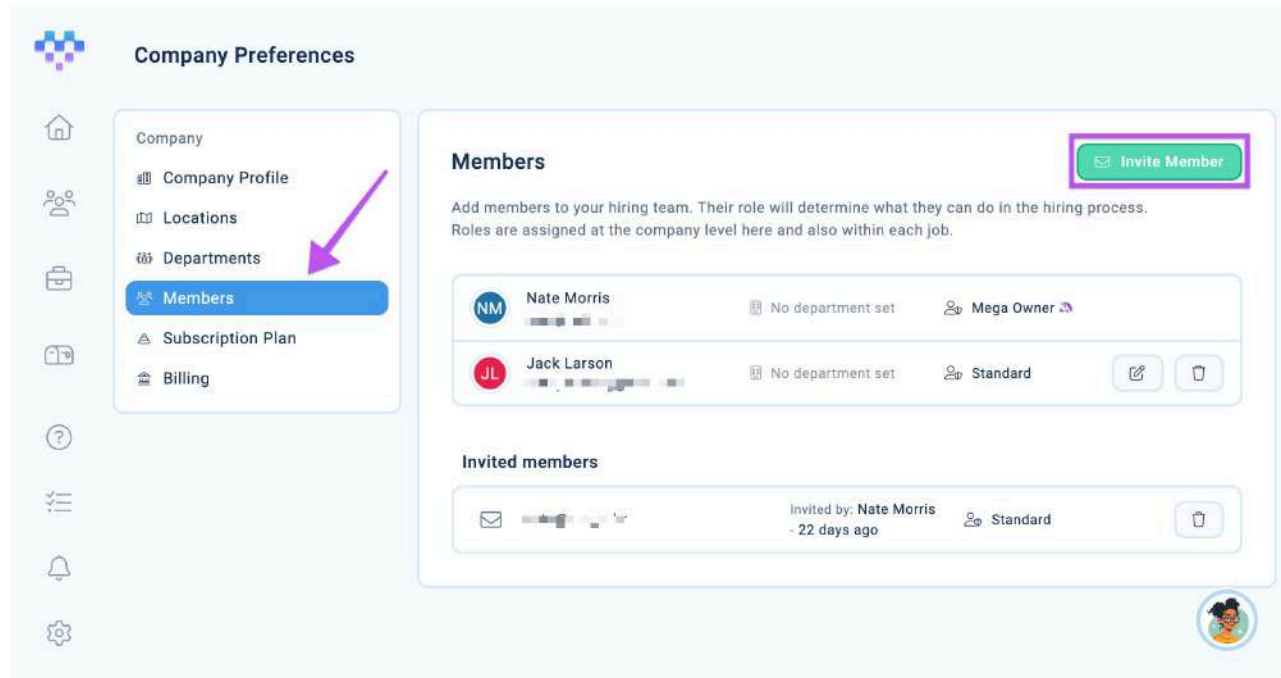

At the job level, team members can manage job details and take actions on candidates.

Inviting Team Members at the Company Level

To invite someone at the company level, start by heading to **Company Settings** ⚙️. You can find it by clicking on the gear icon in the bottom left corner of your screen.

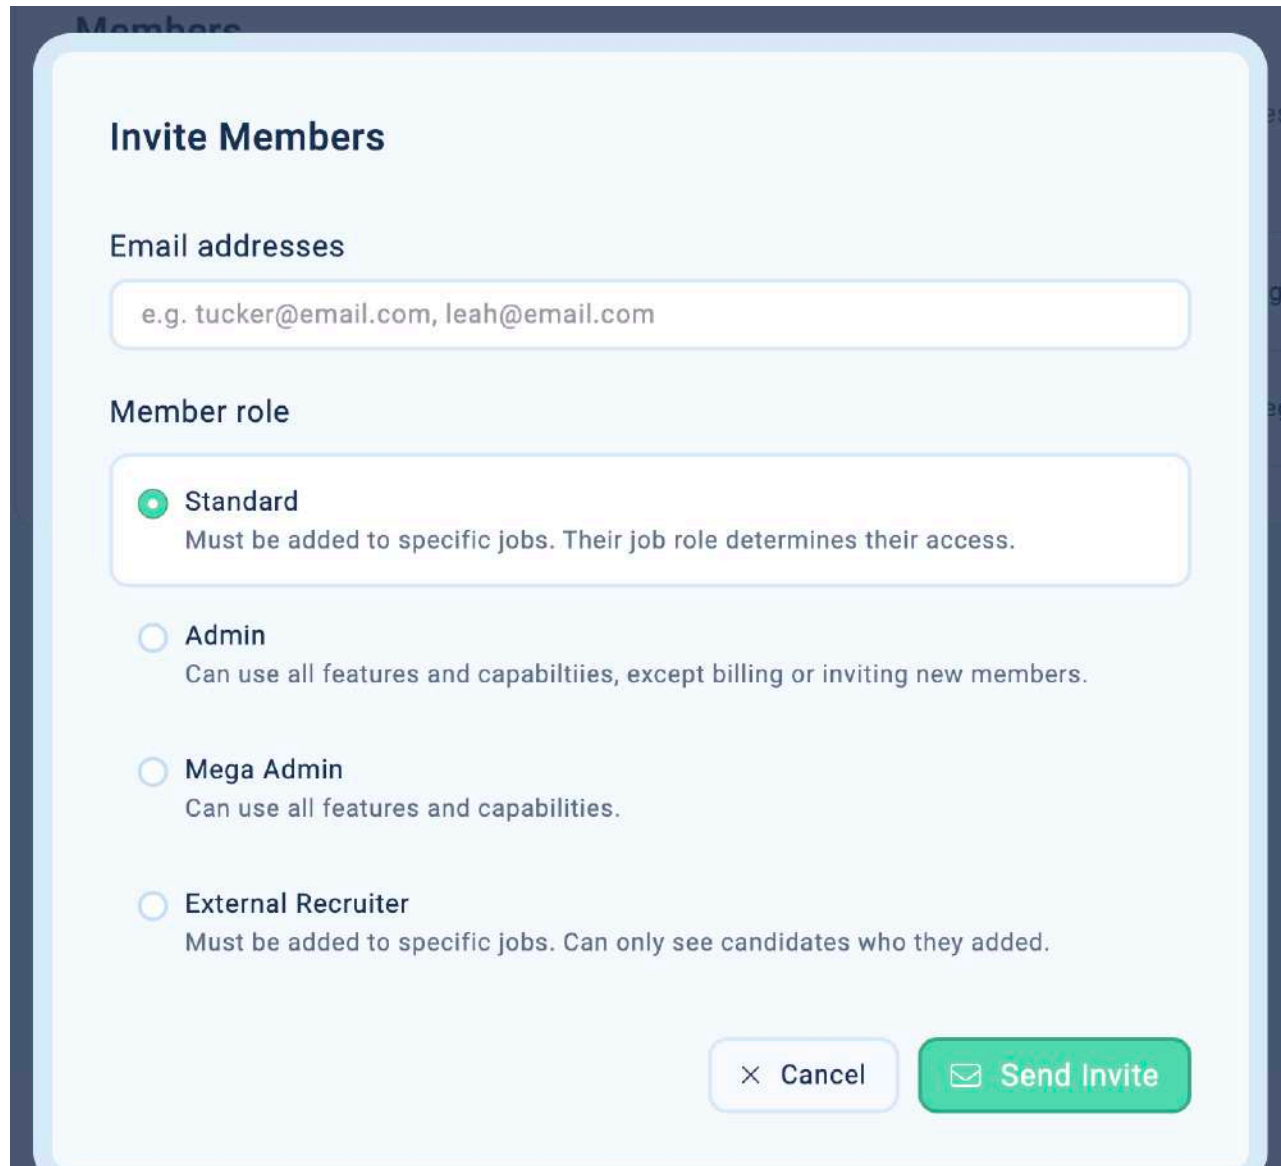

Once you're there, click on **Members** on the left-hand side to view and manage your team.

Want to invite someone new? Hit the **Invite Member** button in the top right. You can add multiple people at once—just separate their email addresses with commas. ✉️

There are four roles you can assign to team members:

- **Standard:** Needs to be added to specific jobs. Access depends on their role within that job.
- **Admin:** Has access to all features except billing and inviting new members.
- **Mega Admin:** Full access to everything.
- **External Recruiter:** Needs to be added to specific jobs and can only see candidates they've added. 🧑‍💻

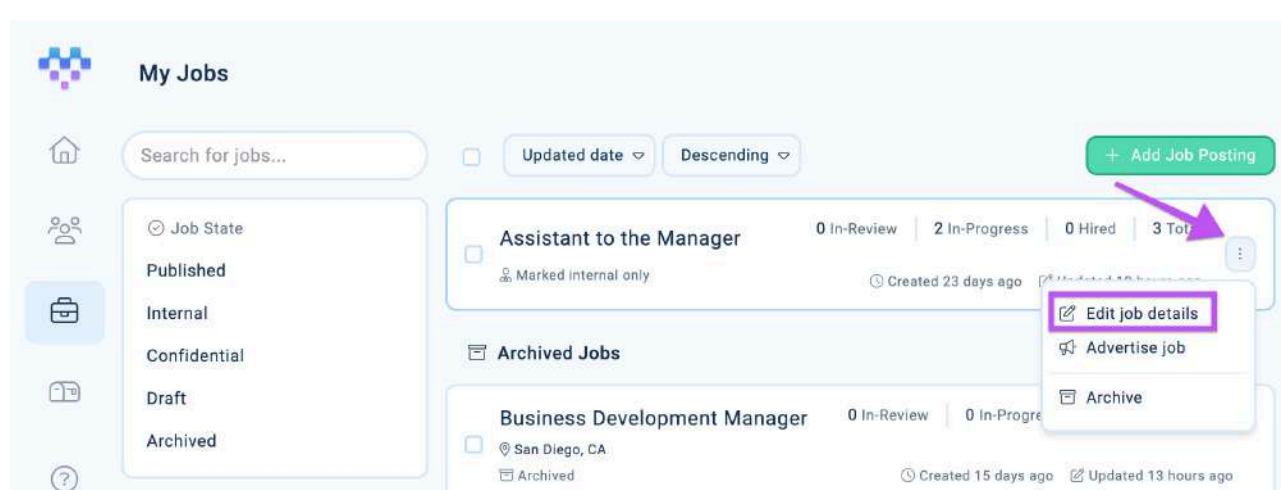

After sending the invite, you can track if they've accepted and signed up. If you need to, you can revoke an invitation by clicking the trash can icon 🗑️ to the right of their email address.

Inviting Team Members at the Job Level

When you're creating or editing a job, you can invite new or existing team members directly to that specific job.

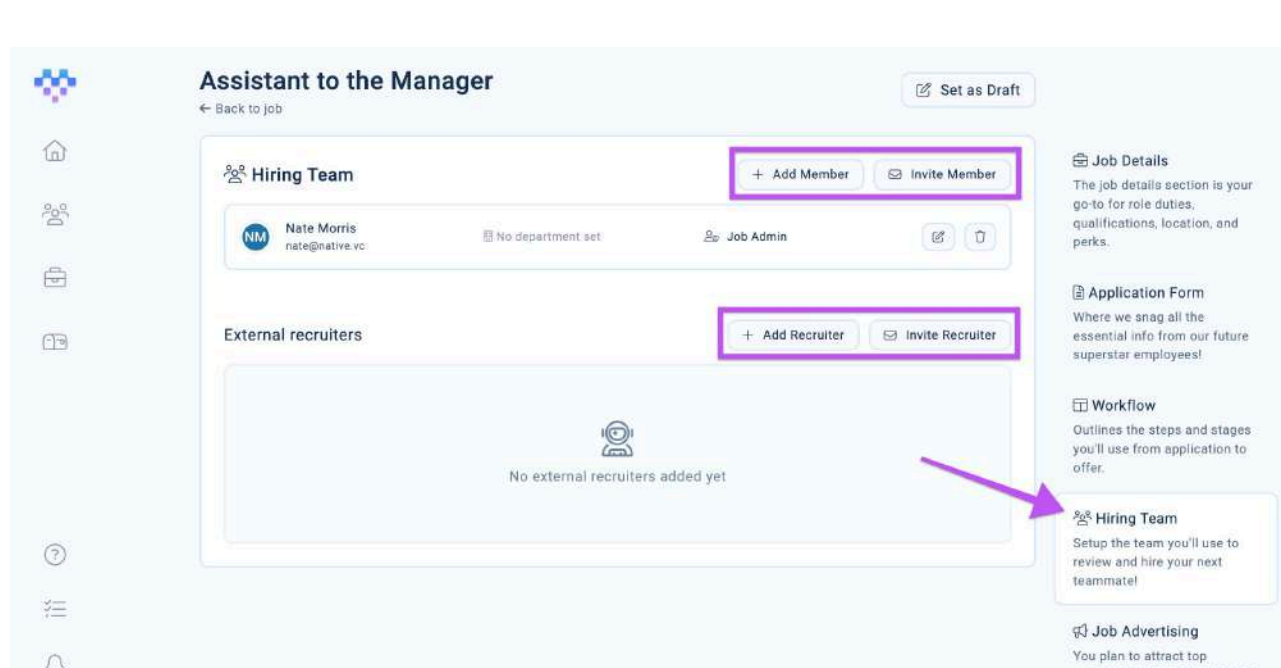

If you're on the **My Jobs** page, just click the three vertical dots ⋮ to the right of the job title to open the job details. If you're already in a specific job, the button will be in the upper right corner.

Once you're in, go to the **Hiring Team** section on the right side of your screen to add team members or external recruiters to that job. 📋

For internal team members, you can choose from three roles:

- **Recruiting Admin:** Has full access to all job-level features, including candidate management, publishing jobs, and purchasing job ads.
- **Hiring Manager:** Can view private team comments, candidate emails, and send offers or schedule meetings.
- **Reviewer:** Can review candidates, complete rating cards, and leave internal comments.

If you're working with **External Recruiters**, you can invite them through the **External Recruiters** section, either as existing users or by email. External recruiters will only have access to the candidates they've sourced, so your internal candidates stay private. 🔒

We're thrilled to have you and your team using Mega! If you ever need help or have feedback, feel free to reach out through our support chat. Happy hiring! 🎉

Stage Types

Updated over 6 months ago

Stages help define each step in a candidate's journey, triggering actions like interviews, messages, reviews, and more. Different Stage Types give you options for automations to keep things running smoothly.

Here's how you can easily add, remove, or rearrange stages in your Recruiting Preferences. When you're ready to set up workflow automations for each stage, just head over to the job's details and edit the workflow from there.

Default Stages

- Leads**
Got candidates who came close for a previous role or ones sourced through outside recruiters? Leads is your space for candidates added to your job from outside applications.
- Applied**
This classic Applied stage is where candidates start after applying through a job board or career page. Make sure to enable a confirmation email so they know their application's been received!
- Hired**
The finish line! This stage is for the candidate who's made it to the end. Remember, you can only have one Hired stage per workflow, and we rely on this for analytics and onboarding down the road.
- Disqualified**
Candidates who didn't meet your criteria can be moved here either manually or through AI Screening. Set up a custom message template to let them know the outcome in your company's tone.
- Archived**
Keep your workflow tidy by moving extra candidates from the Disqualified stage into Archived. You'll retain all their profile info (notes, messages, resume, etc.) and can bring them back if they're needed later on.

Custom Stages

- Review**
After interviews or assessments, use the Review stage to gather feedback from team members. Ratings can be a simple 1-5 star scale or a more detailed breakdown—whatever works for you.
- Interview**
Scheduling interviews is easy with Mega! With calendars connected, Mega can handle the time-consuming task of coordinating candidate schedules for your team.
- Background Check**
For roles requiring additional checks (like criminal, employment, or identity verification), use this stage to send out background checks automatically before making the final offer.
- Other**
If you have a unique recruiting step that doesn't fit into these categories, add a custom stage here to keep your process organized.

Due Dates and SLAs

Updated over 3 months ago

Hiring moves fast, and it can feel like there’s never enough time to keep up with every candidate. That’s why we’ve set up Due Dates (or SLAs) in Mega to make sure no one slips through the cracks 🕒.

You can adjust these Due Dates within your Workflows, either through **Recruiting Preferences** or directly in the **Job Details**. This is where you’ll set how long a candidate can stay in a particular stage before it’s time to act.

Want to stay ahead of things? Head to **Personal Settings** to manage notifications. You’ll get alerts when a candidate’s getting close to their time limit—or if they’ve already gone past it—so you can follow up right on time 🕒.

Stage Visibility

Updated over 6 months ago

When you’re working with team members, managers, and recruiters across your company, there might be some stages in the hiring process that need to stay private 🙄.

If stage visibility is enabled, it means that everyone involved in the job—not just Hiring Managers and higher—can see that stage 👁️.

Just a heads-up! Both Admins and Mega Admins automatically have access to all stages, so they’ll see everything by default.

[All Collections](#) > [Adding & Managing Workflows](#) > [Managing Workflow Stages](#)

Managing Workflow Stages

Updated over 3 months ago

Let's walk through how you can set up your candidate workflow and adjust it to fit your hiring needs.

Default Stages

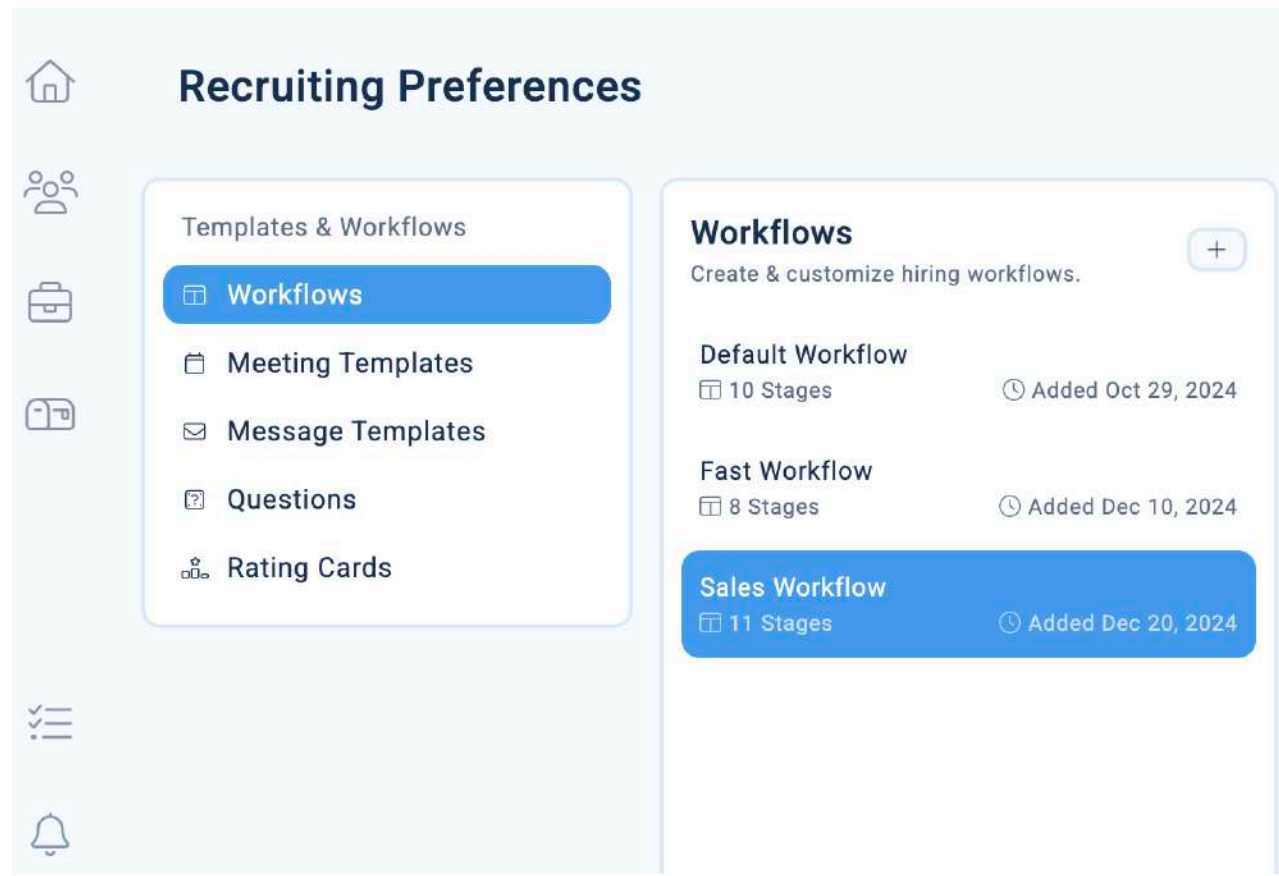

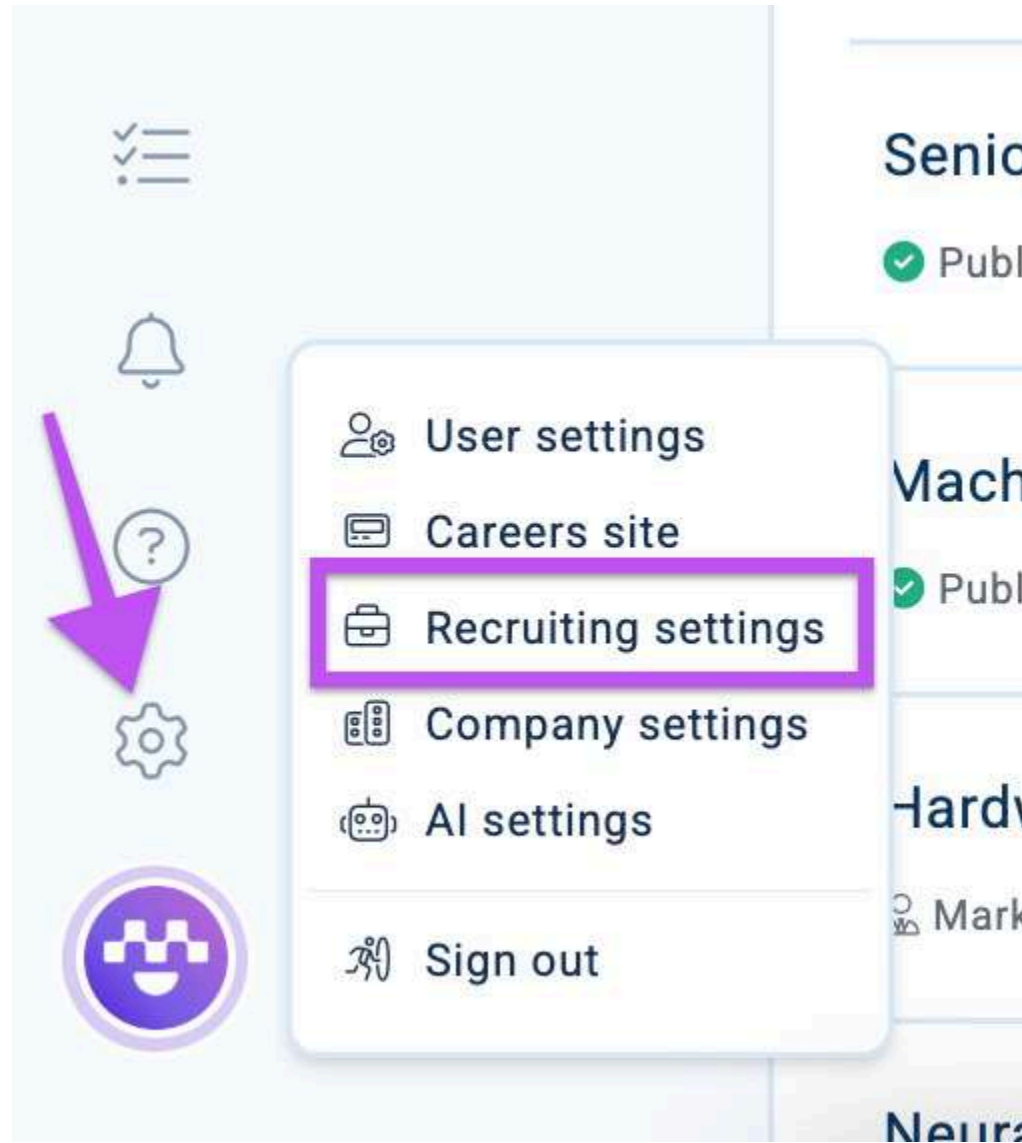

By default, your workflow includes:

- **First two stages:** Leads and Applicants
- **Last three stages:** Hired, Disqualified, and Archived

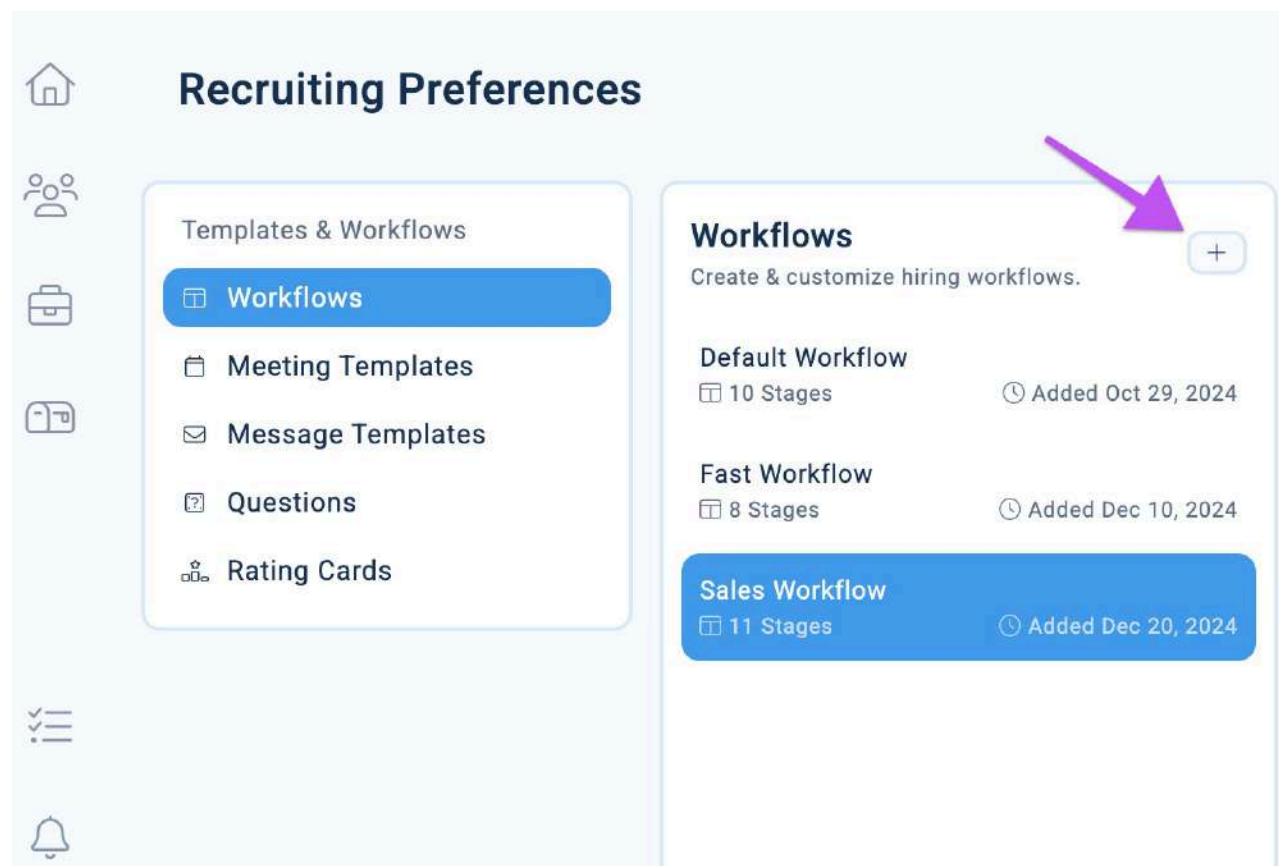

Important 🚨 If you want to change stages in workflows that are already assigned to jobs, keep in mind that simply rearranging or removing stages won't impact them. Instead, you'll need to adjust automations on each individual job as needed. Any new jobs you create will follow the updated workflow.

Creating and Managing Workflows

Open Recruiting Settings: Go to the **Workflows** section to see all the workflows you've created.

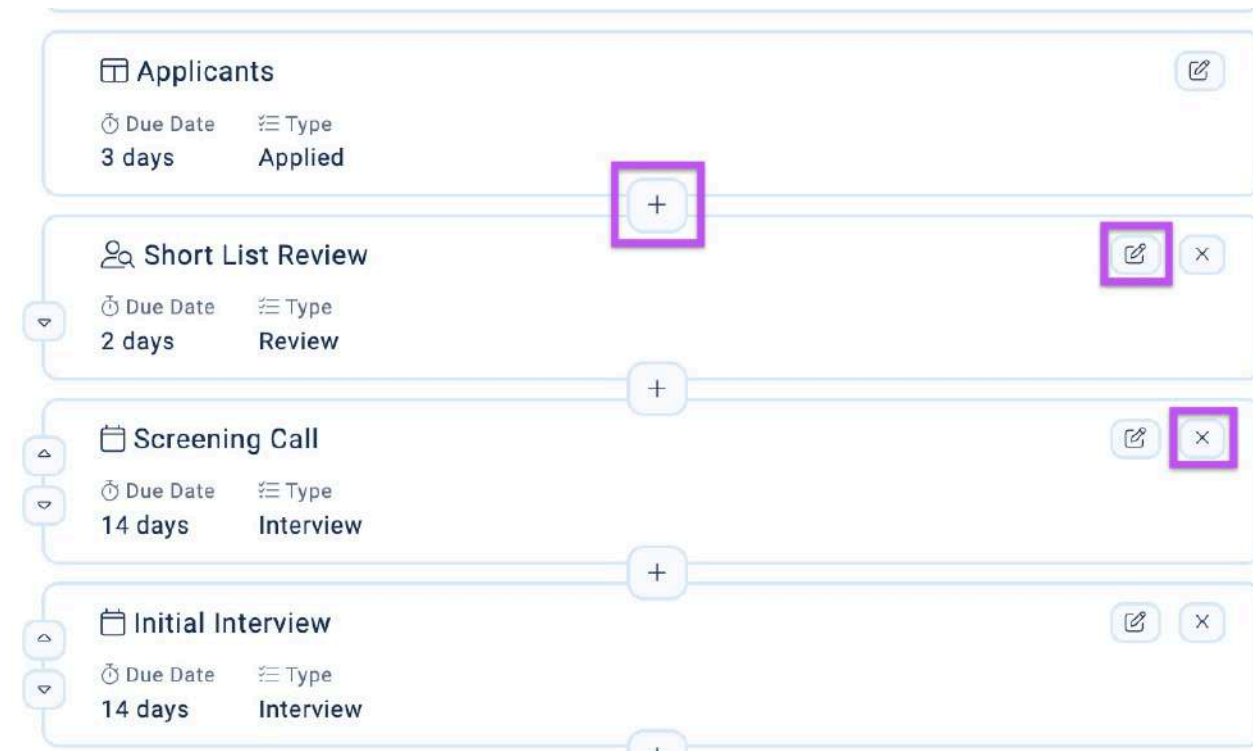

Create a New Workflow: To start fresh, click the “+” button at the top right of your Workflows list. This will give you a default workflow template, which you can adjust and rename however you like.

Adding, Editing, and Deleting Stages

Here's how to add, change, or remove stages in your workflows.

Add a New Stage +

Look for the “+” button between your non-default stages. Clicking it will add a new stage there. Give it a name and select its type.

Edit a Stage 🖋️

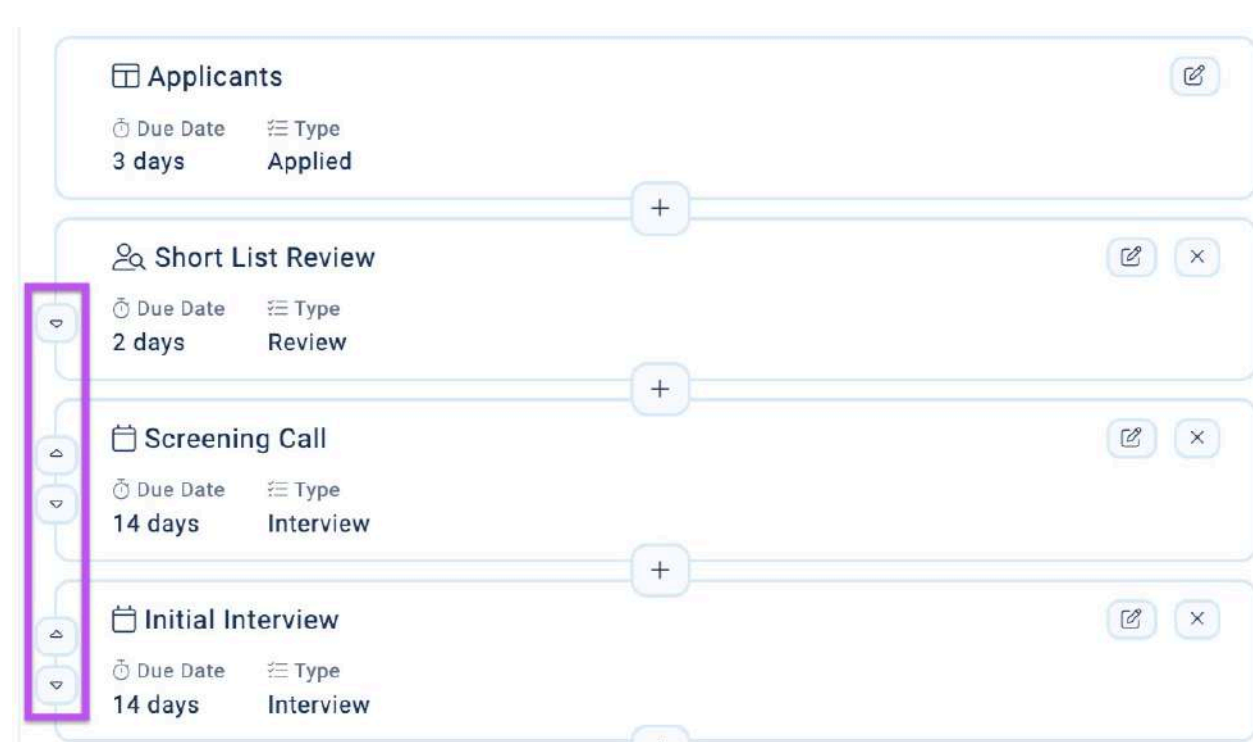

To edit a stage, find the **pen and paper** 🖋️ icon next to it. Click that icon, make your changes, and don't forget to hit “**Save Changes**” at the bottom.

Delete a Stage ✖️

To delete a stage, click the **X** icon next to it. Don't worry—you'll get a confirmation prompt to be sure. Note that removing a stage won't impact workflows already assigned to active jobs, but it will apply to any future jobs using this workflow.

Moving Stages ⬆️⬆️

Want to rearrange the stages in your recruiting workflow to get them in the perfect order? No problem! Just look on the left side of each stage, and you'll see handy up and down buttons. Click those to move a stage up or down until everything's right where you want it. Easy as that!

AI Screening

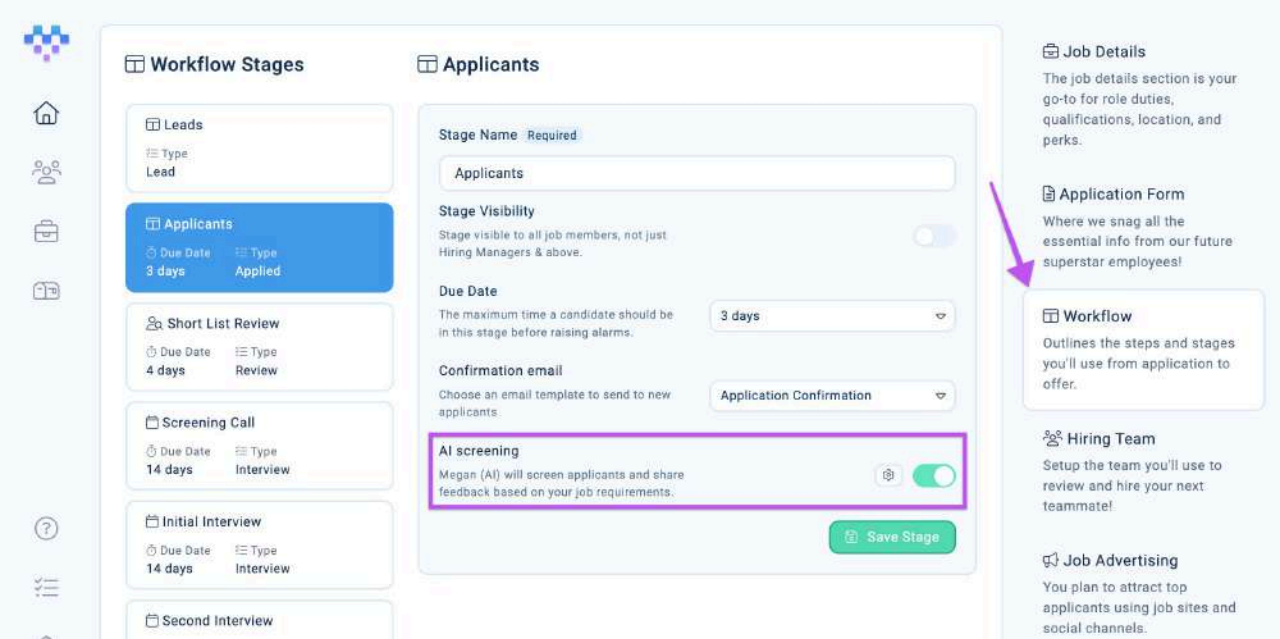

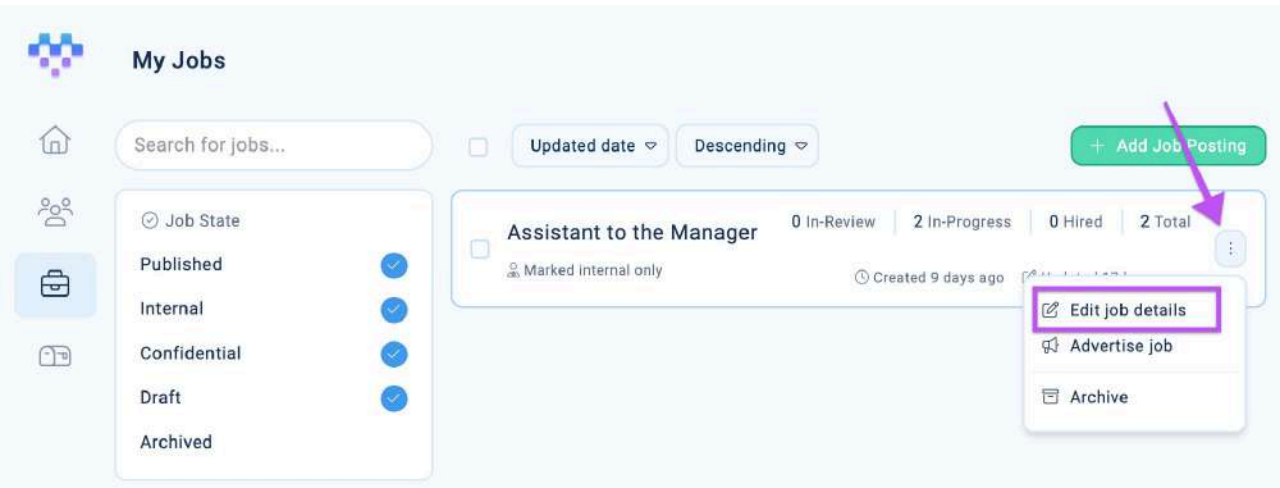

Updated over 3 months ago

Got a role with specific requirements? When dozens—or even hundreds—of applicants start applying, screening them all can take a lot of time. That’s where Megan, our AI screening tool, steps in to help! Megan will go through each application and flag the top candidates based on your job criteria, giving you a shortlist of people worth a closer look.

Enable AI Screening at the Job Level

When you enable AI Screening and Guidance on a job’s details page, Megan becomes your personal assistant, helping you find the top candidates for each role you post. AI Screening is performed in the default Applied stage. Here you can toggle AI screening on or off as well as AI Guidance.

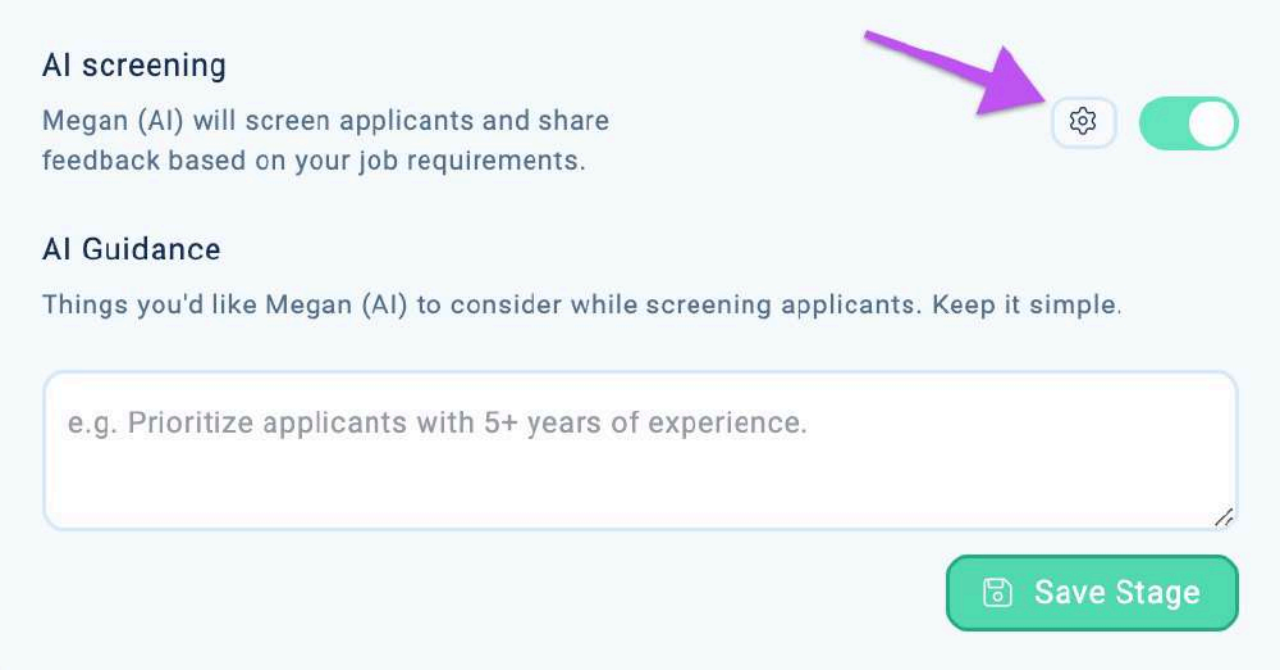

Megan takes a **comprehensive approach** to candidate evaluation, going beyond just checking boxes. She reviews the **full scope** of a candidate’s experience, skills, and qualifications, analyzing not just what’s listed, but the **depth behind it**—is there real project experience, or just surface-level familiarity? She also considers the balance between **creativity, technical expertise, and leadership skills**, ensuring the candidate aligns with the true needs of the role

Customize Megan to Fit Your Needs

With AI Screening enabled, Megan gets to work by reviewing your job description and matching it with each candidate's application. This way, Megan pinpoints the applicants who best fit what you're looking for.

Megan is also designed with flexibility in mind. You can easily adjust how Megan screens candidates, so the process fits your exact needs. Whether you’re looking for specific experience, skills, or other qualities, Megan can help you find the top candidates tailored to your job requirements.

How to Add AI Guidance for Even More Precision

Want to make sure Megan prioritizes your qualities? Click the gear icon next to the "AI Screening" toggle, and a text box will open where you can add guidance. Here, you can specify things like "Focus on candidates with 5+ years of experience." Keep it simple and direct, too much specificity could reduce qualified candidates.

AI Scheduling

Updated over 3 months ago

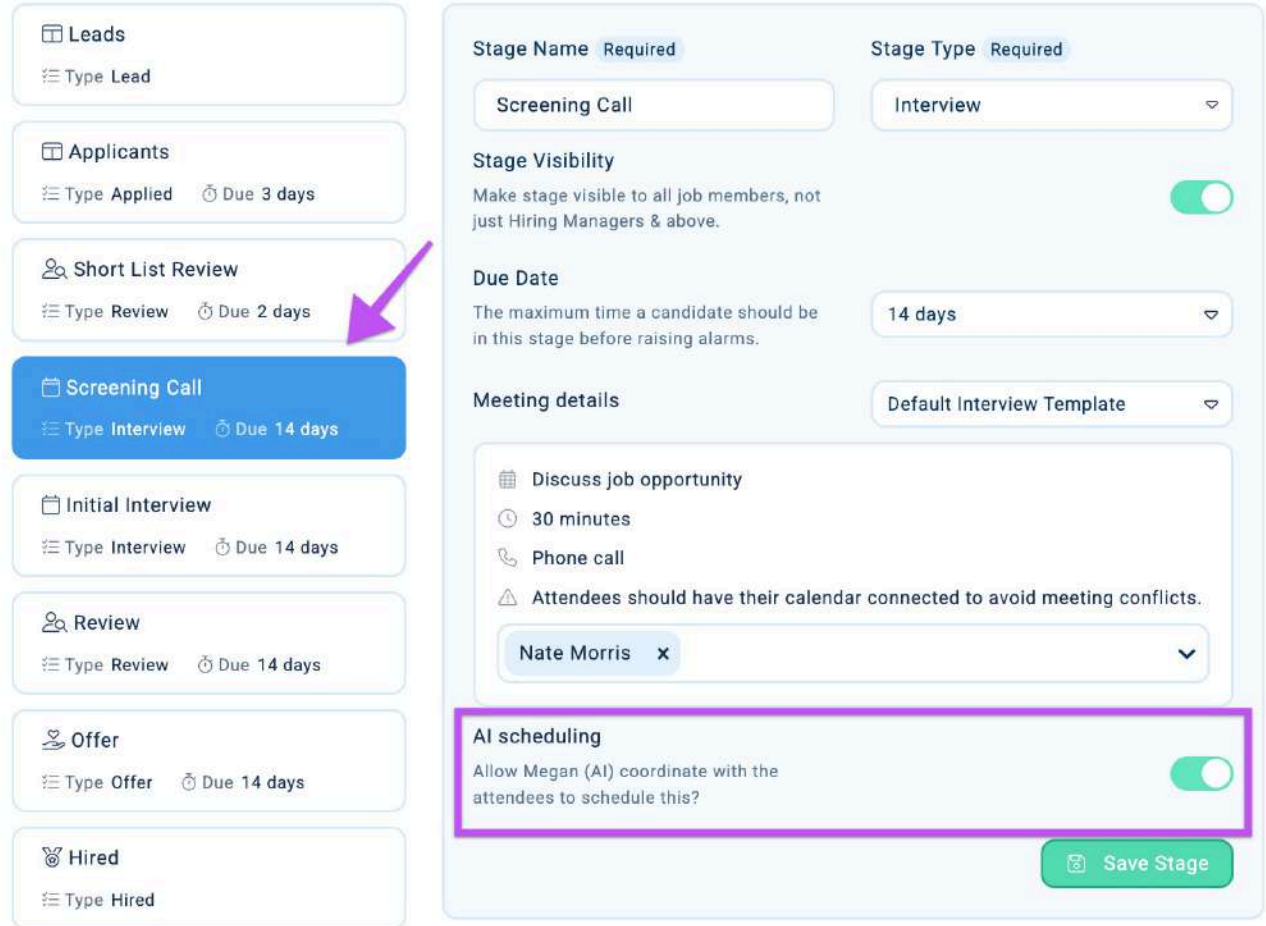

Want to save hours of back-and-forth scheduling? Megan's AI Scheduling has you covered! Once everyone connects their calendars, Megan takes the reins, coordinating meetings with candidates seamlessly. Say goodbye to the hassle of scheduling and hello to extra time in your day. 🙌

Step 1: Connect Your Calendar

First things first—make sure your calendar is connected. This lets Megan work her magic. ✨

Step 2: Enable AI Scheduling in Your Workflow

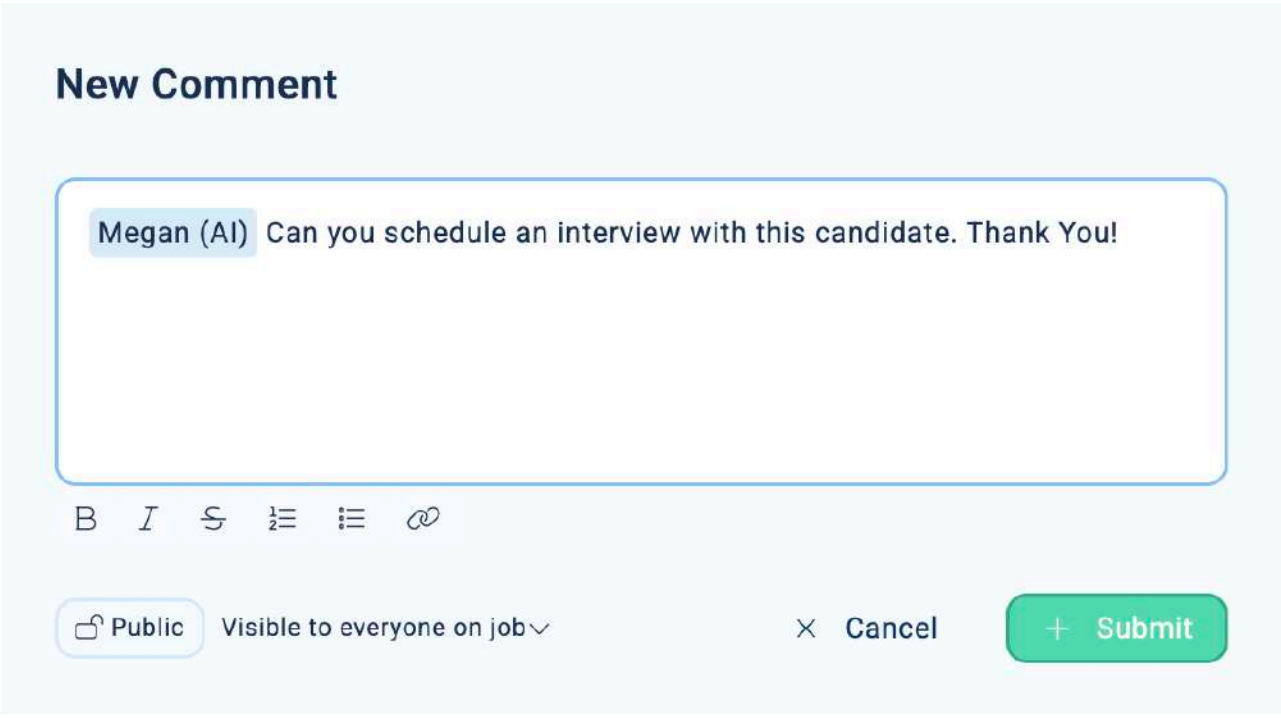

Inside your **Job Details**, head to the **Interview Stages** section of the workflow. Here's where you can enable AI Scheduling to fit your hiring process.

How Megan Handles Scheduling

Megan can schedule calls or interviews in two super-efficient ways:

- Automatic Scheduling via Pipeline Stages**
 - When a candidate reaches a stage in your pipeline with AI Scheduling enabled, Megan steps in automatically.
 - She emails the candidate to see if they're interested in meeting. If they say yes, Megan sends them a link to pick a time that works. 🕒
- Manual Scheduling via Direct Request**
 - Need to schedule something right away? Just ask Megan directly in the Candidate's Activity Feed.
 - She'll create personalized emails for each candidate, confirm their interest, and send out scheduling links if they're game. 📧

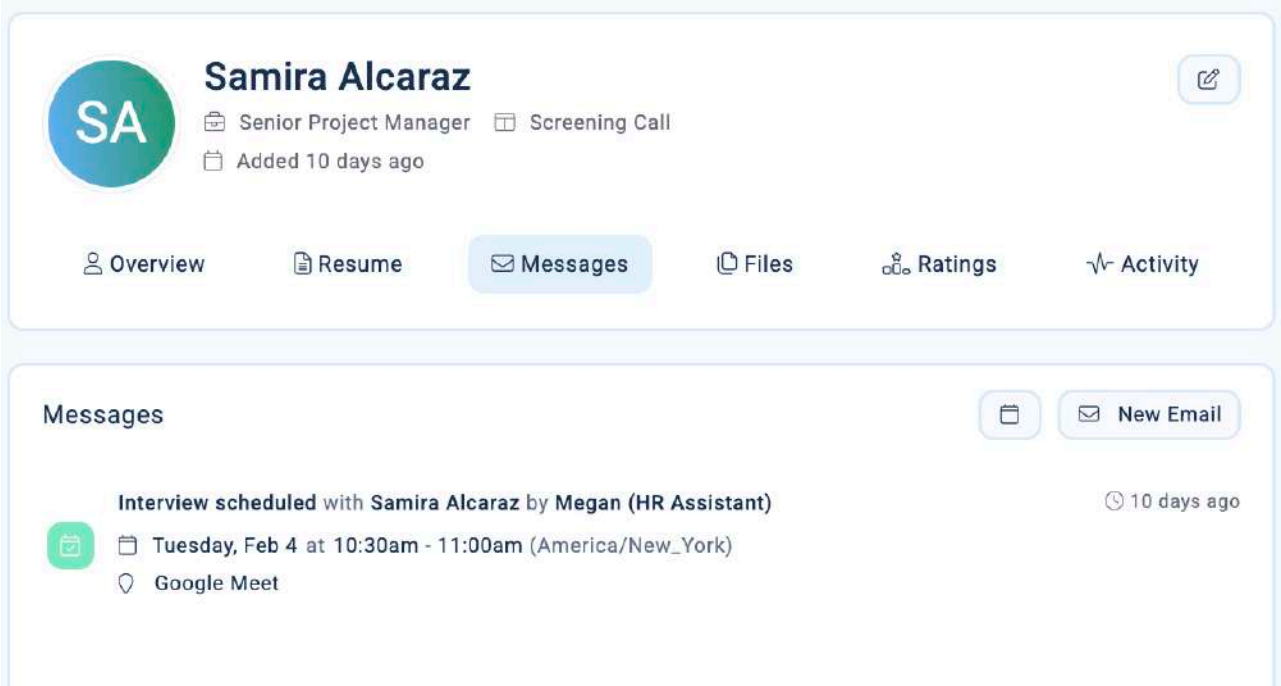

What Happens Next

Megan keeps everyone in the loop:

- Once a candidate picks a time, Megan notifies the hiring manager and updates the candidate's **Activity Feed**. 📅
- If a candidate says no, Megan marks them as disqualified and updates the chat for you. 🚫

And that's it! Megan makes scheduling a breeze so you can focus on what really matters—hiring the best people. 🙌

Got questions? Ping Megan or check the Activity Feed for updates. She's always on top of it!

Adding Team Members to Meetings

Updated over 3 months ago

Get the right people involved in managing your job postings! 🧑🏻‍💻 🧑🏻 Having the right team members in charge makes it easy to review candidates, schedule interviews, use rating cards, and more.

Quick Reminder 📅 When a new team member joins Mega, remind them to connect their calendar! 📅 This way, Mega can automatically help schedule interviews based on everyone's availability—saving you the hassle.

Adding Team Members to Interviews To add team members to a meeting, head over to the Job Details section. Every stage marked as an "Interview" type has Meeting Details where you can add attendees. Just choose who you want and hit save! ✅

Meeting details

Default Interview Template

Discuss job opportunity

30 minutes

Phone call

Attendees should have their calendar connected to avoid meeting conflicts.

Nate Morris

AI scheduling

Allow Megan (AI) coordinate with the attendees to schedule this?

Save Stage

Setting Up Interview Templates
In the Interview Templates dropdown, you'll find a few pre-set options to get started. You can use the default template, or create customized templates for different interview types so candidates know what to expect.

Adding Attendees
There are two ways to add attendees:

1. Select from your hiring team members list. 👤
2. Add them manually via email. ✉️

Save Stage

AI Note-taking
Ever wish you had an assistant to take notes for you? Well, now you do! When **AI Note-taking** is enabled, **Megan** joins your video calls to **transcribe the conversation** and capture all the important details. 📝 ✨

- **Megan automatically joins the call** and starts transcribing.
- After the meeting, she provides a **detailed summary** of everything discussed.
- Any **action items**? She's got them covered!

Megan Remembers Everything 🧠

The best part? **Megan keeps a full memory** of your past conversations. So if you ever need to recall something—just ask her! She'll pull up the info in seconds.

AI Scheduling with Megan
Let your AI assistant, Megan, handle the scheduling for you! Megan can coordinate with attendees, gather availability, and send all the details to candidates. For example, if it's a phone interview, Megan will even make sure a contact number is collected if not provided by the candidate's application. 📞 This all happens automatically—so you can focus on hiring the best fit, not scheduling tennis.

All Collections > Adding & Managing Workflows > Selecting Reviewers

Selecting Reviewers

Updated over 4 months ago

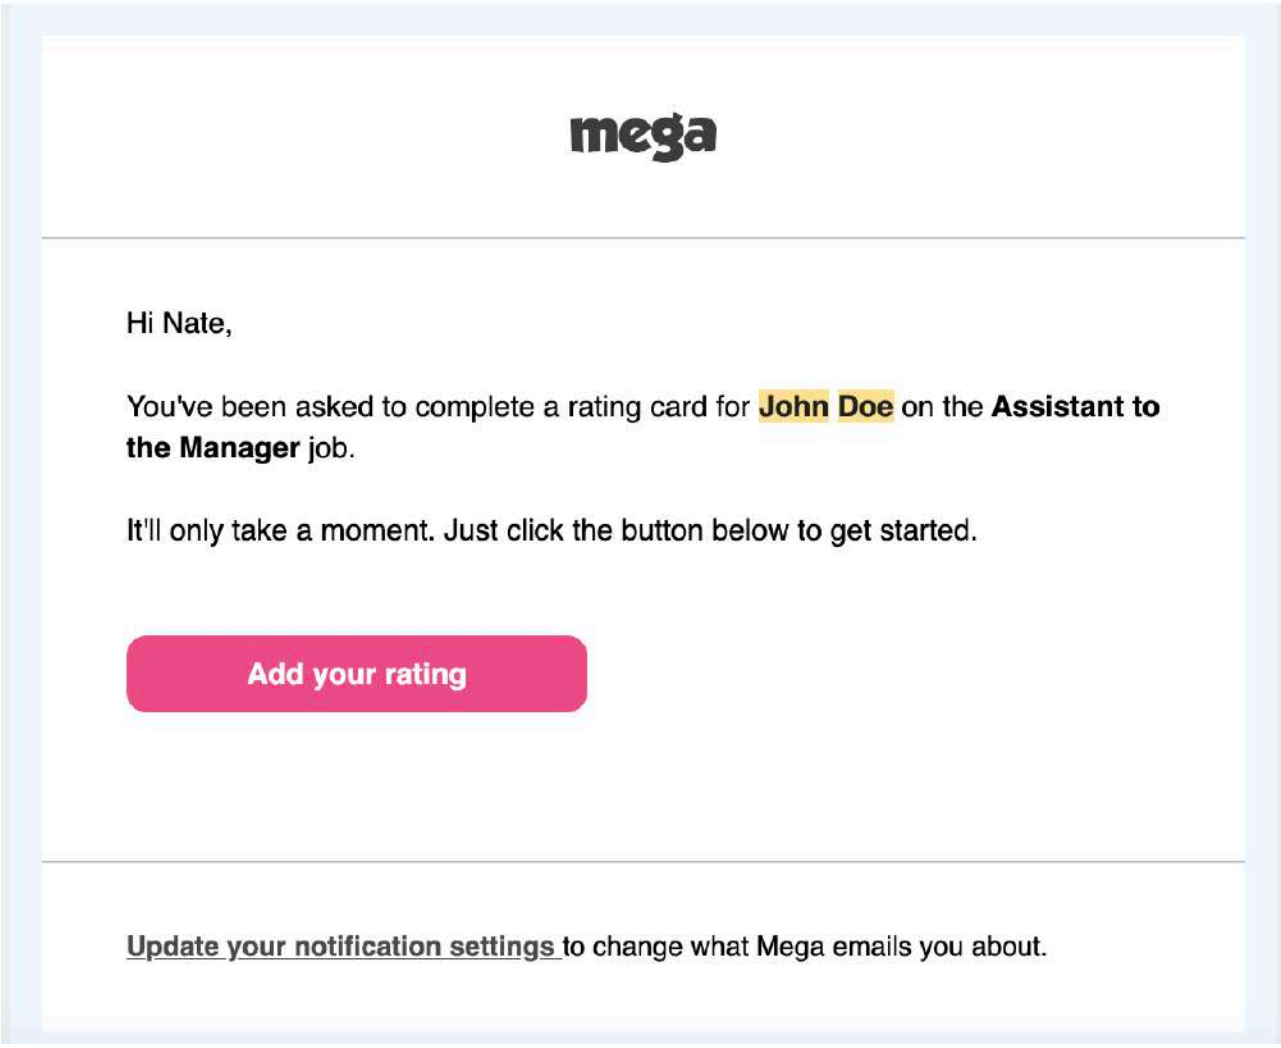

You've got options for adding team members to rate / review candidates: add them through hiring groups or individually. Just make sure the workflow Stage Type is set to "Review" so Rating Cards get requested.

Here are the options for who can rate candidates:

- Hiring Admins
- Recruiting Managers
- Hiring Managers and Above
- Reviewers
- All Job Members

Team members selected to rate candidates will receive a email notification with reminders in case they have a lot going on.

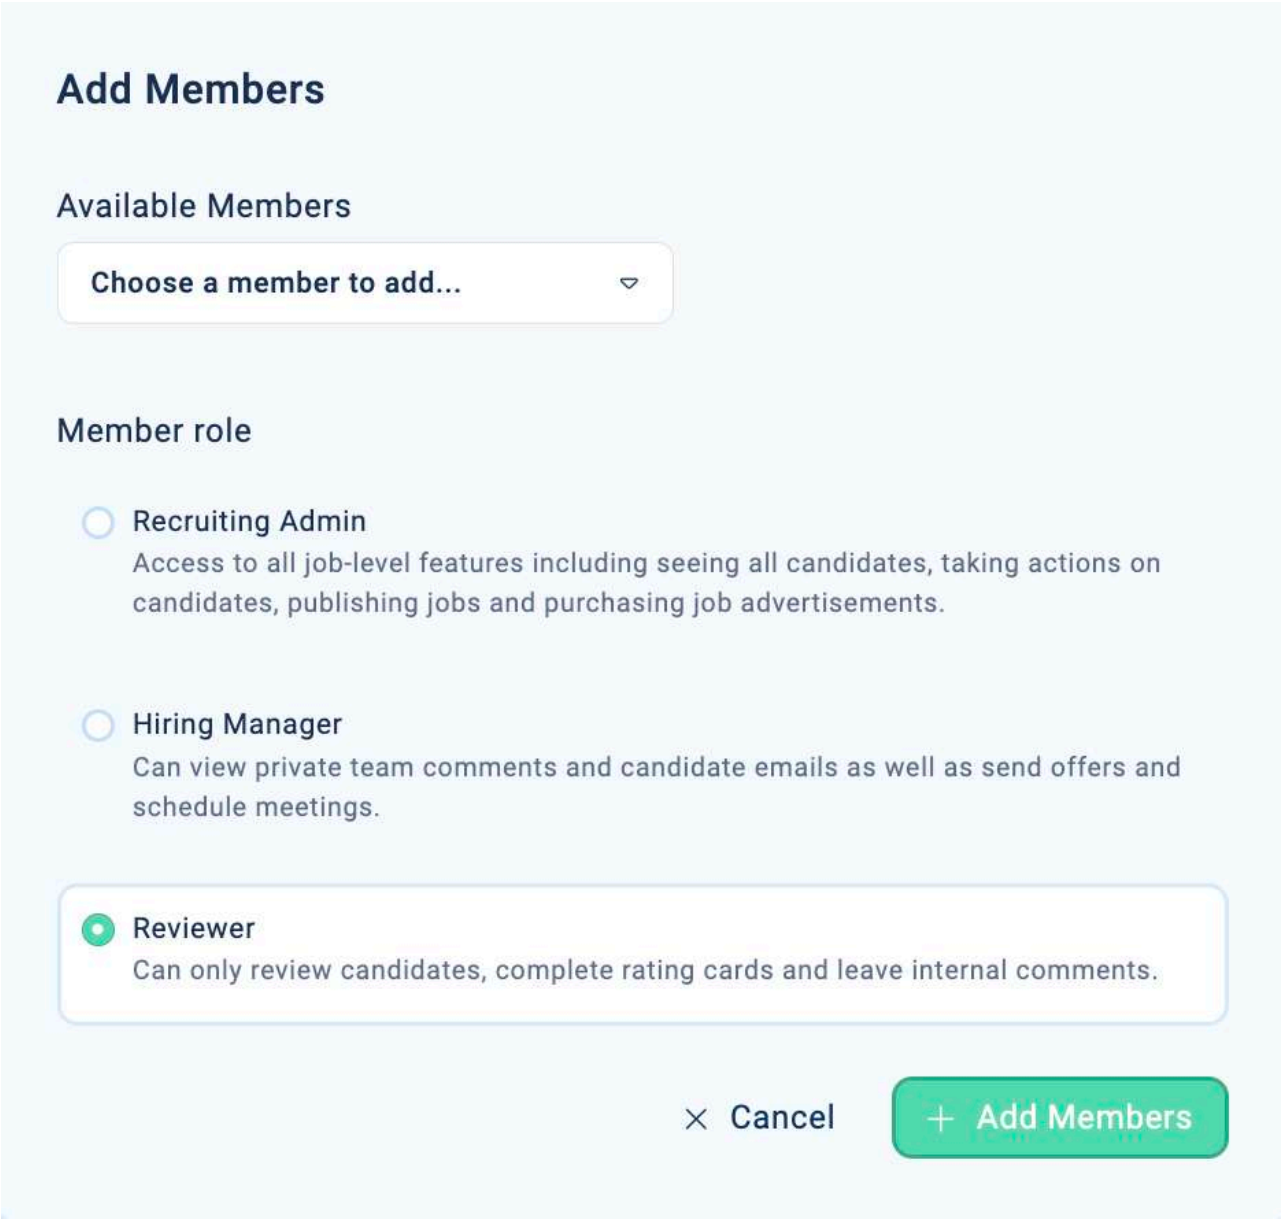

Why Set Up Hiring Teams? 🤔

Setting up Hiring Teams can make a big difference in keeping the hiring process organized. You'll find Hiring Teams managed at the Job Details level, so everything stays streamlined.

How to Set Up Hiring Teams

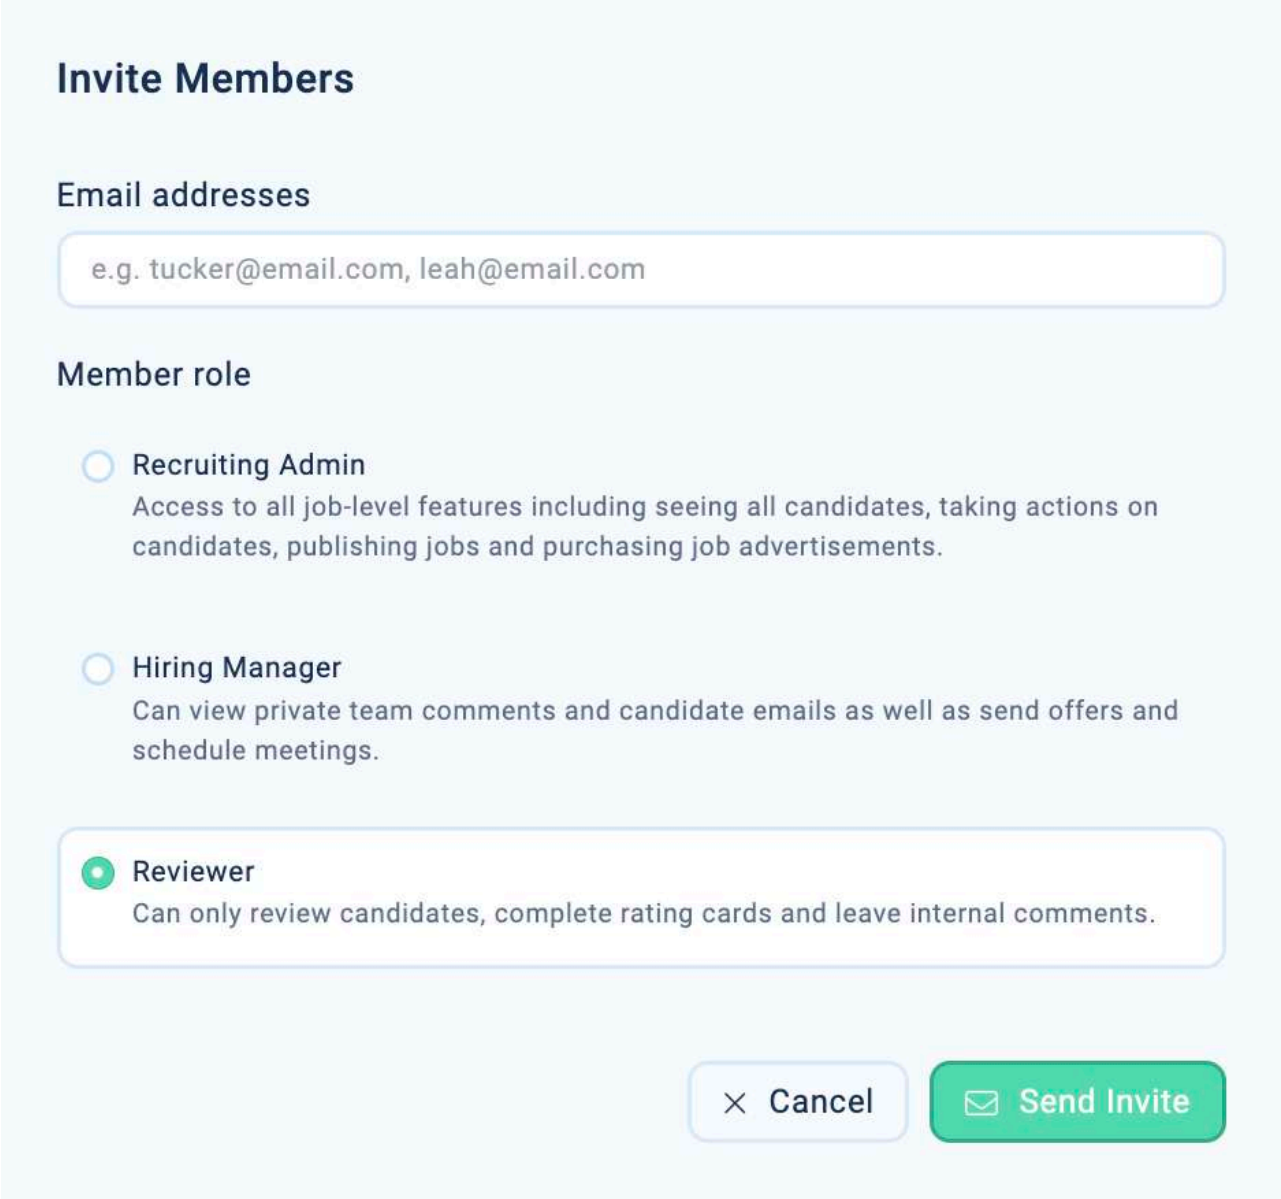

1. Hiring Team Roles & Permissions 🛠️

You can add team members by inviting existing Mega members or by emailing new ones to join.

2. Inviting Your Team to Mega 🧑🏻‍🤝‍🧑🏻

Once your team's added and roles are set, you can pick which group should be rating candidates.

All Collections > Adding & Managing Workflows > Sending Confirmation Email

Sending Confirmation Email

Updated over 6 months ago

Creating a great recruiting experience is just as important as building a great company culture. A simple way to start? Personalize your confirmation emails to give candidates a welcoming touch! 📧

To automatically send a confirmation email, make sure the **Stage Type** is set to **‘Applied’**.

Within the **Applicants** stage, choose the email template you want from the dropdown menu. Once you’ve picked the right one, just hit **Save**, and you're good to go! ✅

Now, any candidate added or moved into this stage will receive the email automatically. And don’t worry—candidates will only get the message once, even if they move into this stage multiple times. 👍

All Collections > Adding & Managing Workflows > Requesting Rating Cards

Requesting Rating Cards

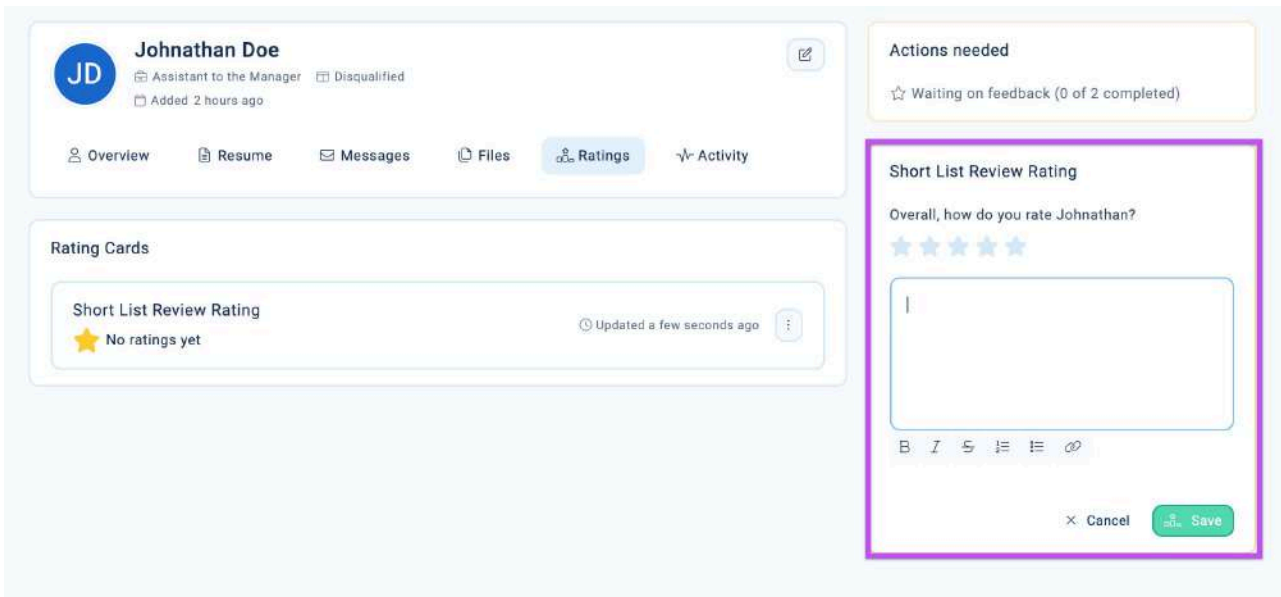

Updated over 6 months ago

Rating Cards do more than a simple 👍 or 👎—they help you gather detailed, averaged ratings on candidates based on custom criteria! Selecting the right Rating Card is done inside your Job Details via the Workflow section.

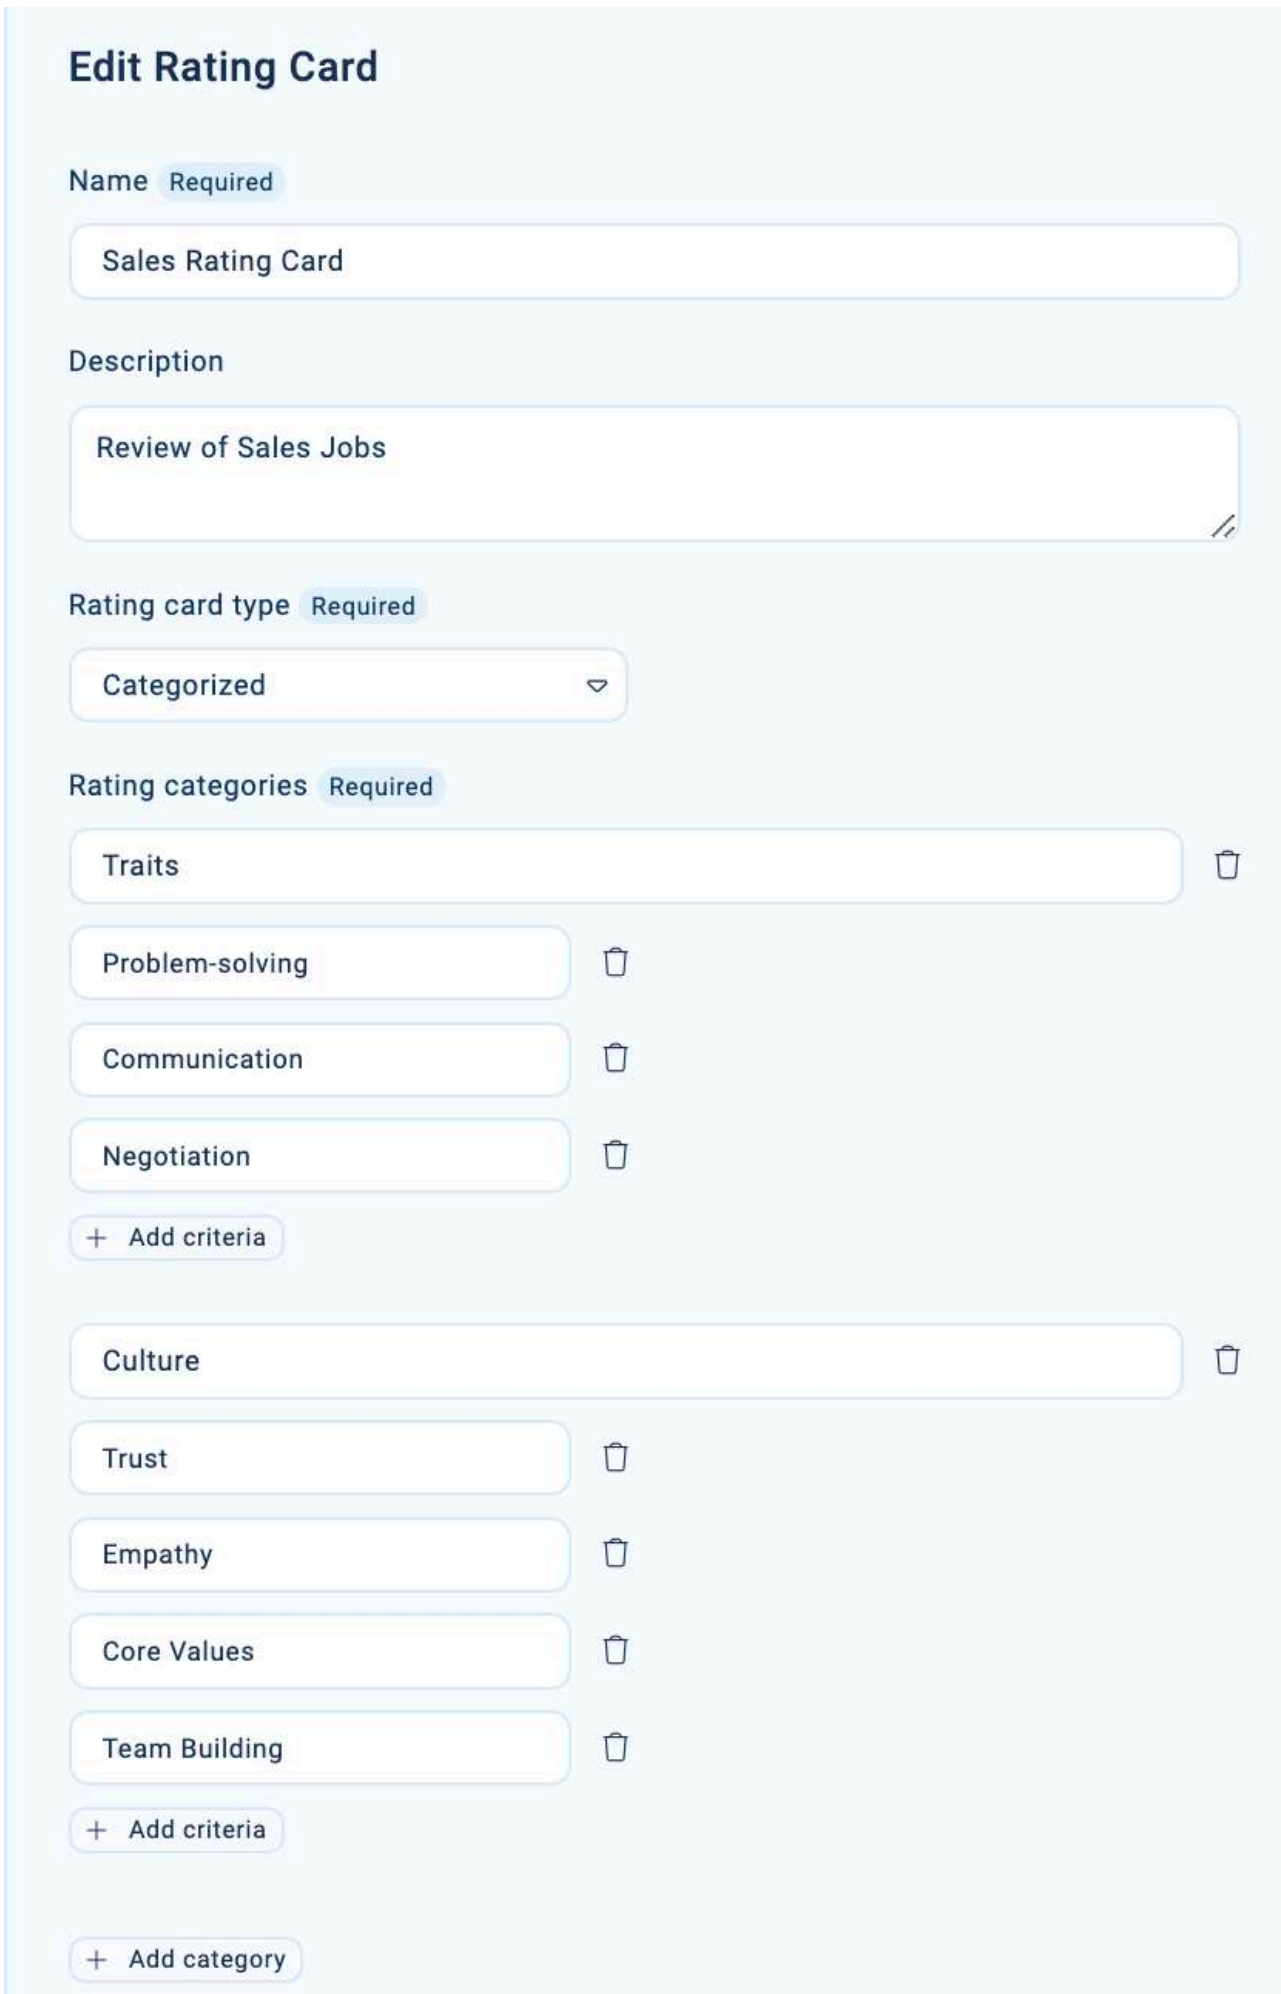

How Rating Cards Work

Each Rating Card uses a five-star system ★★★★★. You can see how each team member rates a candidate and view an overall average for quick insights into everyone's confidence level on each person.

Adding Specifics with Rating Categories

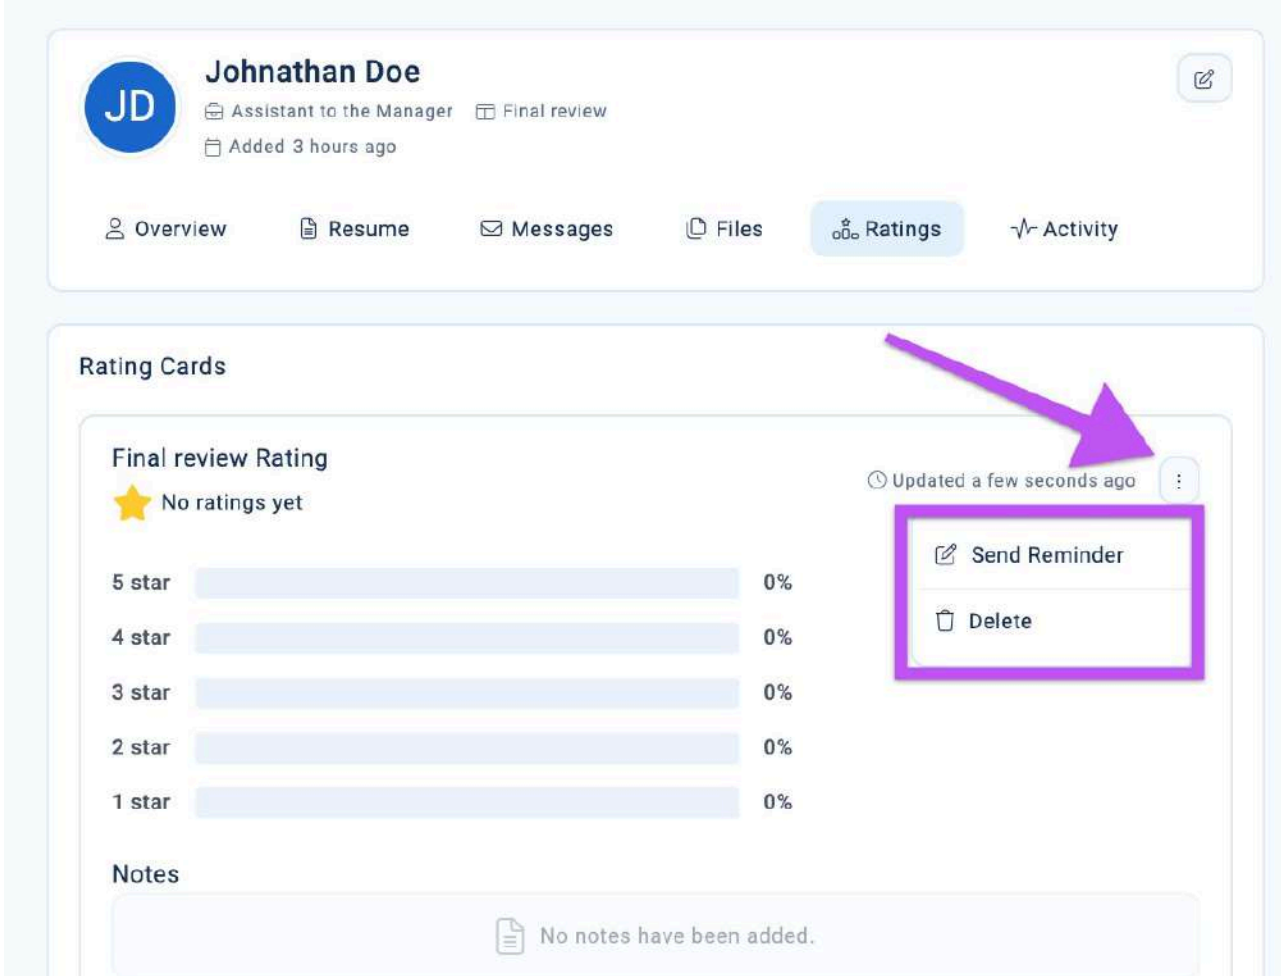

Looking for more specific feedback? Create custom Rating Categories! For instance, you might set up a “Culture” category that breaks down into criteria like Team Fit, Values, Company Mission, and Motivation. This way, you’re collecting focused feedback that aligns perfectly with your company's priorities.

Creating Custom Rating Cards

Sending Feedback Reminders

If feedback is running a bit behind, use the ‘send reminder’ option for a gentle nudge 🕒 to keep things on track!

Auto-Advance and Disqualify Movement with Rating Thresholds

Updated over 3 months ago

Let Megan handle the heavy lifting with auto-advance and auto-disqualify rating thresholds.

The **Review Stage** is where your hiring team takes the lead, shifting from Megan's AI-driven insights to team-driven evaluation. Instead of Megan making the call, this stage allows your team to assess candidates based on custom criteria.

You can create a **custom rating card** with specific evaluation points, ensuring a structured review process.

As candidates enter this stage, team members provide detailed feedback, helping to refine decisions.

Auto-disqualify rating threshold

Choose a rating threshold to automatically disqualify candidates.

Select

Take no action

1 star or higher

2 stars or higher

3 stars or higher

4 stars or higher

5 stars

Save Stage

Once feedback is collected, you can choose to manually move candidates forward or set up **automatic advancement or disqualification** based on the team's ratings, keeping the process efficient and objective.

- Auto-advance:** Set a rating threshold, and anyone who hits or exceeds it will automatically move to the next stage. ➡
- Auto-disqualify:** If a candidate doesn't meet the cut, set a threshold to automatically disqualify them, saving you time and effort. ❌

It's a quick and easy way to keep things moving and focus on the candidates who truly stand out. ✨

Get To Know Megan

Updated over 3 months ago

When we set out to build **Mega**, we knew one thing for sure—we wanted it to be an **AI-first platform** from the very start.

But what does that actually mean? Well, for us, it means that every feature we build is designed for Megan, our AI, to use first. Once she’s got it down, we then expand it for you to use in even more ways.

Megan’s Superpower: Total Recall

One of the coolest things about Megan is that she has a perfect memory — fully organized. She remembers everything that’s been added, so if you ever need to reference something, just ask her!
Whether it's:

Company Details – Ensuring Megan understands the ideal candidate profile based on your organization's needs.

Interviews – Quickly retrieving insights and candidate responses without manual searches.

Hiring history, scheduling details, and more – Providing instant access to past records, so you always have the information you need at your fingertips.

How Megan Works With You

Megan seamlessly integrates into your hiring process in two powerful ways:

Built Into Your Workflow

When setting up a position, you can **enable Megan** to handle tasks like:

- [AI Screening and Guidance](#) for managing your applicants
- [Scheduling](#) interviews
- [Note-Taking](#) so you can focus on the conversation

All while you make the important hiring decisions!

On-Demand Help When You Need It

Need something specific for candidates or jobs? Just click the **Megan icon** or go to a candidate’s profile to ask her anything. She’s here to help—no extra meetings or manual digging required.

So go ahead, let Megan do the heavy lifting while you focus on hiring the best talent!

Working With Megan

Updated over 3 months ago

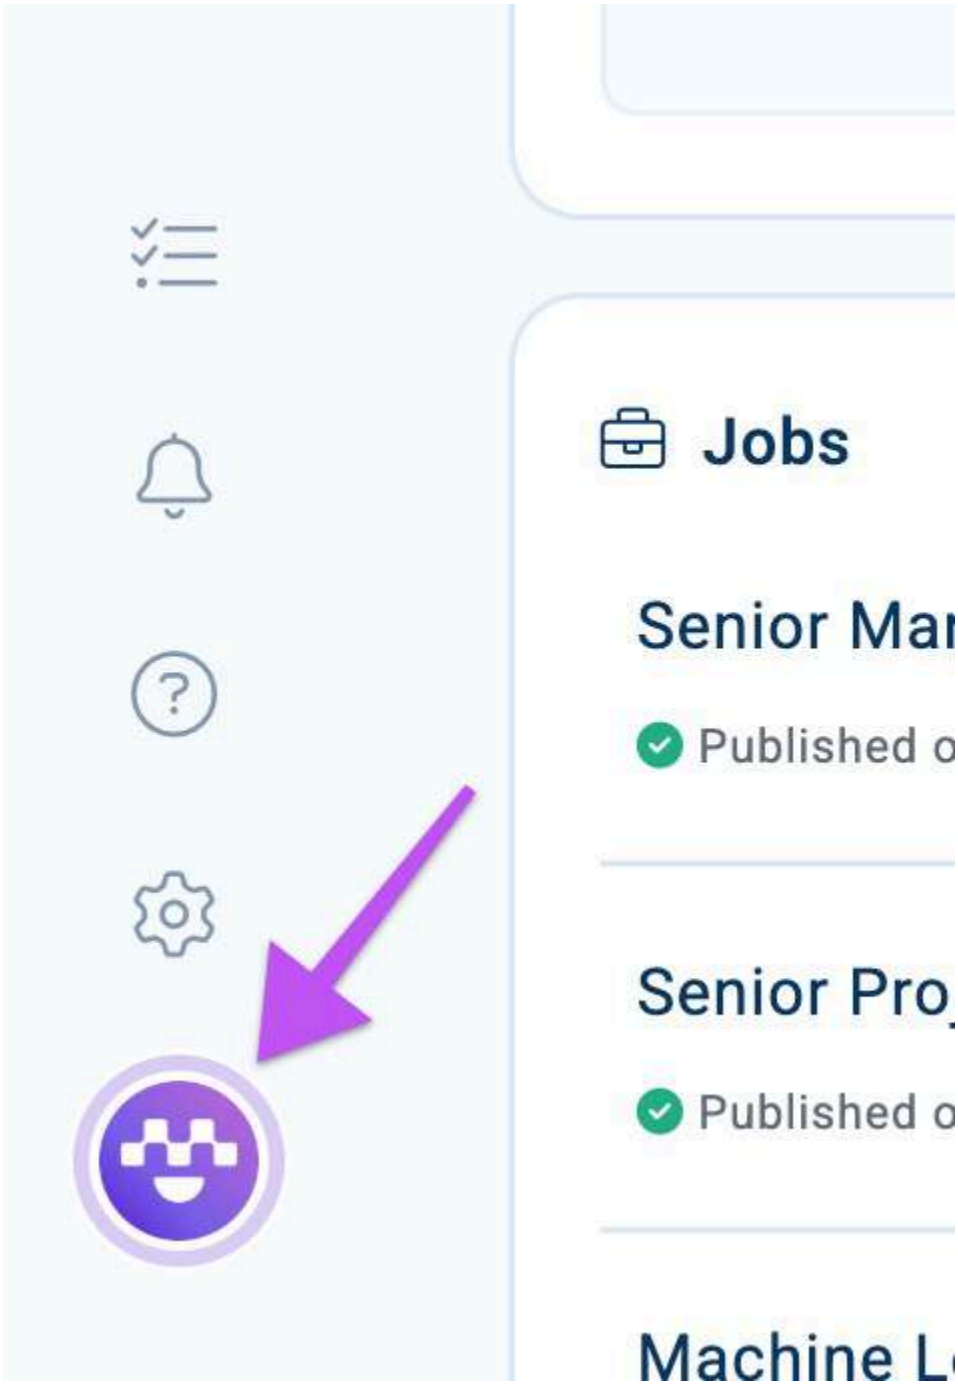

Megan is **fully integrated** into your Mega account, making her your **go-to AI assistant** whenever you need her. Here's where you can find her and how to make the most of her superpowers! 🧙‍♀️✨

Where to Find Megan

The Megan Icon

You'll always find Megan hanging out in the bottom left corner of every page in Mega. No matter where you are in the app, she's just a click away!

**Working through the Megan icon is available for Admins and Mega Admins*

What you can do here:

- See all your past conversations with Megan 📄
- Start a brand-new request whenever you need 💡

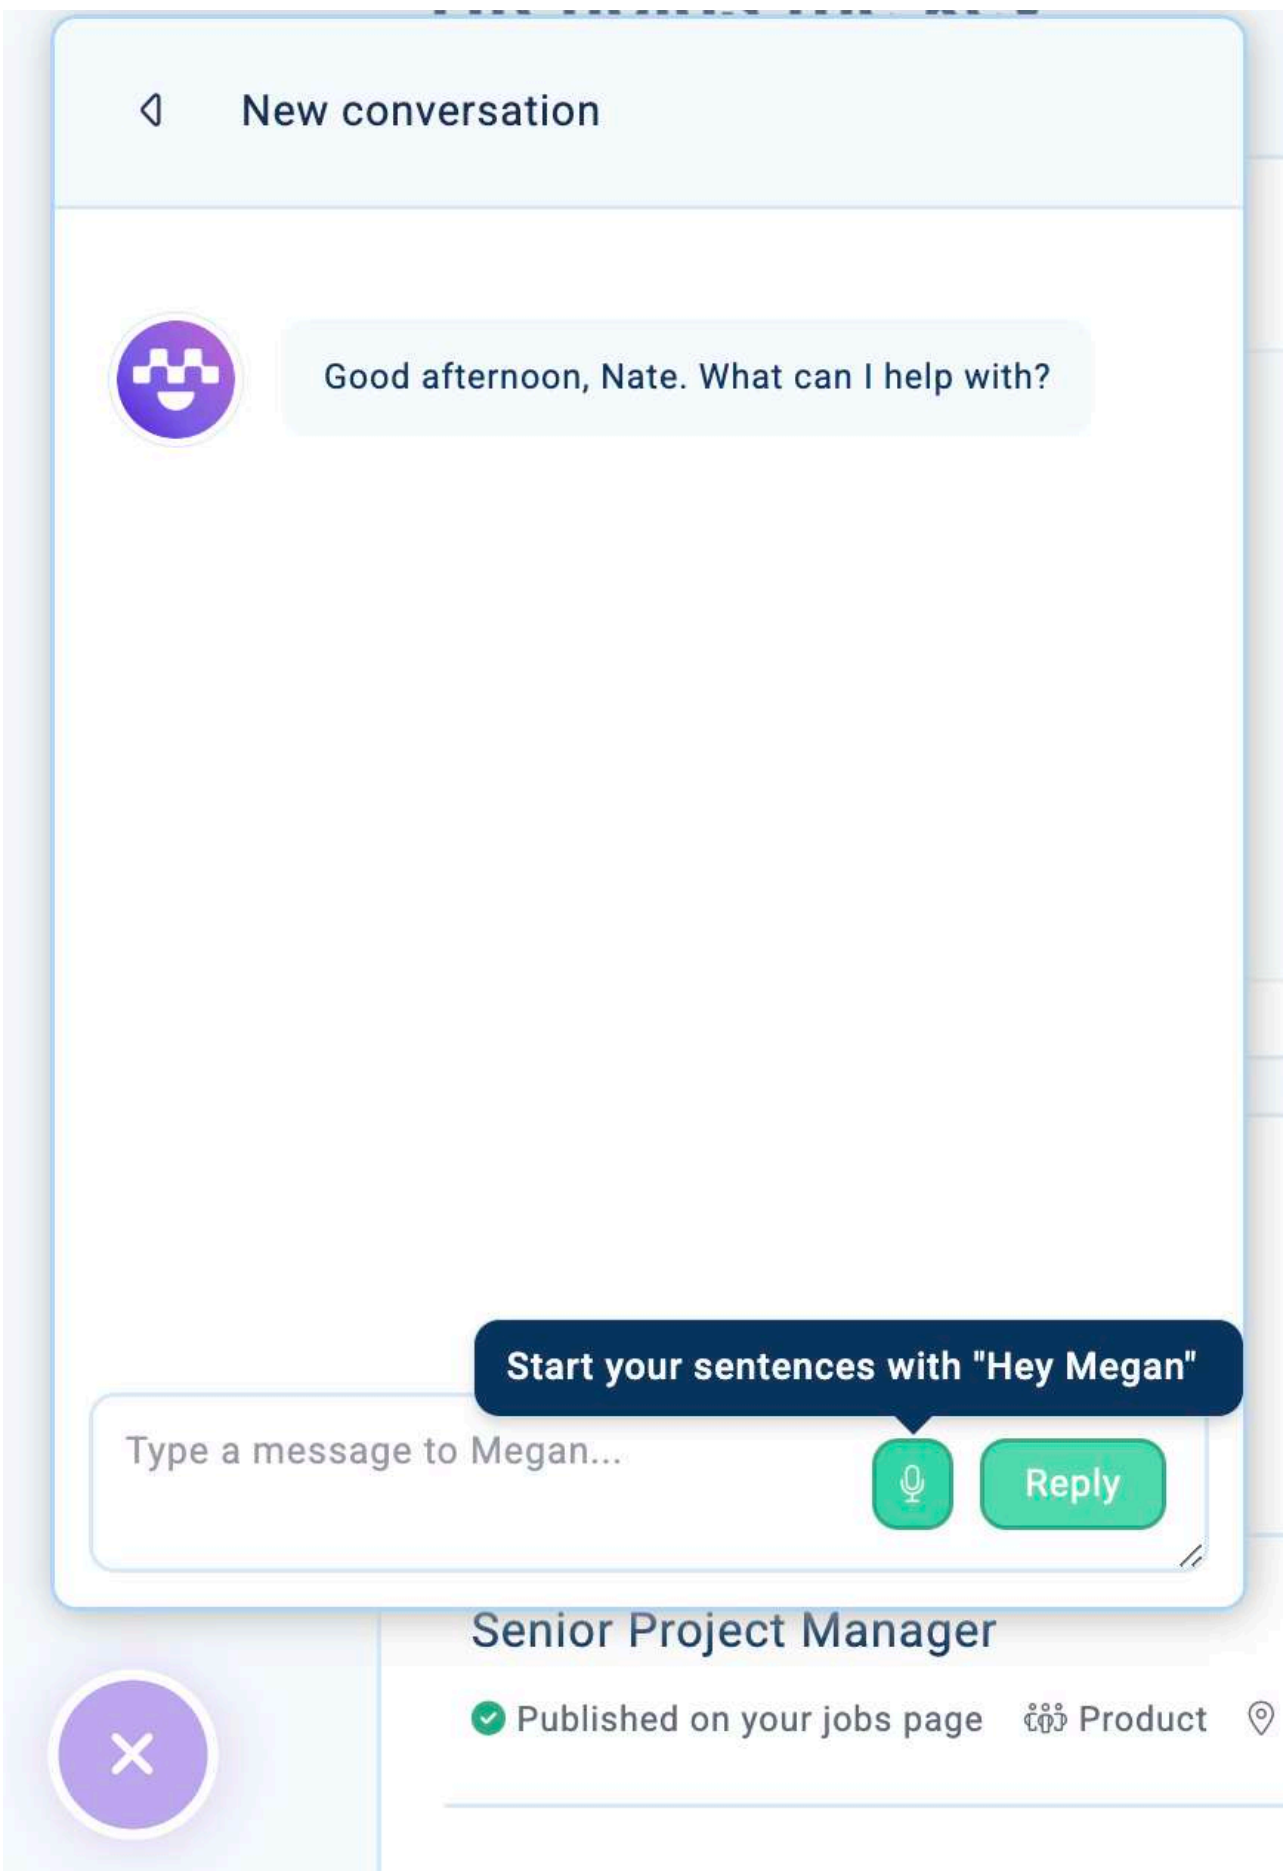

Talking to Megan: Chat or Speak!

You can type out your request or even talk to Megan like you would with a coworker!

How to use voice commands:

When you open the chat window, you'll see a **microphone icon** next to the reply button. Click it to enable your mic and chat with Megan hands-free.

To start a conversation with Megan, simply say **"Hey Megan."**

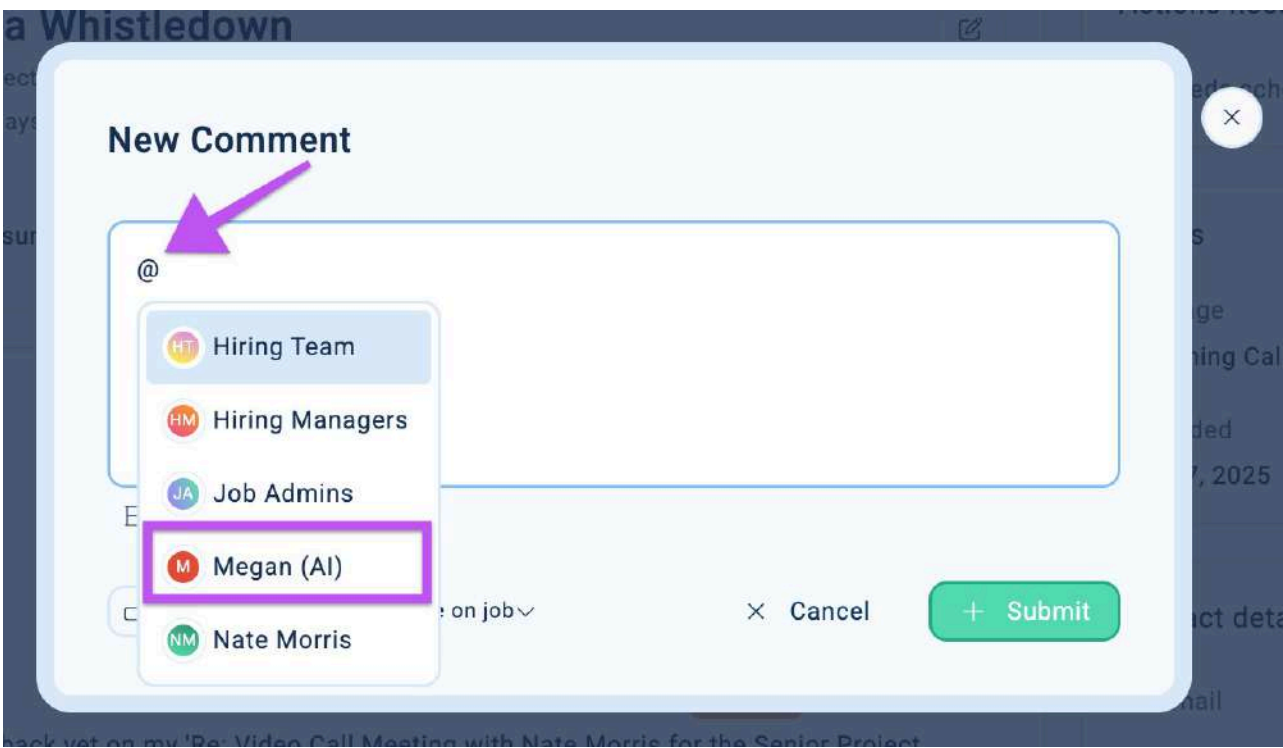

Working with Megan on a Candidate

Want Megan to help with a specific candidate? You got it! Go to the candidate's activity section (where all notes & actions live).

Click **"+ Add Comment"** to open a text window.

Use the @-mention followed to find Megan and start your request, and she'll jump into action!

Pro Tip: Use this to ask Megan for insights, notes, or even quick summaries of a candidate's history!

No matter where you are in Mega, Megan is always ready to assist. So go ahead—chat, type, or talk—she's here to make hiring easier!

AI Note-Taking

Updated over 3 months ago

AI note-taking is super useful for video calls. When enabled, Megan will join the call automatically and transcribe everything for you. After the call, she'll give you a detailed summary and list any action items that came up. 📝✍️

The best part? Megan remembers everything she transcribes. So, if you ever need to refer back to something, just ask her, and she'll have all the info ready to go. 💡

To enable AI note-taking, just go to your job settings and edit the workflow. ⚙️

If you're in a "Interview" stage type, you can set the meeting details as a video interview template, and that's when you can turn on the 'AI Note-taking.'

Create Meeting Templates

That's it! Once you've got AI note-taking set up, Megan will make sure you never miss a detail from your video calls. If you have any questions or need help with the setup, don't hesitate to reach out!

Configuring Megan

Updated over 3 months ago

Megan is ready to assist right out of the [digital] box, but with a few simple steps, you can maximize her effectiveness in every situation. Here's how to set her up for success:

Connect Your Calendar for AI Scheduling

For Megan to handle all the scheduling back and forth—saving you and your team valuable time—make sure to:

- Connect your calendar to Mega.
- Enable AI Scheduling on your interview stages.

This allows Megan to seamlessly coordinate interviews, follow-ups, and availability with both candidates and your hiring team.

Team & Candidate Communication

Megan can engage with candidates throughout the entire hiring process. To ensure these interactions align with your company's tone and expectations, customize how Megan represents your business when interacting with:

- Candidates** – Ensure a smooth, professional, and informative experience.
- Team Members** – Tailor Megan's responses to fit your internal communication style.

Business Details

Fine-tune how Megan generates content and communicates by adding key business details such as your company overview, core values, mission, and vision.

Defining who you are, what you do, and what matters most to your organization ensures that Megan accurately represents your company in conversations.

AI Guidance for Smarter Candidate Insights

Megan can assess resumes and custom questions, aligning them with the job description and key requirements. You can also:

- Highlight areas not explicitly covered in the job description.
- Ensure Megan double-checks critical factors in candidate evaluations.

This makes candidate screening more efficient and tailored to your hiring priorities.

AI Note-Taking.

With AI Note-Taking enabled, Megan automatically joins video calls, transcribes discussions, summarizes key points, and captures action items, allowing you to focus on the conversation rather than taking notes.

By setting up these features, you'll ensure Megan is fully optimized to support your hiring process; from scheduling to candidate evaluations, conversations, interview summaries, and beyond.

Guidelines for Posting Jobs

Mega makes sure your job posts meet all the job board requirements. Here’s how to ensure your postings get the best results!

Updated over 6 months ago

Writing the perfect job description can feel tricky. You want to give enough info to make people excited to apply, but there are also a few important details you need to include to get it right. We’ve put together some simple guidelines to help make sure your job posts hit the mark.

Before we can promote your jobs or let you email candidates, we need to verify some account details and make sure your job posts follow these rules.

Why Do I Need to Follow These Rules?

As your job posting partner, we want to make sure we’re sharing legit jobs that candidates can trust. It’s not just about being ethical—most job boards also require this info from us.

Company Info Requirements

- **Use your full company name**—no abbreviations.
- We need to be able to verify your company with publicly available info. If we can't, we might ask for more details.
- **Your website should match your company name**—just like when you set up your Mega account.

Job Title Requirements

- Make sure the job title is clear and simple. For example, use "React Developer" instead of "Coding Genius."
- Stick to one job per title, even if you’re hiring multiple people. Use “Accountant” instead of “Accountants.”
- **No caps or crazy punctuation!** Avoid anything that looks spammy like "Hiring NOW!!!"

Location Requirements

- **City, State, and Country** are required. If it’s a remote job, select the Remote option, but still list the head office as the job location. Providing a location makes it easier for job boards to post your listing.
- If you want to post a job in multiple places, create separate listings for each location.

Job Description Requirements

- Include clear details on the role’s duties and requirements. Bonus points if you mention perks and benefits.
- Aim for **at least 700 characters** in your description.
- Don’t add alternative ways to apply (like an email or a website)—these will get declined.
- Avoid language that could come across as discriminatory, like age references ("college students welcome"), gender pronouns ("he" or "she"), or nationality preferences ("We love Americans!").
- Make your description **easy to read** by using headers, bold text, and bullet points. Don’t overuse links or images, as most job boards won’t support them.
- Avoid copy-pasting from Word or similar programs—this can mess up the formatting on job boards.

Need a little help with your description? You can grab a template from our [job description library](#) to get started!

Additional Tips

- If you repost or refresh your jobs too often, job boards might stop accepting them.
- Want your job up for a while? Use paid promotions to boost visibility on job boards.
- Posting directly to the job board first? It might be marked as a duplicate if you try to promote it through Mega later.

FAQs

My job post follows all the rules, but it still won’t go live. Why?

We’ve covered the big reasons job boards reject posts, but this list isn’t exhaustive. We’ll always work with you to help get your post out there, and we’ll let you know if we spot any areas for improvement.

How long does it take for jobs to go live?

Once you activate a job, we review it to make sure it’s optimized for exposure. Then, we send it to the job boards—usually within one business day.

Why isn’t my job showing up on the job boards yet?

It can take up to 24 hours for your job to appear on different job boards. If it’s been longer than that and you haven’t heard from Mega, the job might not meet the job board’s criteria. You can reach out to us and we’ll help you track it down!

Candidate Overview

Updated over 5 months ago

We know reviewing candidates can get overwhelming, so we’ve streamlined things to make it easier for you! Here's how you can manage and edit the different parts of your career page and job applications. 🚀

Candidate Overview: The Big Picture

Right at the top, you’ll find the **Candidate Overview**—it’s your go-to spot for quick details from the candidate's application. We also pull key info from their resume, like **Experience** and **Education**, and organize it into a clean, consistent format. This way, comparing candidates is a walk in the park. ✅

Ratings

Activity

Summary

Seeking Assistant to the Manager role with 5 years of operational and team leadership experience. Excelled as Assistant Manager at Veridian Dynamics, enhancing productivity and customer satisfaction. Skilled in project management, inventory control, and financial analysis; adept at fostering high-performance teams.

Experience

Assistant Manager

Veridian Dynamics 2/2022 - 11/2024

Assistant

Massive Dynamic 6/2019 - 2/2022

Education

Fordham University

2019

Questions / Answers

What makes you the most excited about potentially working here?

I'm really excited about the opportunity to work here because of the company's strong reputation for innovation and its focus on values. From what I've learned about the role, it seems like a great match for my skills and experience, and I'm eager to contribute.

Summary: Let Candidates Shine

Want candidates to tell their story? Make sure the **Cover Letter** option is turned on in your job's **Application Form settings**. This lets them share why they’re perfect for the role and gives you a better idea of their personality and background.

Summary

Seeking Assistant to the Manager role with 5 years of operational and team leadership experience. Excelled as Assistant Manager at Veridian Dynamics, enhancing productivity and customer satisfaction. Skilled in project management, inventory control, and financial analysis; adept at fostering high-performance teams.

Experience: Work History, Simplified

Resumes come in all shapes and styles, but that can get tricky to sort through. Don't worry —we’ve got your back! We extract work experience straight from the resume and display it in a standardized format so you can review it quickly and confidently. 🚀

Experience

View Candidate Resume

Updated over 6 months ago

Want to dive into a candidate’s story? Viewing resumes is simple, but we’ve got some awesome features to help you do it *your way*. Here’s the breakdown:

Panel View

Got a multi-page resume? Click the **Panel** icon to see thumbnail previews of each page. Scroll through them easily to find exactly what you need.

View Controls

Choose how you want to view the resume:

- Continuous page?
- Rotate pages?
- View multiple pages at once?

You’re in control, so make it comfy for your review process—maybe even grab some popcorn while you’re at it!

Zoom

No squinting here! Zoom in or out with preset options, or use manual zoom to focus on specific sections of the resume. Just point your cursor and get a closer look at those standout candidates.

Pan

Zoomed in a bit too much? Use the **Pan** tool to click and drag your way around the resume. Easy peasy.

Search

Hunting for specific keywords? Use the **Search** feature to zero in on them.
Pro Tip: If the search doesn’t work, it might be because the resume is an image (like a scanned PDF) and doesn’t have selectable text.

Settings

We’ve packed all the essentials into **Settings**:

- Download or print the resume.
- Switch to dark mode.
- Go full screen for a distraction-free review.

Messaging With Candidates

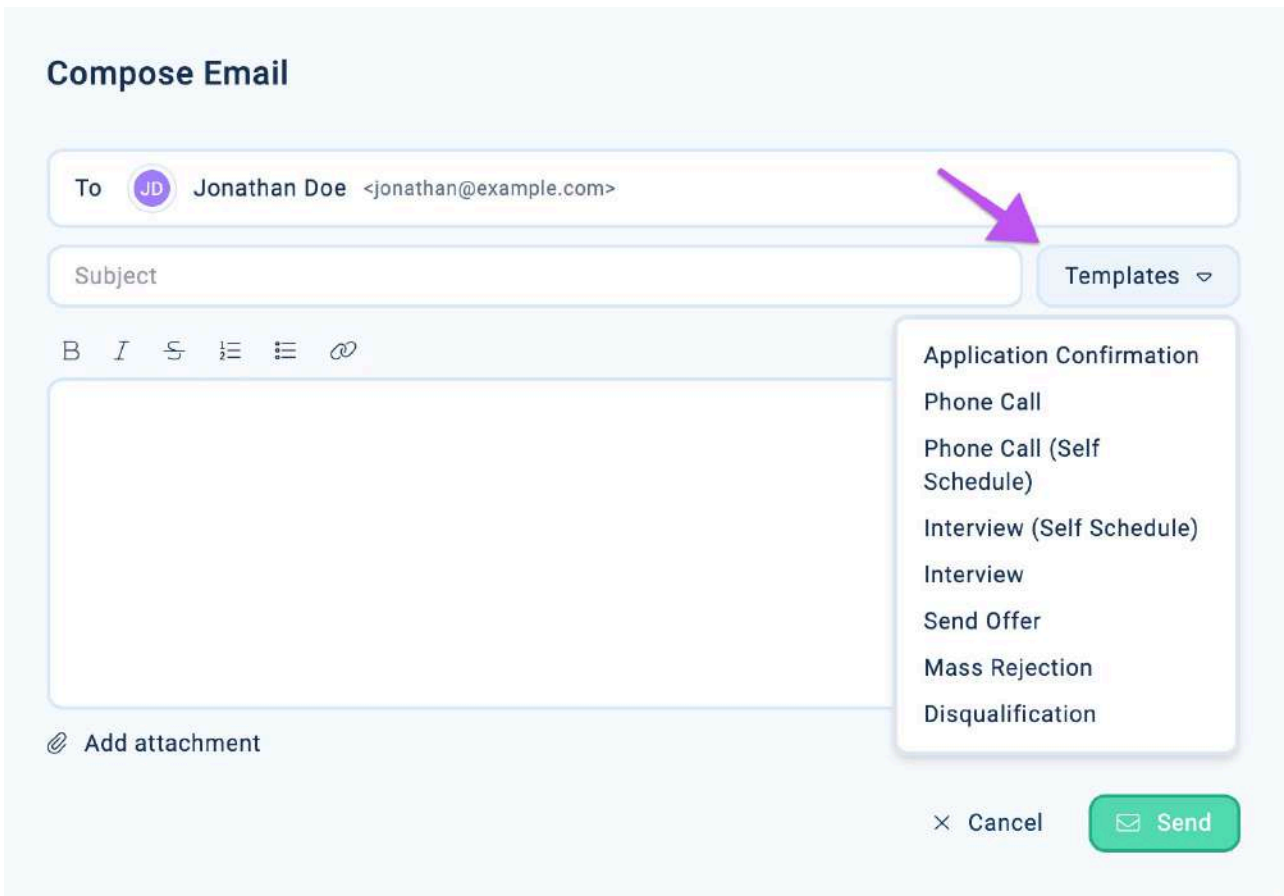

Updated over 2 months ago

When you're ready to dive into a candidate's background—like their skills or experience—you can start a conversation right in Mega. Hiring Managers can send emails directly to candidates and see the full chat history with the team. This keeps everyone on the same page!

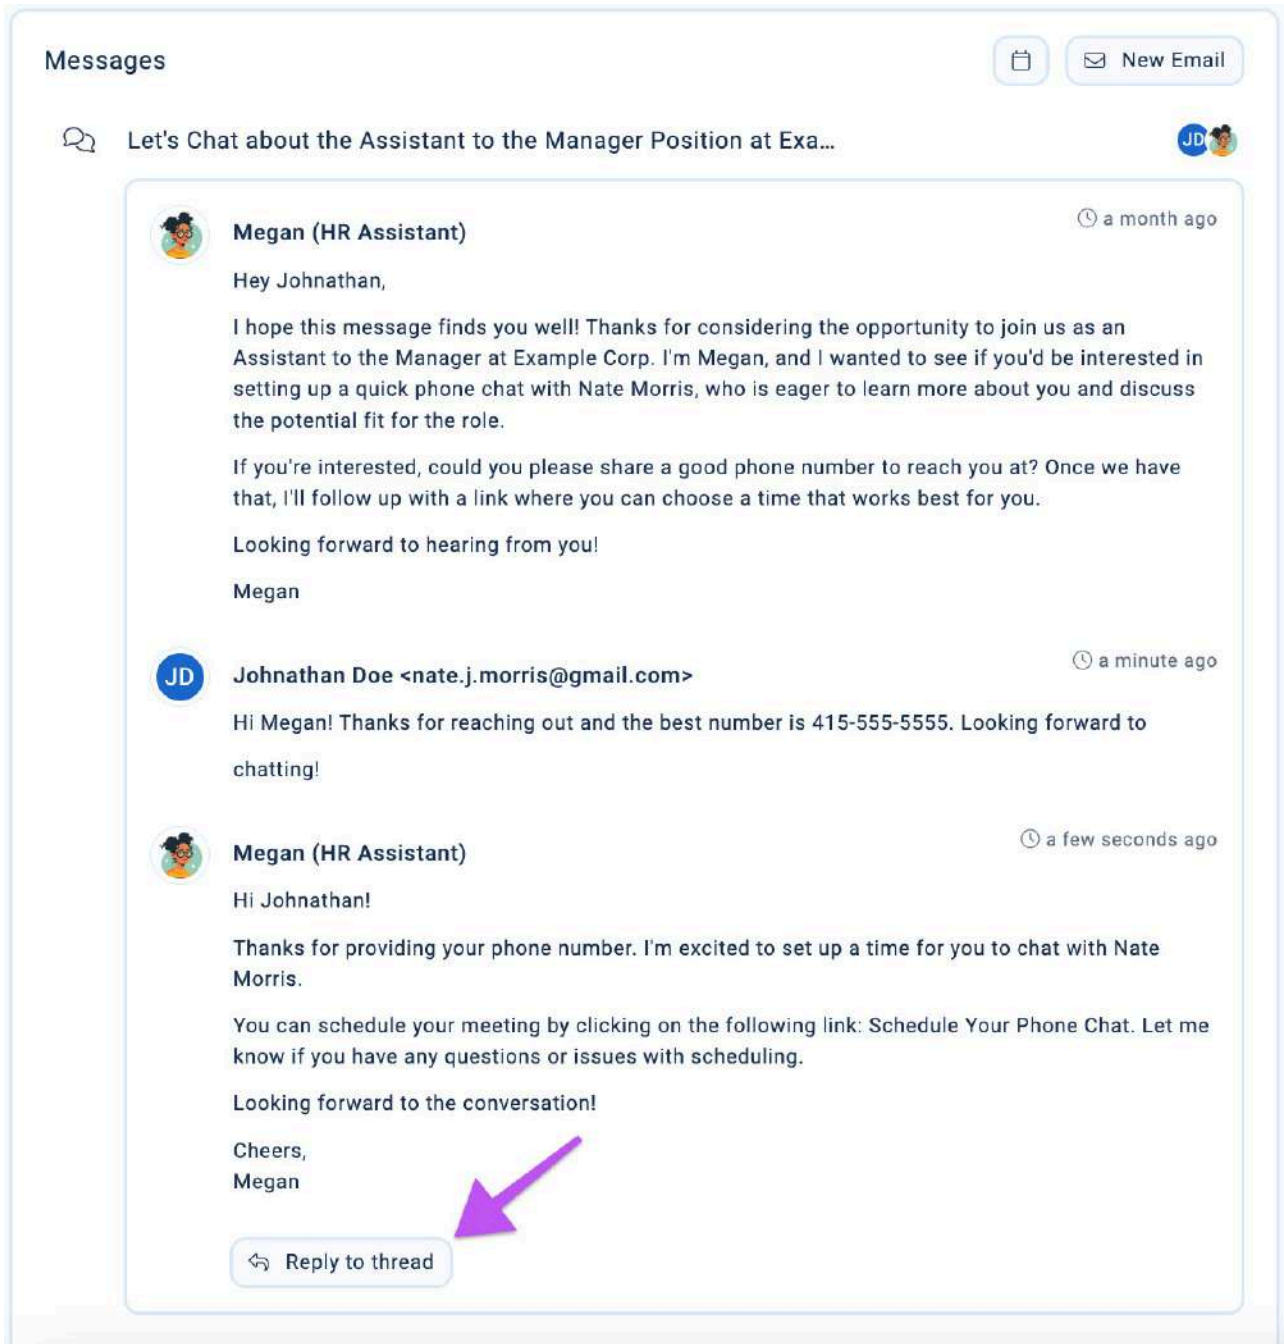

How to Send a Message

Want to reach out? Just click the **New Email** button. From there, it's just like writing an email from your regular email account. You can even attach files or use a handy template (if you or your team have set any up) to save some time.

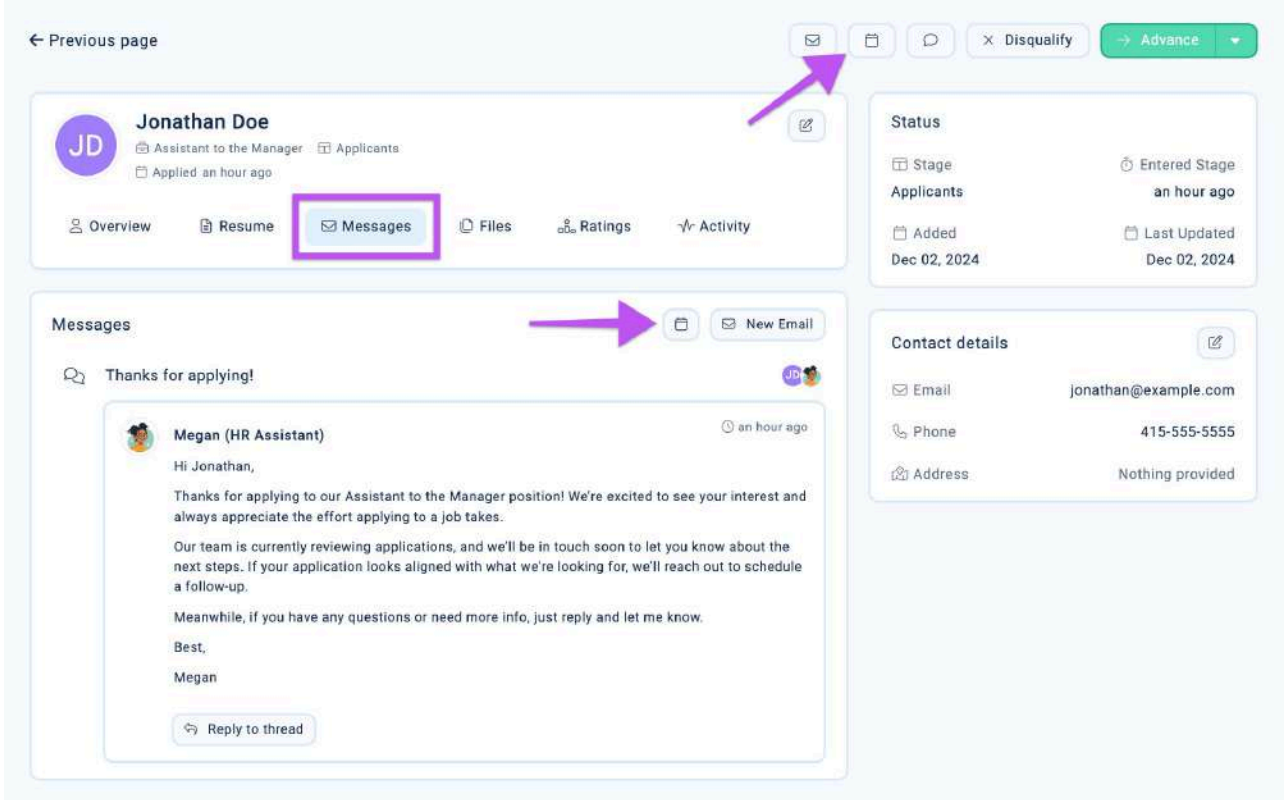

How to Reply

Scrolling through messages? Pick the thread you want to reply to and make sure your response lands in the right spot. Easy peasy! ✓

How to Schedule a Meeting

[Need to set up a quick interview?](#) Click the calendar button in the **Messages** section. This will open your scheduler, where you can create a meeting for you, the candidate, and anyone else who needs to join. Pro tip: Connect your calendar to Mega, so video call links get added automatically.

Accessing Candidate Files

Updated over 6 months ago

Got more than just resumes and cover letters? No problem! The **Files & Attachments** section is your go-to spot for everything else—work samples, portfolios, tests, or any other documents you need. It's all neatly stored in one place, so you're always organized.

What You Should Know

- **Candidate-Uploaded Files:** Anything the candidate uploads during their application sticks with their profile—these files can't be removed.
- **Adding Files:** Want to add more documents? Just click the **+ Upload Files** button to upload anything relevant.
- **Removing Files:** Changed your mind about a file you added? Simply hit the **X** next to the file name to delete it.

It's that easy! Keep everything you need at your fingertips while managing candidate profiles like a pro.

Rating Candidates

Updated over 6 months ago

Learn how to find, review, and complete Rating Cards, making it super easy for your team to collaborate on hiring your next star employee. ⭐

Why Rating Candidates Matters

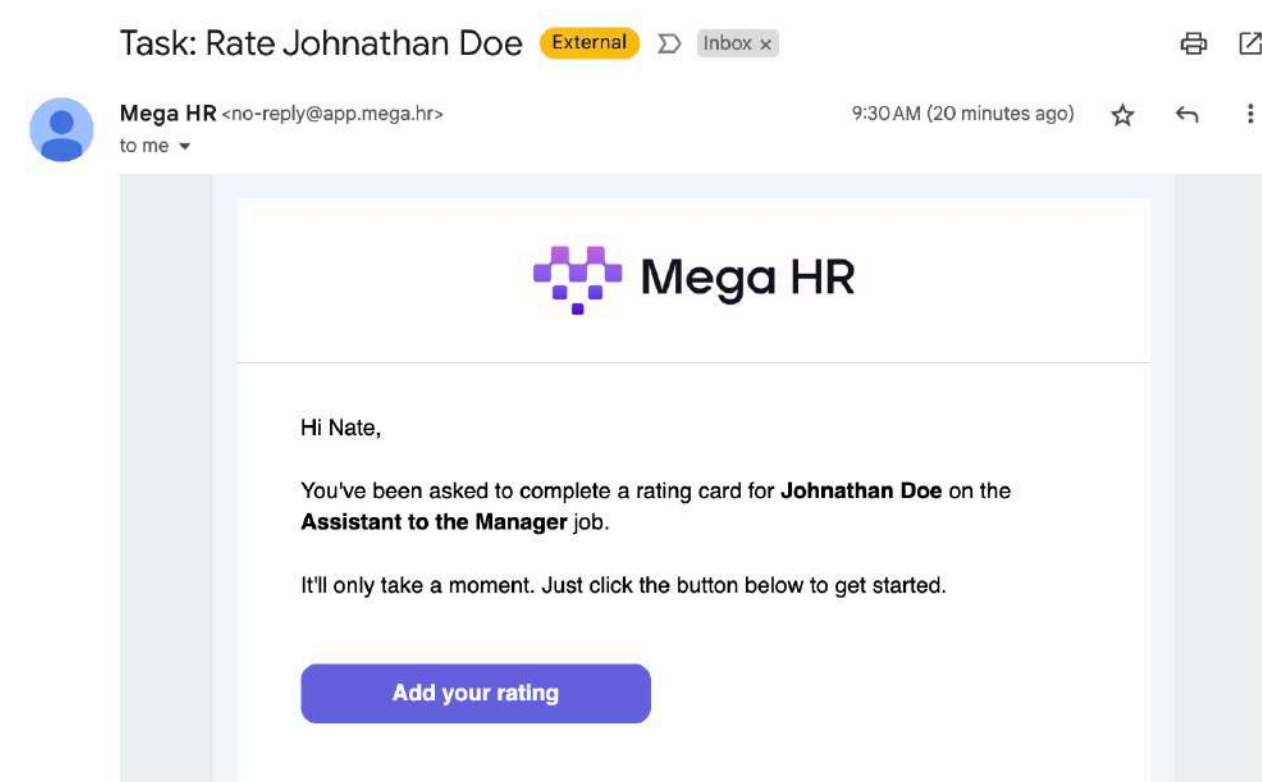

Getting your team's input on potential hires is a big deal. 🗨️ Ratings let everyone weigh in fairly while diving into specifics like skills or culture fit. It's a simple way to organize thoughts and make confident hiring decisions.

Finding Rating Cards

When it's time to share your thoughts on a candidate, we'll make sure you're in the loop with multiple notifications. 📧 Here's where to find them:

1. Email

You'll get an email when a Rating Card is ready for you. It'll include all the details and a button that takes you straight to the candidate's profile to leave your feedback.

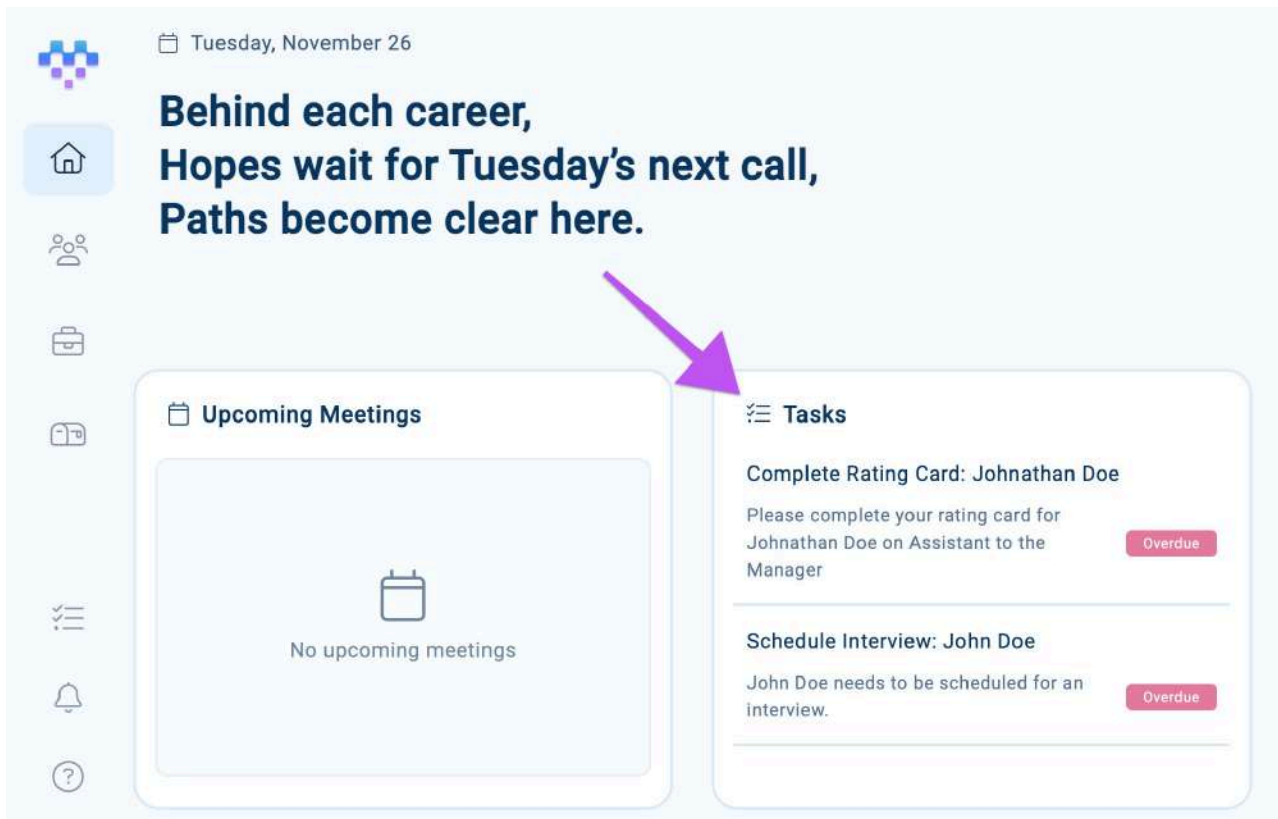

⚡ **Pro Tip:** Forgot about it? No worries—you'll get a reminder so nothing slips through the cracks!

2. Home Page & Tasks

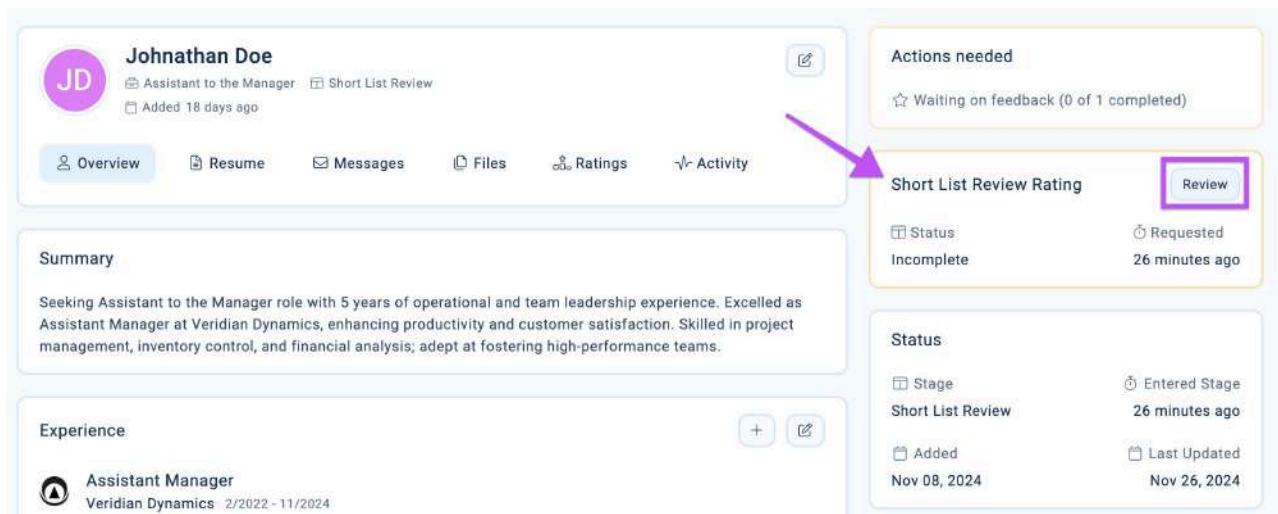

Log into your **Mega** account, and right on your home page, you'll see a list of tasks waiting for you, including any pending Rating Cards. 📋

Want a more focused view? Check out the **Tasks** section on the left-hand menu. This gives you a clean list of everything you need to get done. ✅ Just click on a task, and you'll jump right into the candidate's profile to review and rate.

3. Candidate Profile

Open a candidate's profile, and you'll spot any outstanding Rating Cards on the right-hand side. 👁️ Each card shows its status (e.g., "Incomplete") and how long it's been waiting for your review.

How to Complete a Candidate Rating

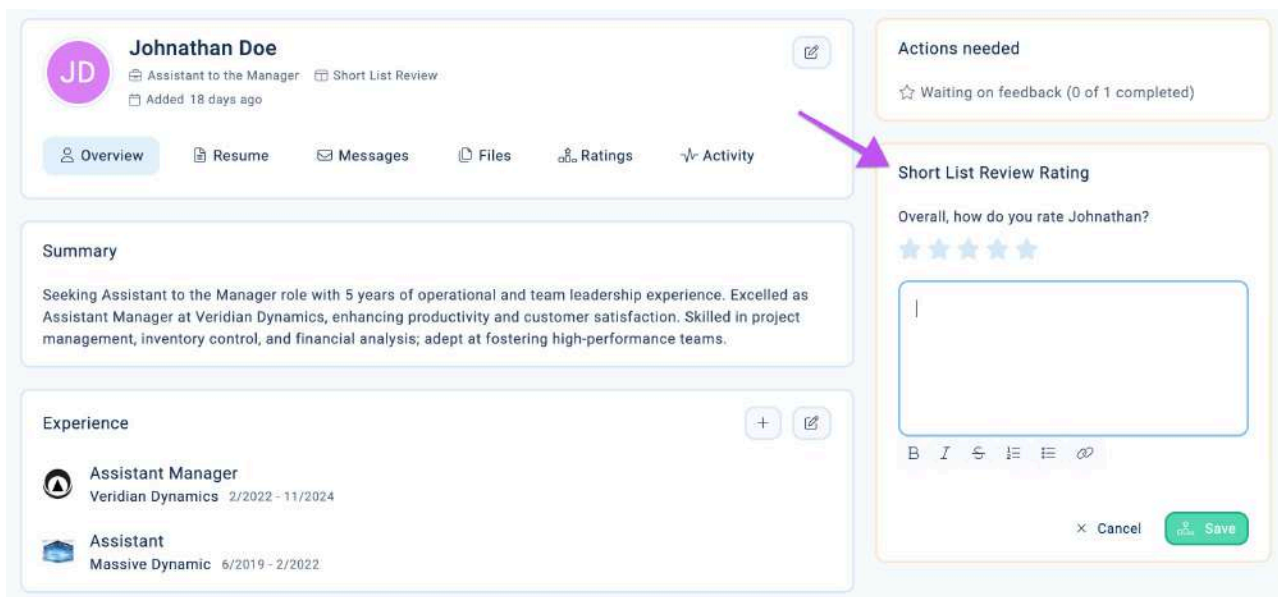

1. Start Your Review

Inside the **Rating** section, click the **'Review'** button. This will open up the full Rating Card, where you can:

- ⭐ Add an overall rating.
- ✍️ Write feedback in the text box.
- 🎯 Score custom categories if they've been added.

2. Save Your Feedback

Once you've filled everything out, hit the **'Save'** button in the bottom-right corner. Your feedback will be locked in and factored into the candidate's profile. ✅

Candidate Activity Feed

Updated over 3 months ago

Got some thoughts, feedback, or maybe sensitive details about a candidate? The **Activity Feed** is your go-to spot for logging those notes. Here's how to do it, step by step:

Adding a Comment

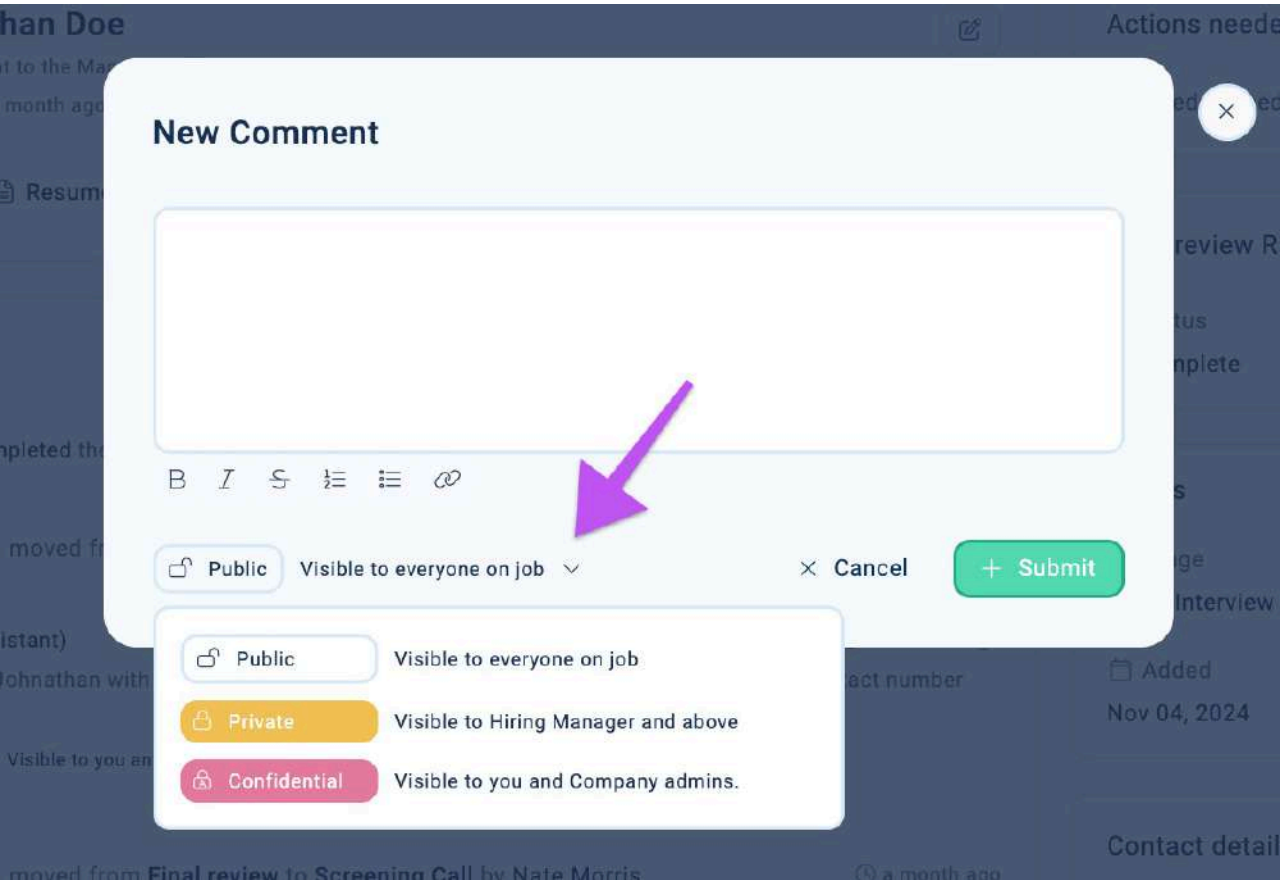

1. Head to the **Activity Feed** on the candidate's profile.
2. Click the **"+ Add Comment"** button in the upper-right corner.
3. A window will pop up—this is where you can type your notes. Want to add some flair or structure? The text editor supports rich text!
4. Before saving, scroll to the bottom of the window to pick who can see your comment by setting the **visibility type**.

Choosing the Right Visibility

Need to share your thoughts with the team or keep certain details under wraps? Here's a quick breakdown of the visibility options:

- **Public:** Everyone involved in the job can see this. Great for general feedback!
- **Private:** Only the Hiring Manager and above have access. Perfect for sensitive but role-specific notes.
- **Confidential:** For your eyes and Company Admins only. Use this for details like salary discussions or other highly sensitive info.

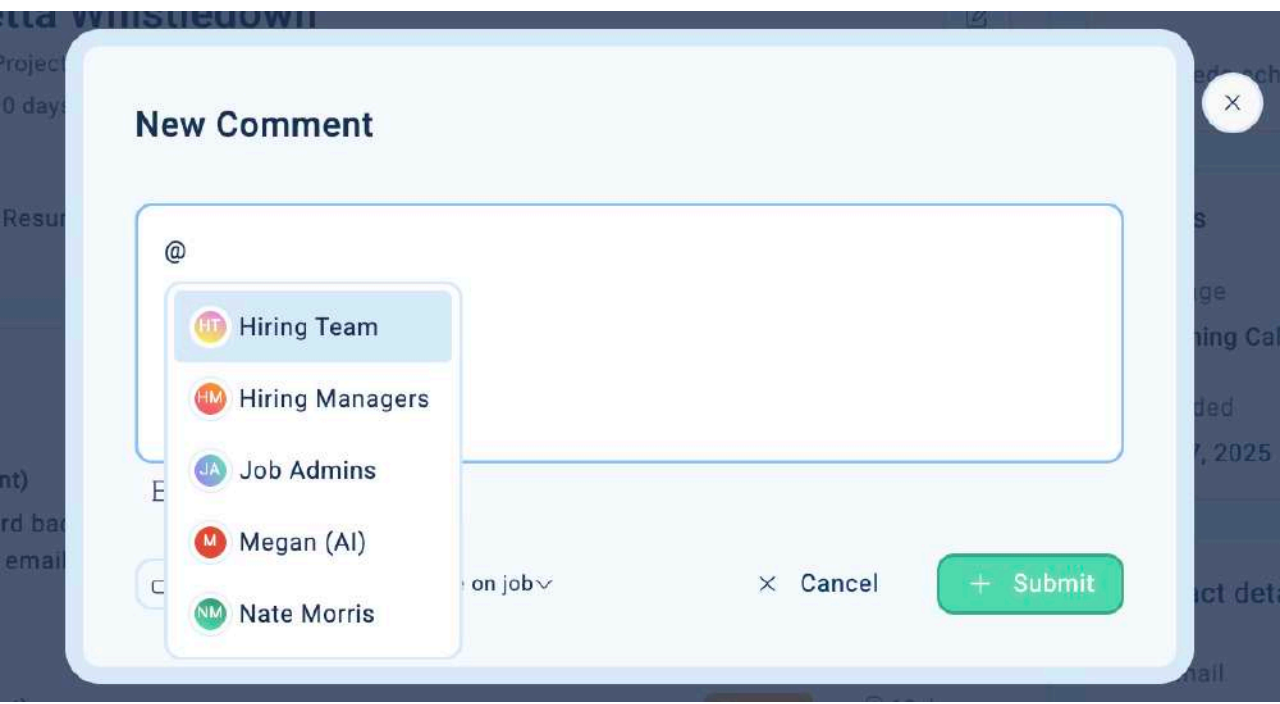

Mentions

You can use @mentions to grab a teammate's attention or give them a shoutout. Want to notify the whole hiring team? Just use @team!

Mention Types

- Hiring Team
- Hiring Managers
- Job Admins
- Megan (AI)
- Individual Team Members

Simply type "@" and select a team member or the entire team from the list. Once you post your message, we'll send an email notification with your note and a link to the candidate's profile.

Pro Tip: Depending on your role, you might not see all comments in the Activity Feed. So don't panic if something looks different on your screen—it's all about keeping things secure and relevant!

Got it? Now you're ready to log and manage your notes like a pro!

2. Click the **"+ Add Comment"** button in the upper-right corner.
3. A window will pop up—this is where you can type your notes. Want to add some flair or structure? The text editor supports rich text!
4. Before saving, scroll to the bottom of the window to pick who can see your comment by setting the **visibility type**.

Choosing the Right Visibility

Need to share your thoughts with the team or keep certain details under wraps? Here's a quick breakdown of the visibility options:

- **Public:** Everyone involved in the job can see this. Great for general feedback!
- **Private:** Only the Hiring Manager and above have access. Perfect for sensitive but role-specific notes.
- **Confidential:** For your eyes and Company Admins only. Use this for details like salary discussions or other highly sensitive info.

Pro Tip: Depending on your role, you might not see all comments in the Activity Feed. So don't panic if something looks different on your screen—it's all about keeping things secure and relevant!

Megan's Decisions and Insights

You can easily access **all of Megan's notes and decisions** in the **Activity Section**. Here, you'll find a complete record of **candidate movements, decisions, and explanations**, giving you full transparency into her thought process.

Need more details? Just **ask Megan directly**, and she'll provide a deeper explanation of her reasoning, ensuring you always have the insights you need.

Got it? Now you're ready to log and manage your notes like a pro!

All Collections > Adding & Managing Jobs > Creating and Editing Job Details

Creating and Editing Job Details

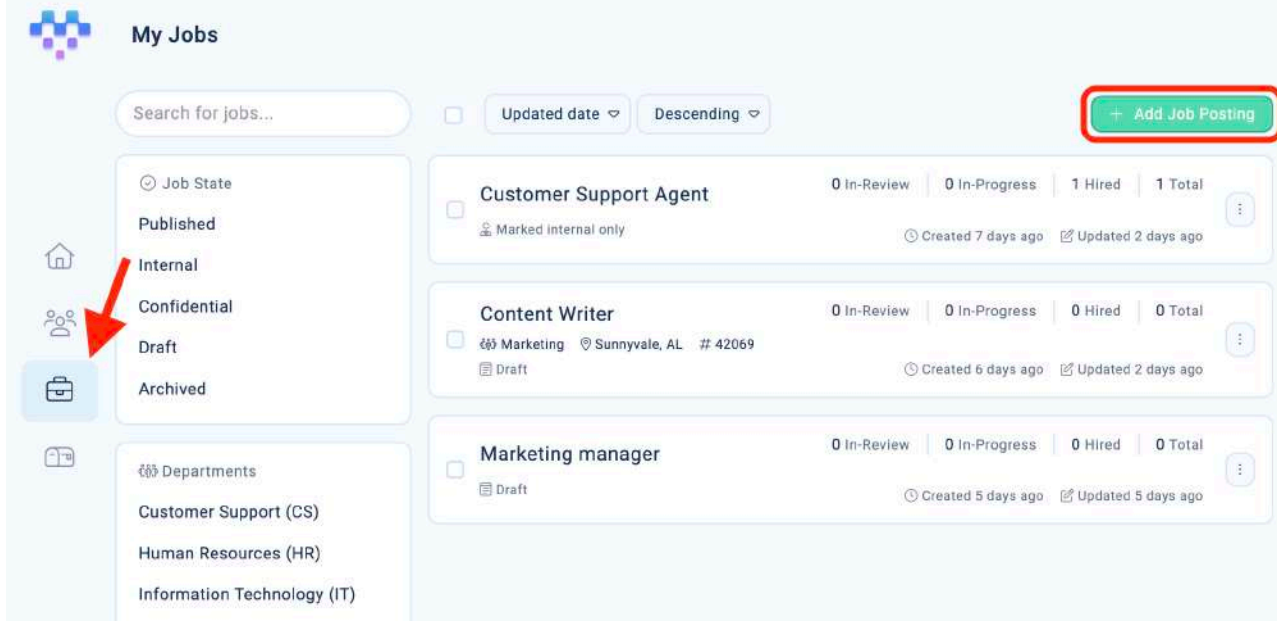

Updated over 6 months ago

The Job Details section is where you lay out all the essential information about your open roles, like duties, qualifications, location, and perks. This is what candidates will check out first to see if they're interested in applying, so make it count! 🚀

How to Create a Job

There are a couple of ways to start creating a job in Mega:

- On your Home page, click the '+ Add Job' button.
- Or, head to the Jobs page and select '+ Add Job Posting'.

Here's everything you can include in the Job Details:

Job title
Required

Assistant to the Manager

Employment type

Full-time

Work type
Required

On-site
Employees work from a company office location

Remote
Employees will only work from home

Hybrid
Employees work from both our office and their home

Job Title

Think of your job title as the headline for the role. It describes the position, function, or a catchy term to market the role. If this is your first time coming up with a job title, make sure it clearly explains what the job is about and what kind of responsibilities it includes.

Employment Type

Choosing the right employment type is a must—it helps your job stand out on our partner job boards. Here are your options:

- Full-time
- Part-time
- Contract
- Internship (Paid)
- Internship (Unpaid)
- Temporary
- Other

Pick the one that best matches your opening!

Work Type

This tells candidates how they'll work and helps find the right match for your team. In today's world, you have three main choices:

- On-site:** Working from the office 🏢
- Remote:** Working from anywhere 🌐
- Hybrid:** A mix of both office and remote 🔄

Job description
Required

H2
H5
B
I
S
List
Link
Image

Generate Description

Job Description

Write out your job description in our rich text editor or paste it from another source. Want a little help getting started? Enter your job title and click 'Generate Description' to let Megan create a draft for you. Easy! ✨

Office location

Where will this job be based? If remote, specify your main office or the one that's most relevant.

Select an office location

Add new location

Street address

e.g. 18144 El Camino Real

Country

City

Select the country

e.g. Sunnyvale

Postal Code

Office Location

Even if the job is remote, give candidates some details about your office location or where you're hiring from. When you select a country, additional fields may show up (some might be required) to ensure our job board partners can connect you with the right candidates.

Once a location is created, it is saved so you can quickly pick it for future use.

Department

Select a department

Job Code

e.g. 42069

Salary Range

Salary from

Salary to

Currency

Select option

Pay Period

Select option

Display salary on Careers page

Department

A department is the part of your company responsible for a specific area, like Sales or Accounting. Adding this helps keep things organized for both candidates and your hiring team. You can always update departments as needed. 📁

Job Code

Assigning a job code to each role helps maintain a clean and organized job framework. Job codes are useful for human resources, talent management, and compensation systems. 🏷️

Salary Range

Listing salary info can attract candidates who might not be actively looking but are open to new opportunities. Plus, sharing salary ranges helps you filter out applicants who aren't a match for the role. 💰

Salaries can be added but not displayed to keep it confidential.

That's it! Take your time filling out each section to create an appealing and informative job posting. Good luck!

Candidate Questions	>

Did this answer your question?

[All Collections](#) > [Adding & Managing Jobs](#) > [Application Form](#)

Application Form

Updated over 3 months ago

When setting up your career page, you get to decide what info you want to gather from candidates. This can include personal and professional details, and you can make each option **Required**, **Optional**, or even turn it to **Disabled**. Keep in mind the candidate's experience—if you're asking for too much upfront, it might feel like a chore to complete the application. 😊

[illegible]

Custom Questions

Want to ask candidates specific questions about their experience, education, or anything else that's important to your company?  You can set up custom questions right in **Recruiting Settings**. This way, you make sure each applicant is the right fit.

Custom Questions

Custom questions are a great way to learn more up front, but create more work for the applicant. Use as few as you can.

✓ Select from available questions

Describe your character in a couple of sentences.

Describe your ideal job.

What are your salary expectations?

What do you listen to, if anything, while you work?

What do you work towards in your free time?

What makes you the most excited about potentially working here?

What motivates you?

What should we absolutely know about you?

What's something outside of your work that you're passionate about?

What's your favorite video game?

Who inspires you in your work and why?

Tip: Custom questions can give you a lot of insight, but remember—they do add more work for the candidate. Keep it simple and only ask what you really need to know. 😊

Selecting a Candidate Workflow

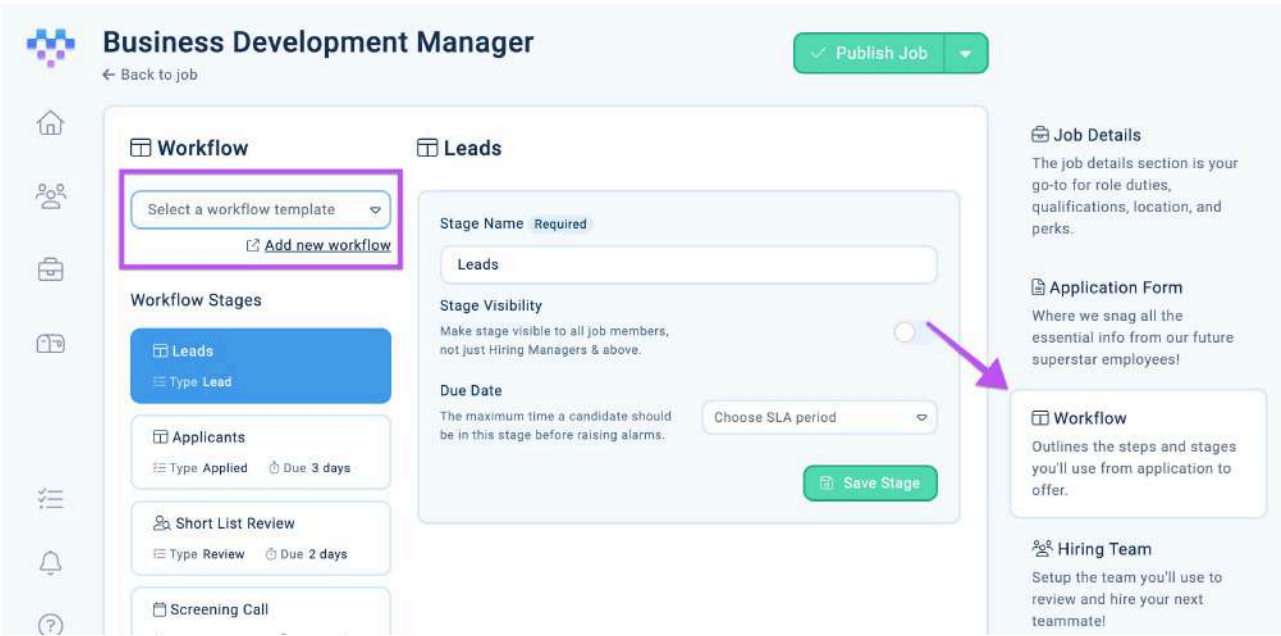

Updated over 5 months ago

Workflows are the roadmap for your hiring process. They guide a candidate's journey from start to finish, showing what needs to happen to qualify, review, and find the best fit for the role.

Start from My Jobs: Head to the "My Jobs" page. Look for the three little dots : next to the job title you're working on—click there to open up job details.

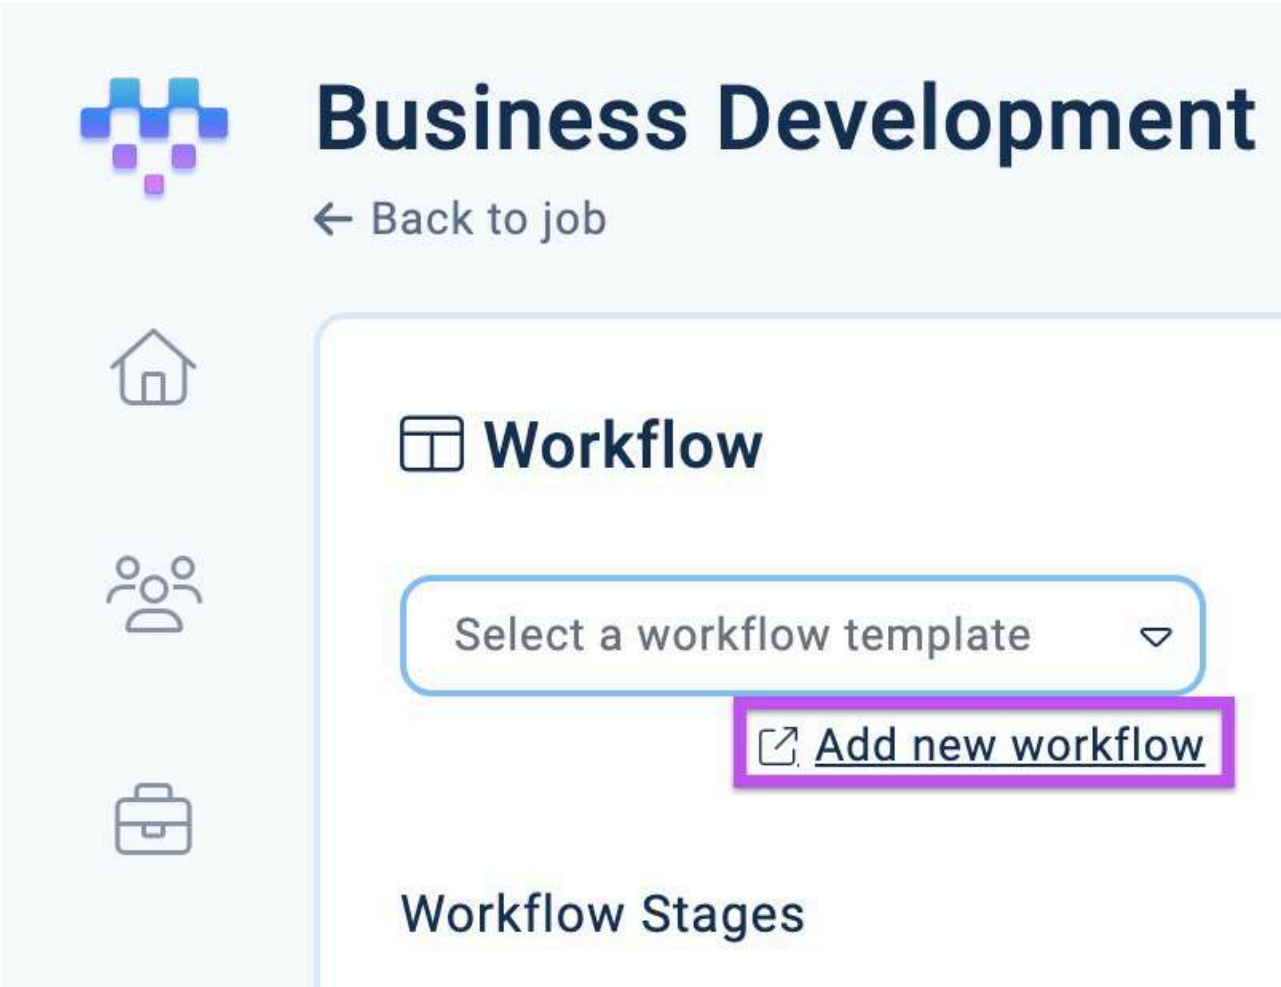

Select a Workflow: In the job settings, look for the **Workflow** section on the right-hand side. You'll see the default workflow here, and you can either switch to another one or create a brand-new workflow.

Adding or Editing Workflow Stages

Need to customize, add steps, or create a new workflow? Click on the 'Add new workflow' link just below the drop down to build or adjust your workflow.

Setting Up Your Workflow

Once you choose a workflow, you can tweak each stage to match the specifics of the job. Here's what you'll want to check:

- Place your email templates
- Set due dates
- Adjust rating cards
- Assign review and interview teams
- Fine-tune AI screening and scheduling

Pro Tip: Keep It Simple

Make sure your workflow mirrors your hiring process—no extra steps that slow things down. A streamlined process keeps everything running smoothly!

Adding a Hiring Team to a Job

Updated over 6 months ago

Want to add team members to help manage a job posting? Here’s how to invite new or existing team members to specific jobs and get them involved.

Start from My Jobs: Head to the "My Jobs" page. Look for the three little dots next to the job title you’re working on—click there to open up job details.

Or, if you’re already in a specific job, you’ll find the invite button in the upper-right corner.

Go to the Hiring Team Section: On the job details page, scroll to the right side of your screen where it says “Hiring Team.” This is where you can add team members and even external recruiters to help with the hiring process.

Choose Their Role:

- **Recruiting Admin:** Gets full access to all job-level features, from managing candidates to publishing jobs and buying ads.
- **Hiring Manager:** Can view private team comments, candidate emails, send offers, and set up interviews.
- **Reviewer:** Can check out candidates, fill in rating cards, and leave internal comments for the team.

Add Members

Available Members

Choose a member to add...

Member role

☐ Recruiting Admin
Access to all job-level features including seeing all candidates, taking actions on candidates, publishing jobs and purchasing job advertisements.

☐ Hiring Manager
Can view private team comments and candidate emails as well as send offers and schedule meetings.

☒ Reviewer
Can only review candidates, complete rating cards and leave internal comments.

Cancel

Add Members

Adding the right team members to each job makes collaboration a walk in the park!

Adding External Recruiters to a Job

Updated over 6 months ago

If you’re working with external recruiters and want them to help source candidates, inviting them is simple. Just go to the **External Recruiters** section.

External recruiters will only see the candidates they've brought in, so the rest of your candidates stay private and secure.

When you’re viewing your job listings, you’ll see three vertical dots : next to each job title. Click on those dots to open the job details. If you’re already looking at a specific job, you’ll find this button in the upper-right corner.

Once you’re in the job details, look for the **Hiring Team** section on the right side. This is where you can add external recruiters to that job. You’ll add in each external recruiter by their email address so they can receive a personal invite and source candidates.

Invite Members

Email addresses

e.g. tucker@email.com, leah@email.com

Member role

External Recruiter

Can only see candidates who they added. They can see actions that have been taken with the candidate, post comments and see comments they're tagged in.

Cancel

Send Invite

Advertising Your Job

Updated over 3 months ago

Mega empowers you to expand your reach and connect with a larger pool of qualified candidates by distributing your job postings to third-party job boards.

With Mega, you have the flexibility to choose between free and premium options, ensuring that your hiring needs are met with the right level of visibility.

Our premium options are designed to give your postings maximum exposure, helping you stand out and attract the top talent your team deserves.

Free Job Boards

By default, Mega will send your [approved job postings](#) to all the major free job boards. You don't have to lift a finger! 🙌 These boards often share your listings even further, helping your job reach a wider audience.

Premium Job Boards

Want to cast an even wider net or target a specific group of candidates? Premium postings are an excellent way to attract highly targeted candidates and fill your inbound funnel efficiently. Whether you're hiring for a software engineer, a salesperson, remote, or local, Mega provides tailored premium options designed to help you connect with your ideal candidates faster. You can enable premium job boards in your settings to increase visibility and reach a more focused audience.

Assistant to the Manager

 Back to job

 Job Advertising

Advertising your job on the right platforms greatly increases your chances of finding the right candidate, sooner.

All Collections > Working With Candidates > Running Background Checks

Running Background Checks

Updated over 2 months ago

Mega and [Certi](#) make background screening super easy. You can run a background check directly from a candidate's profile or let Megan handle it for you.

Setting Up Background Checks

Good news: There's zero setup required! We've already taken care of the integration, so you can start running background checks right away.

Adding Background Checks to Your Workflow

Want to add background checks to your hiring process? Easy! Head over to [Recruiting Settings](#) and pick the workflow where you want to add them.

⚠ Heads up: Any changes to a workflow only apply to new jobs created with that workflow. Existing jobs won't be affected.

The screenshot shows a workflow editor with two stages: 'Review' and 'Offer'. The 'Background Check' stage is being configured. It has a 'Stage Name' of 'Background Check', a 'Stage Type' of 'Background Check', and a 'Due Date' of '5 days'. The 'Stage Visibility' is set to 'Visible to all job members'. There are 'Save Changes' and 'Cancel' buttons at the bottom.

Now, inside your workflow, click the "+" button between the stages where you want to insert a background check. Give the stage a name (get creative or keep it simple!) and select **"Background Check"** from the Stage Type dropdown.

Adding Background Checks to Your Jobs

Now that your workflow includes a background check stage, all new jobs using that workflow will have it built in. In **Job Settings**, you can:

- Decide if Megan should send them automatically or if you want to handle them manually.
- Choose the type of background check(s) to send.

The screenshot shows the 'Senior Accountant' job settings. The 'Background Check' section is highlighted with a purple box. It shows the 'Stage Name' as 'Background Check', the 'Stage Visibility' as 'State stage visible to all job members, not just Hiring Managers & above.', and the 'Due Date' as '5 days'. The 'AI Background Check' section is also visible, with a 'Save Stage' button at the bottom.

Selecting Background Checks to Send

When enabling background checks for jobs, you can select one or more of these options:

- US Criminal Record
- Canadian Criminal Record
- US Motor Vehicle Record
- Social Media

How Megan Sends Background Checks

Once a candidate reaches the background check stage, Megan jumps in, confirms with them, and sends the check request. No extra steps for you. ✨

Manually Sending Background Checks

Prefer to do it yourself? No problem! Just move candidates into the **Background Check** stage. Your **Hiring Managers (and up)** will get notified that a candidate is ready for review.

The screenshot shows a candidate profile with a 'Background Check' stage. The 'Request' button is highlighted with a purple arrow. The 'Status' section shows the stage as 'Background Check', entered 'a few seconds ago', and added on 'Mar 05, 2025'.

Inside the candidate's profile, you'll see an action button in the upper right to request a background check. Click **"Request"**, pick the checks you want, and send them off.

The screenshot shows the 'Run Background Check' modal. It has a title 'Run Background Check' and a description 'An email will be sent to the candidate inviting them to complete the relevant information and start the background check process.' Below the description, there are four checkboxes for selecting background check reports: 'US Criminal', 'Canadian Criminal', 'Social Media', and 'US Motor Vehicle Record'. Each checkbox has a brief description of what the report covers. At the bottom, there are 'Cancel' and 'Send Invitation' buttons.

Viewing Background Check Results

Once the background check is complete, **Hiring Managers and above** will get notified. To review the results, just hop into the candidate's profile and head to the **Files** section, click to download, and review.

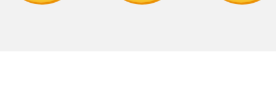

The screenshot shows the 'Files & Attachments' section. It has a table with columns: 'Name', 'Visibility', 'Added by', and 'Added'. The first row shows a file named 'Background Check' with a 'Review Findings' icon, 'Private' visibility, added by 'Darren Bounds', and added on 'Mar 03, 2025'. There is an 'Upload Files' button at the top right.

And that's it—background checks made simple! 🔍

Schedule Meeting With Candidates

Updated over 5 months ago

Ready to set up an interview? Whether you're bringing someone in for a chat or hopping on a video call, it's easy to get everything organized. Here's a step-by-step guide to make it happen.

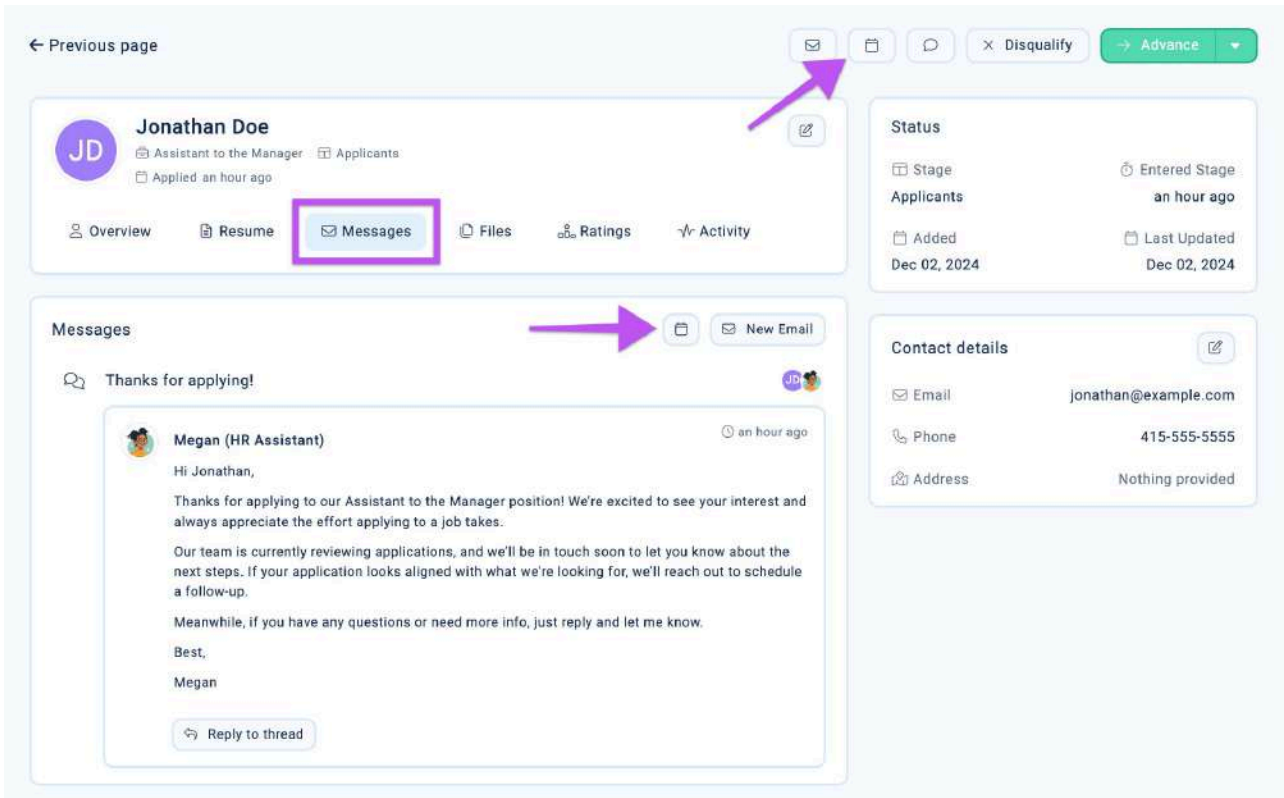

Steps to Schedule an Interview

Open Their Profile

Click on the candidate's profile to open their details.

Click the Calendar Icon

Look for the calendar icon—it's in the upper-right corner of the window or in the Messages section. Give it a click!

Pick the Date, Time, and Duration

Select when the interview will take place and how long it'll be.

Schedule a Meeting

Meeting name

AI Business Preferences

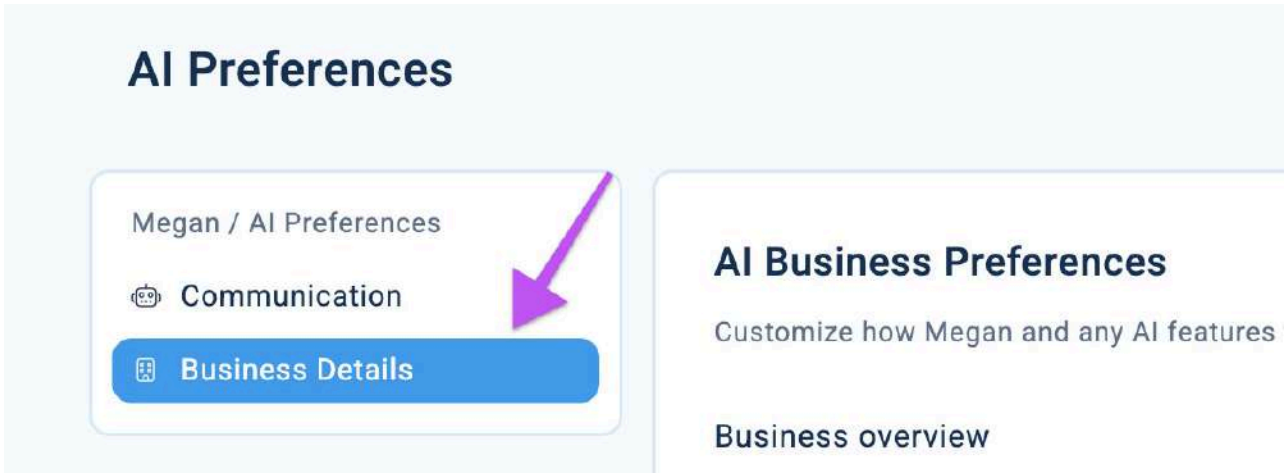

Updated over 3 months ago

Ready to fine-tune how your AI buddy (looking at you, Megan! 🌟) represents your business? You’ve come to the right place. Below, you’ll find a few sections where you can shape your AI’s personality—because who doesn’t want a virtual assistant that “gets” them? 😊

Inside your settings gear you’ll find the option for AI Settings.

Make sure the Business Details option is selected.

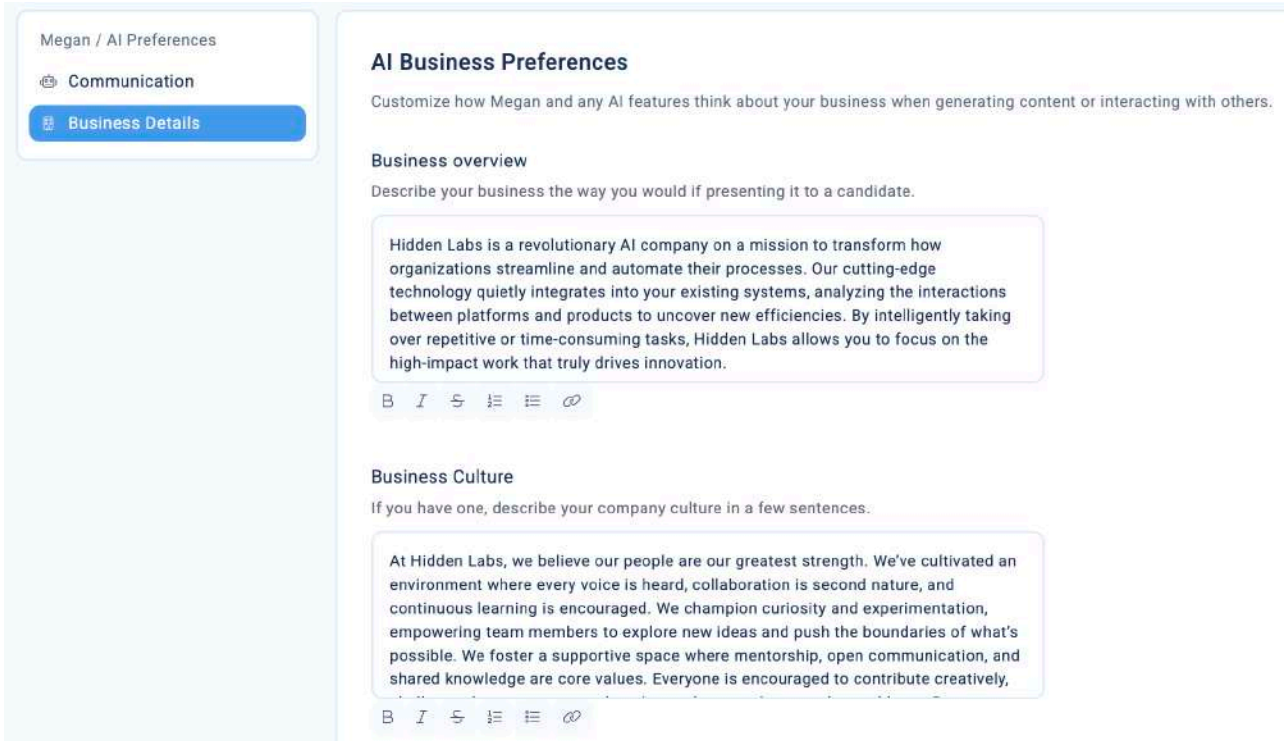

Business Overview

Give a quick snapshot of your business, like how you’d pitch it to a potential new hire—or your barista who’s only half-listening (no judgment, we’ve all been there ☕). Keep it friendly and clear.

Business Culture

Got a particular vibe in your office? Collaborative, competitive, or maybe “We have pizza Fridays and yoga Mondays” type of deal? 🍕🧘 Write a couple of sentences to capture the *feel* of what it’s like to work at your place.

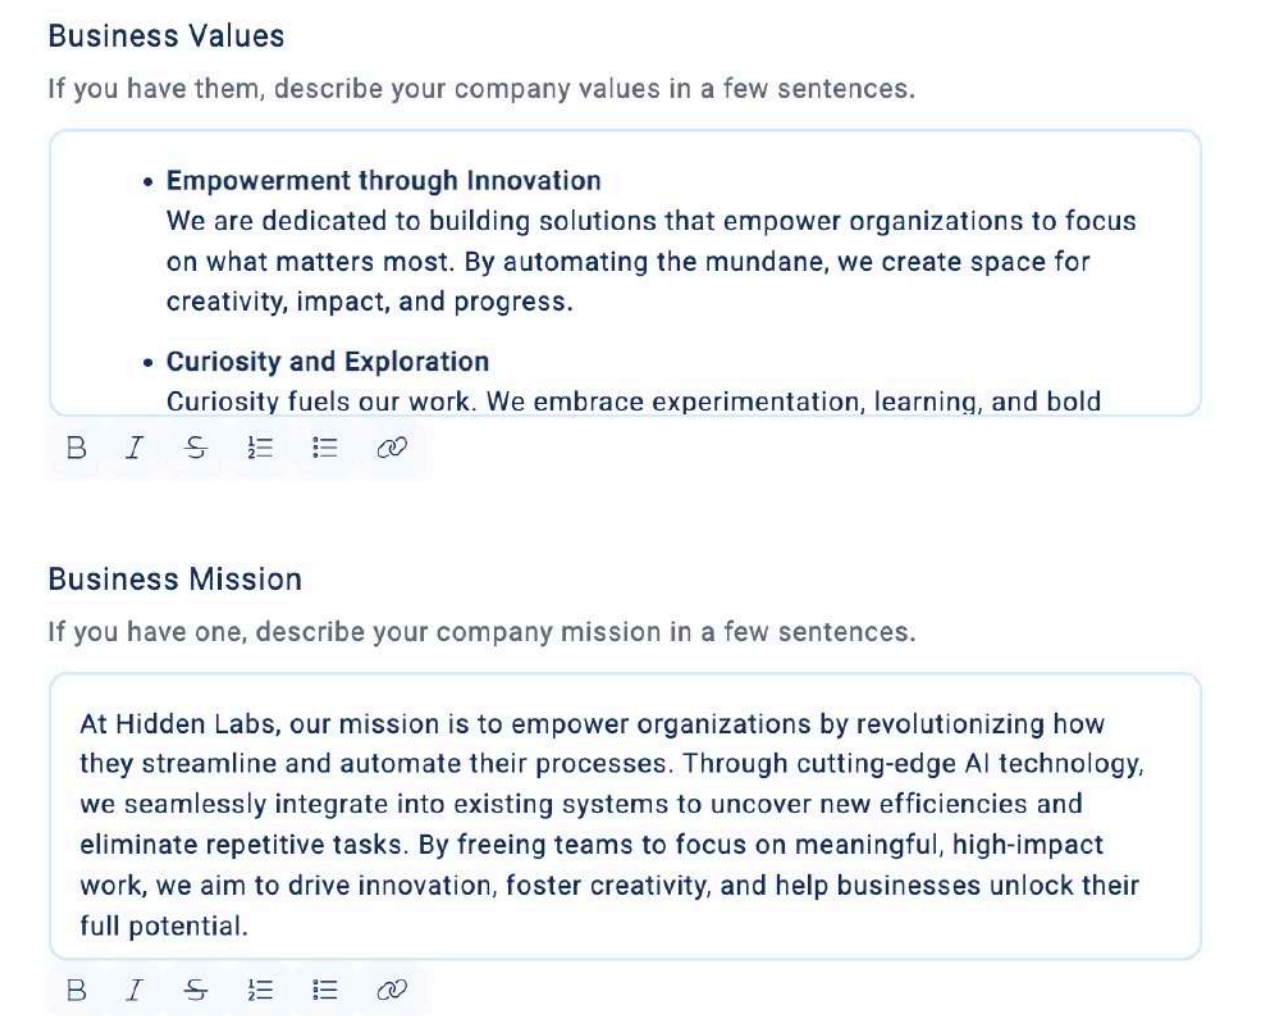

Business Values

Do you believe in innovation, teamwork, or just making sure the snack drawer is always full? (We respect that 💎.) Share those values here in a few lines so Megan knows what principles matter most to your team.

Business Mission

If you’ve got a grand quest—like saving the world or just making it a bit brighter—this is where you lay it out. No pressure, but maybe don’t be too shy about it either. 🚀

Megan Communication Preferences

Updated over 4 months ago

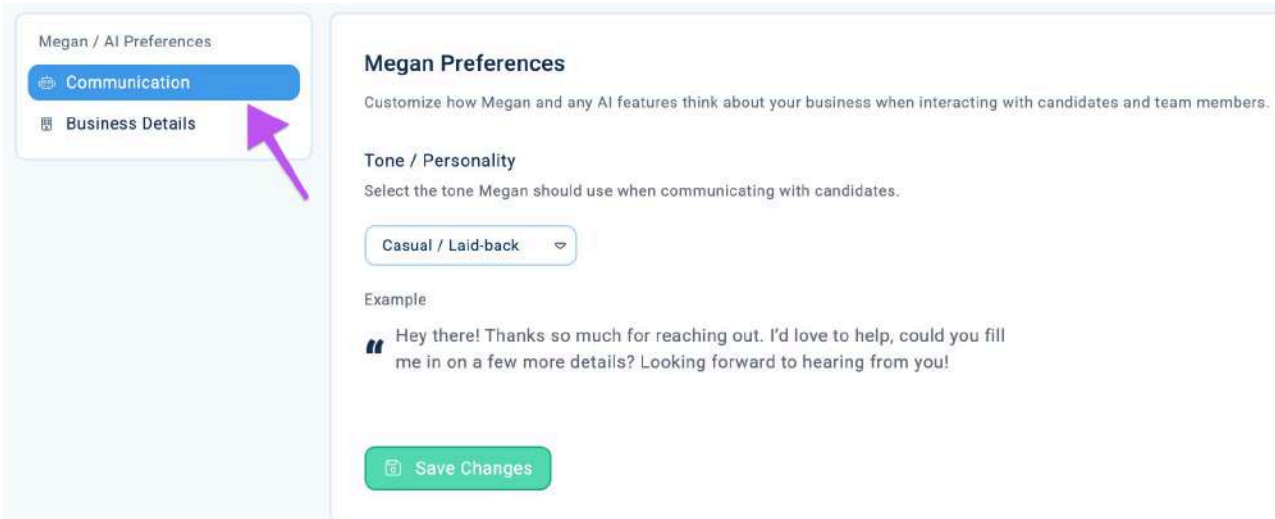

Megan is here to do the heavy lifting when it comes to managing, working, and chatting with candidates (and your team). But to make sure Megan sounds like *you* and represents your company, you’ve got the power to fine-tune her personality and communication style. 🎨✨

Here's how you can make Megan truly yours:

Inside your settings gear you’ll find the option for AI Settings.

Make sure the Communication option is selected.

Tone / Personality

How should Megan sound when talking to candidates? Think of her like your office's virtual spokesperson—you decide her vibe! 🗣️
You've got a few flavors to choose from:

- **Casual / Laid Back:** Think friendly barista energy.
- **Professional / Formal:** Corporate mode, tie included.
- **Gameshow / Laid Back:** Somewhere between "Let's make a deal!" and a chill vibe.
- **Robotic AI:** For when you want Megan to sound like a sci-fi movie extra.

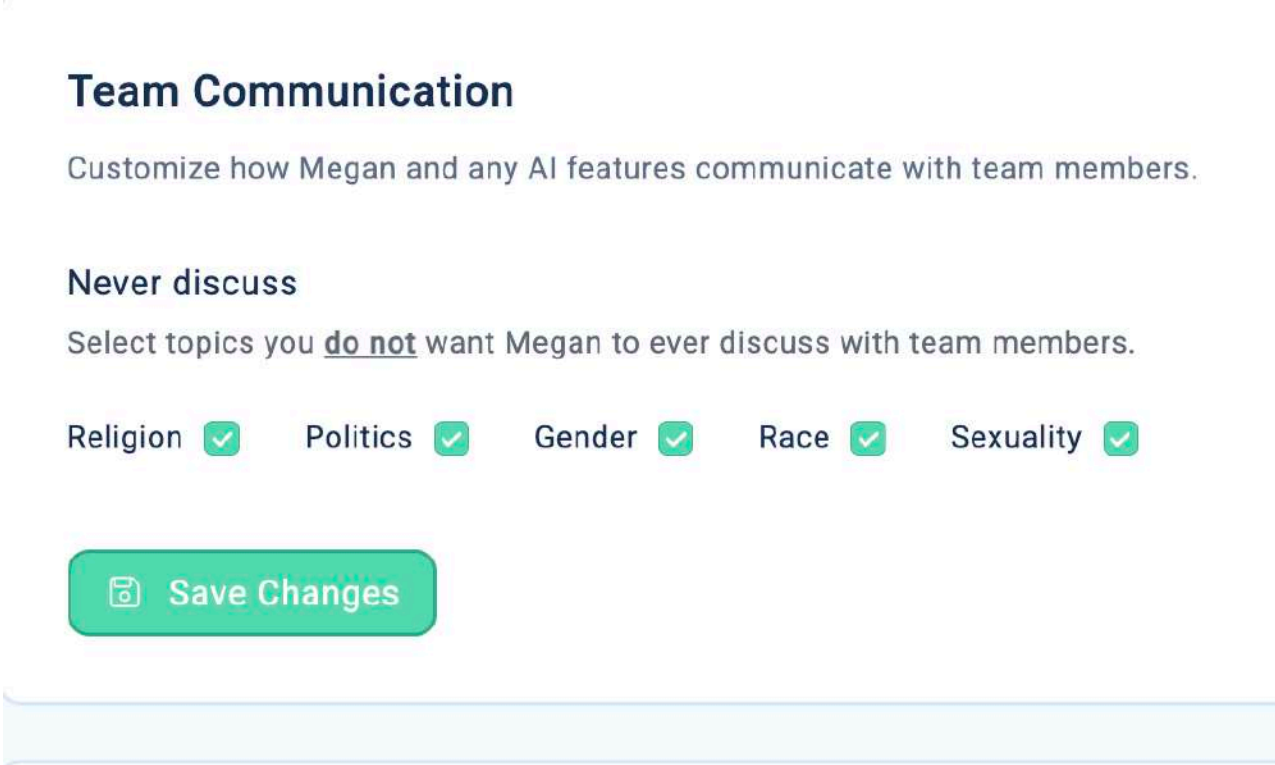

Examples are right below to show how each tone lands with candidates.

Team Communication

Let's talk about Megan and your team. 🗨️
You can tweak how she interacts internally. For instance, you can make sure there are *certain topics* Megan avoids at all costs—because no one wants their AI starting awkward convos during a coffee break. ☕
Topics you can block Megan from discussing with the team include:

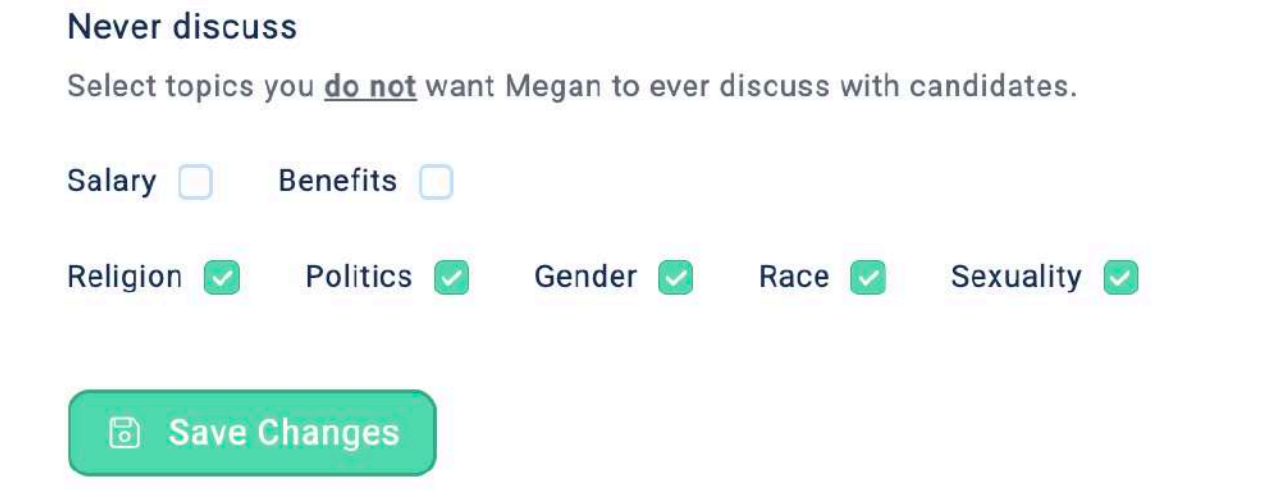

- **Religion**
- **Politics**
- **Gender**
- **Race**
- **Sexuality**

Basically, if it could make a team meeting weird, you can keep Megan far, far away from it.

Candidate Communication

Customize how Megan communicates with candidates.

Candidate Communication

Now let's switch gears to Megan's chats with candidates. 🗨️
Similar to team convos, you can set boundaries so Megan doesn't stray into touchy territory.
Topics you can block Megan from discussing with the candidate include:

- **Salary**
- **Benefits**
- **Religion**
- **Politics**
- **Gender**
- **Race**
- **Sexuality**

You're the boss of Megan's "off-limits" list. She'll stay professional (or casual, if that's your vibe) while keeping things smooth and candidate-friendly.

All Collections > Working With Candidates > Mass Actions on Candidates

Mass Actions on Candidates

Updated over 3 months ago

Need to take the same action on multiple candidates? Instead of clicking endlessly, use Mega’s mass actions to handle them all in one go. Efficiency level: Expert. 😎

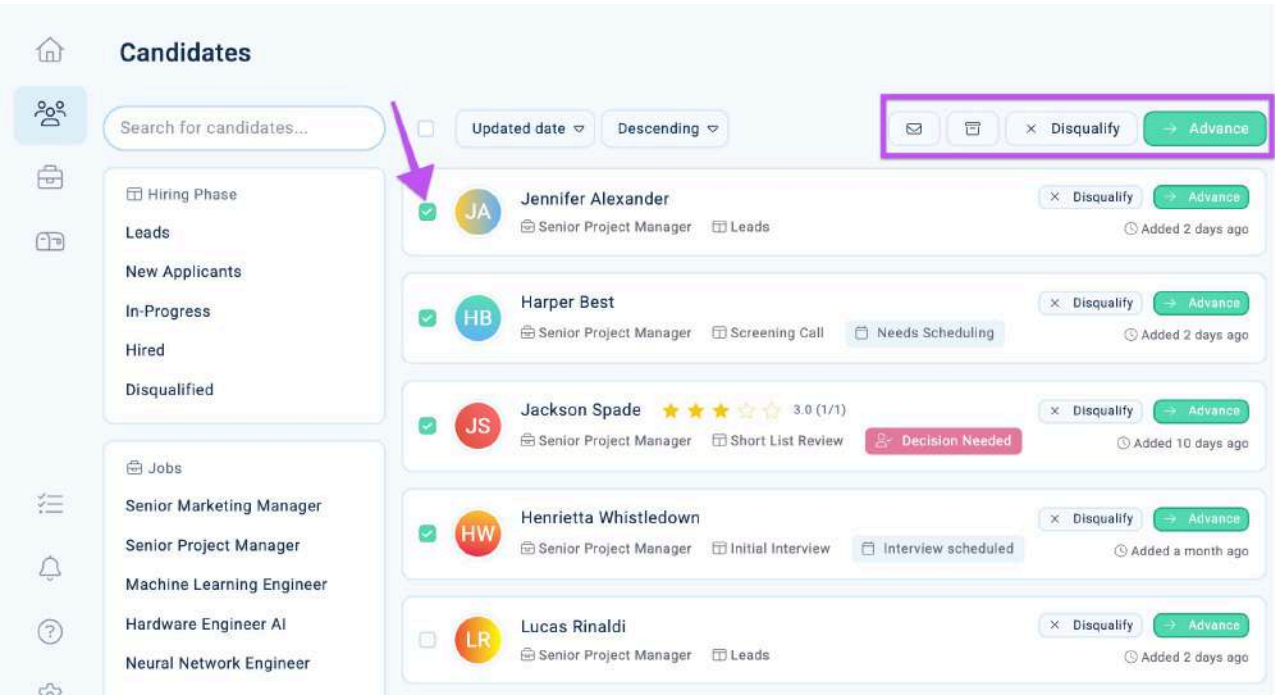

Where to Mass Manage Candidates

You’ve got two spots where you can make mass moves:

Candidates Section

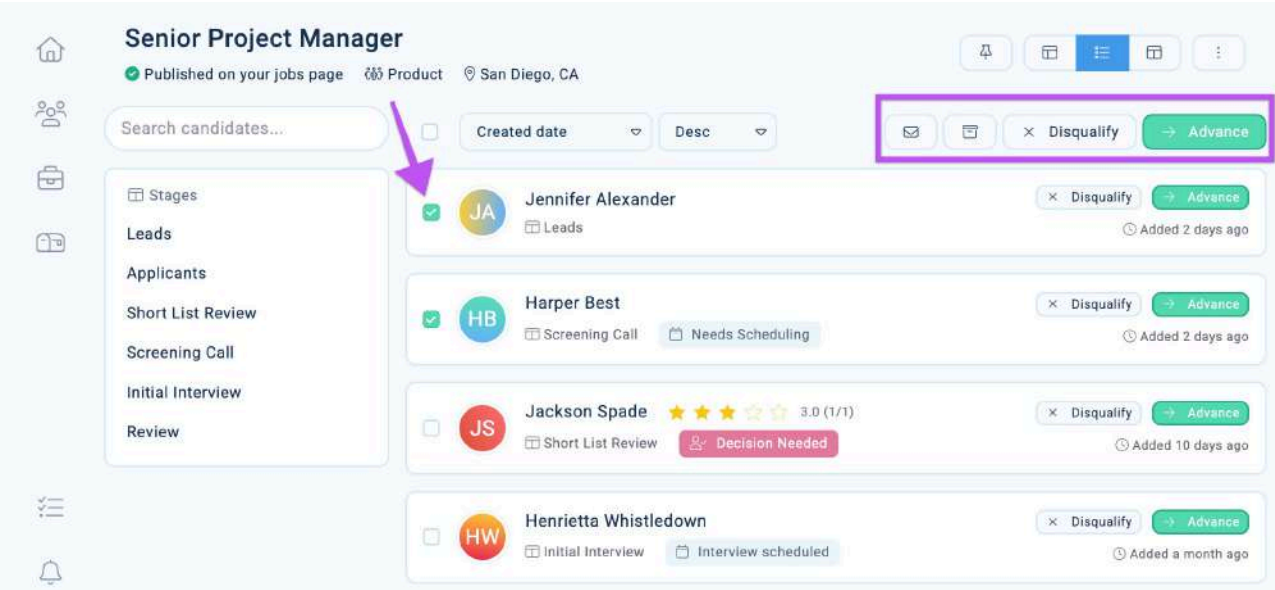

In your main Candidates section, you can select multiple candidates across different positions and do the following actions:

- ✔ Move them to the next stage
- ✗ Disqualify them
- 📦 Archive them
- ✉ Send them a message

List View Inside a Position

If you’re looking at candidates within a specific position, the **List View** lets you do the same mass actions: advance, disqualify, archive, or message—because who has time to do that one by one? 🙄

⚠ **Heads-up!** If you’re on a trial, mass actions won’t work for candidates with public or non-work email addresses.

Now go forth and manage those candidates like a pro!

 Search for articles...[All Collections](#) > [Company Support](#) > [Additional Account Verification](#)

Additional Account Verification

Updated over 2 months ago

We're all about keeping Mega a safe and trusted place for both businesses and job seekers. That's why we verify company details before jobs go live. In most cases, our system does this automatically, but sometimes we need a little more info. If that happens, we'll send you an email after you publish your job asking for a few extra details.

This is a **one-time** thing! Once you're verified, future jobs won't be held up. Until then, though, your job won't appear on external job boards.

A quick heads-up—if we don't get enough info to verify your business, we may have to suspend your account (not fun, we know). But don't worry, we'll review your details and get back to you within **one business day** so you're not left hanging.

Verifying Your Account

Let's get you verified! Just follow these steps:

1. **Invite a coworker** – Head to the [Members](#) page in your Company Settings and invite a coworker using their business email (it should match your company's domain).
2. **Have them log in** – Once they're in, you're halfway there!
3. **Send us the details** – Reply to our verification email or email support@megahr.com with **all** of the following:
 - Your **name** and **job title**
 - Your **company's full name, address, and phone number**
 - A link to **your LinkedIn or other social media profile**
 - A link to **your coworker's LinkedIn or social media profile**

All Collections > Recruiting Settings > Workflows

Workflows

Updated over 3 months ago

Think of **workflows** as the steps guiding your candidate interview journey! They define what kind of interactions and information you collect to help find *the perfect fit* for your team.

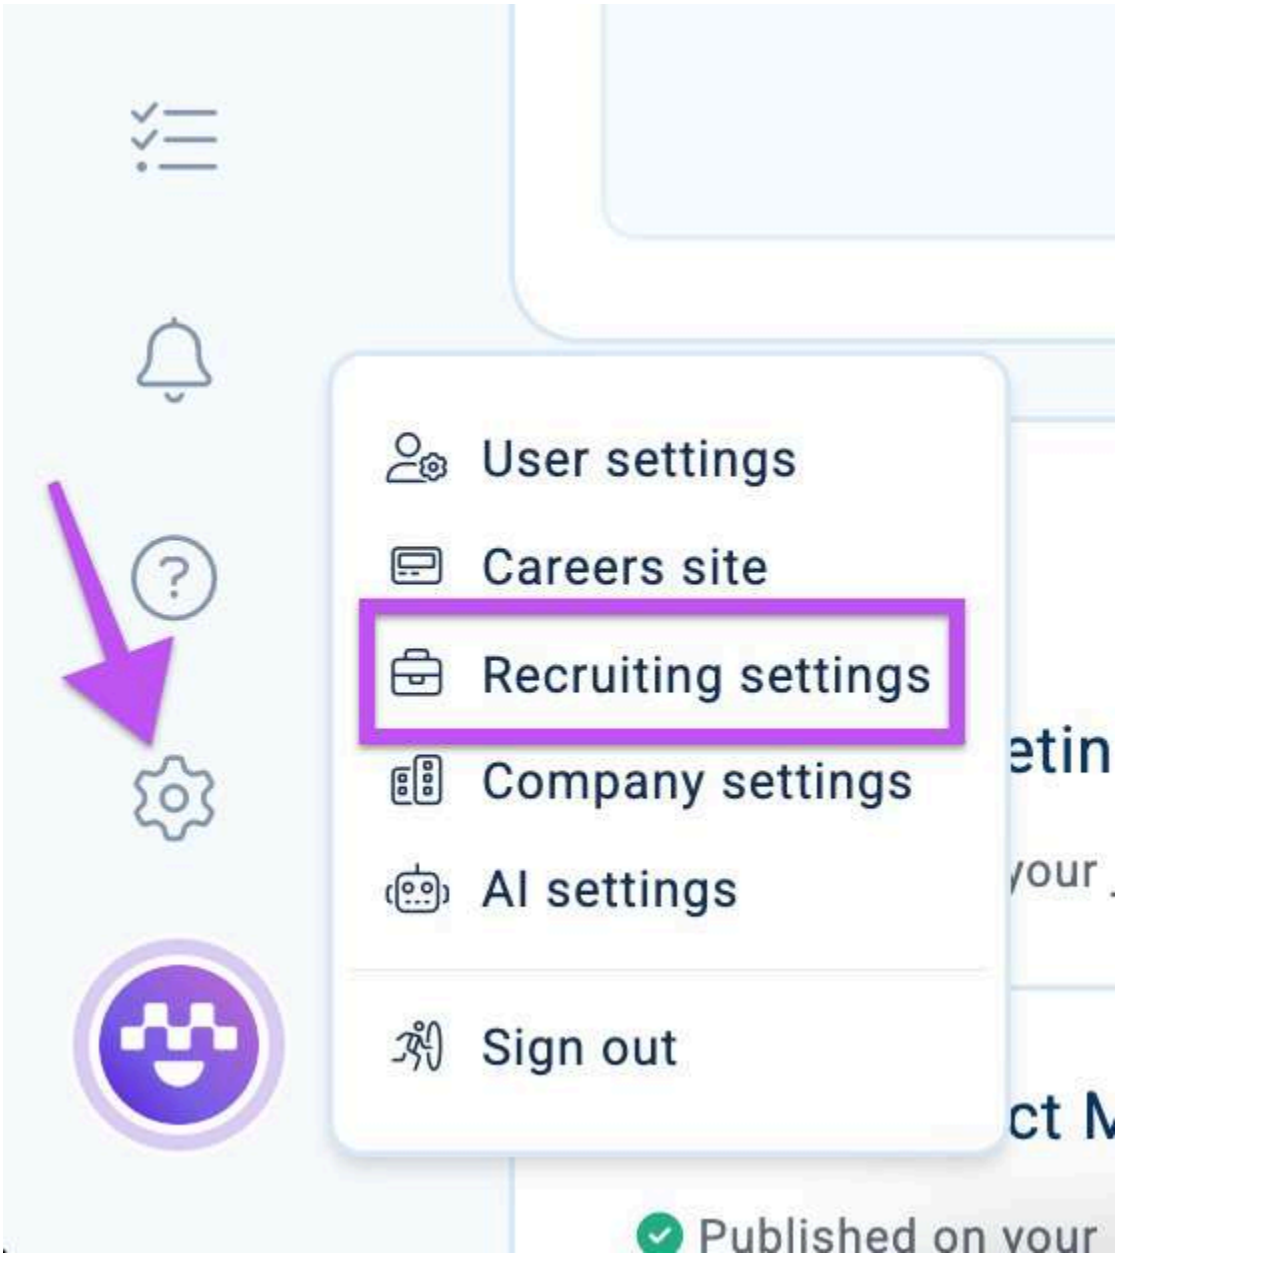

The best part? You can create as many different workflows as you need—whether it's by department, position type, or just to suit your unique hiring process.

Who Can Access Workflows?

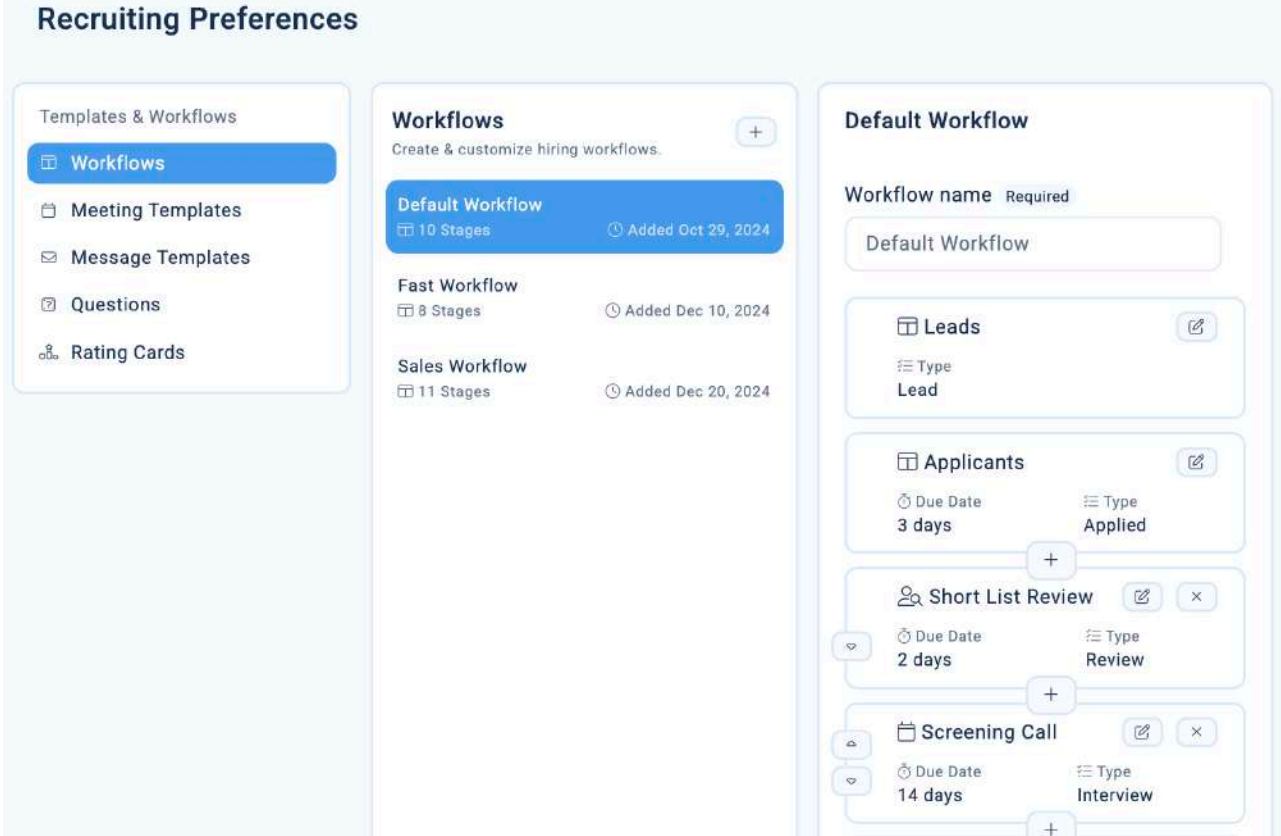

To access **Recruiting Settings**, you'll need to be an **Admin** or **Mega Admin**—so if that's not you, please reach out to your administrator for assistance.

Finding Your Workflows

- Click on the **settings gear** in the bottom left corner.
- Select **Recruitment Settings** from the menu.
- Navigate through the different sections using the list on the left.

We've already set up a **default workflow for you to spark some inspiration. Feel free to tweak it to your liking! Any new workflow you create will start with this base structure.*

Creating & Customizing Workflows

Creating a New Workflow

Want to build a fresh workflow? Easy! Click the **“+”** button at the top of the workflow list, and boom—you've got a new one to customize! 🔥

Adding a New Stage

Between non-default stages, you'll see a **“+”** button. Click it to create a new stage, name it, and pick its type. 🚀

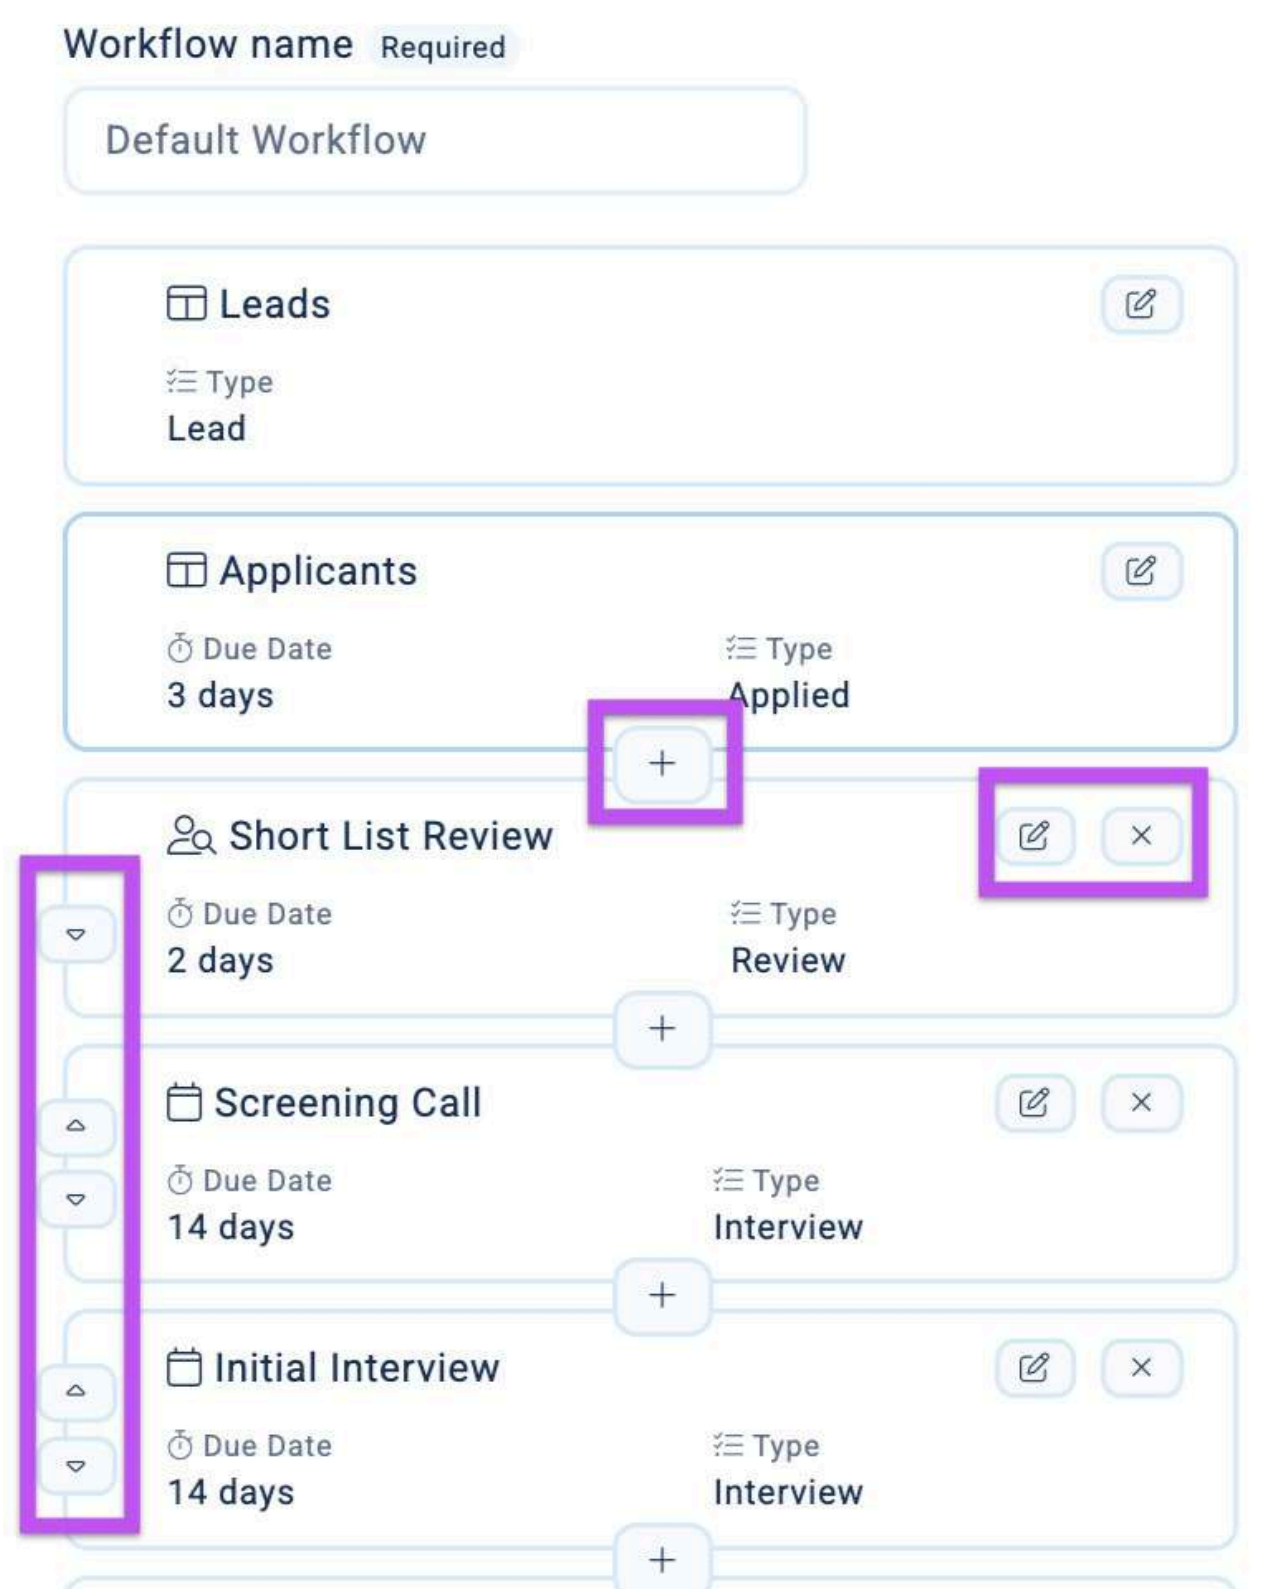

Editing a Stage

Spotted something that needs a tweak? Click the **pen & paper** icon next to a stage to edit it. *Don't forget to hit “Save Changes” at the bottom!* ✅

Deleting a Stage

Need to remove a stage? Click the **X** icon next to it. *Don't worry!* A confirmation will pop up to make sure you *really* want to delete it.

Default Workflow

Pro Tip: Deleting a stage won't affect workflows of existing jobs—only future ones using the same workflow.

Stage Visibility

By default, candidates in each stage are only visible to **Hiring Managers & above**. Want **Reviewers** to see a stage (like Interview or Review)? You can toggle visibility settings in **Recruiting Settings** or adjust them per job inside **Job Settings**.

Stage Types & Due Dates

Each **Stage Type** can have different **actions, automations, or AI features** to make your hiring process *smarter and more efficient!* 🤖✨ This is all customizable in **Job Settings**—so every candidate gets a personalized experience at scale.

Remember: Your workflows are here to make hiring *easier and more organized*. So tweak, edit, and customize as needed to find the best process for you!

Got questions? Reach out to support—we're always happy to help! 😊

Meeting Templates

Updated over 3 months ago

Just like workflows help structure your hiring process, **meeting templates** ensure every interview runs smoothly! 🎯 Having **specific templates** for different types, lengths, and styles of interviews helps keep both **candidates and your hiring team fully prepared**.

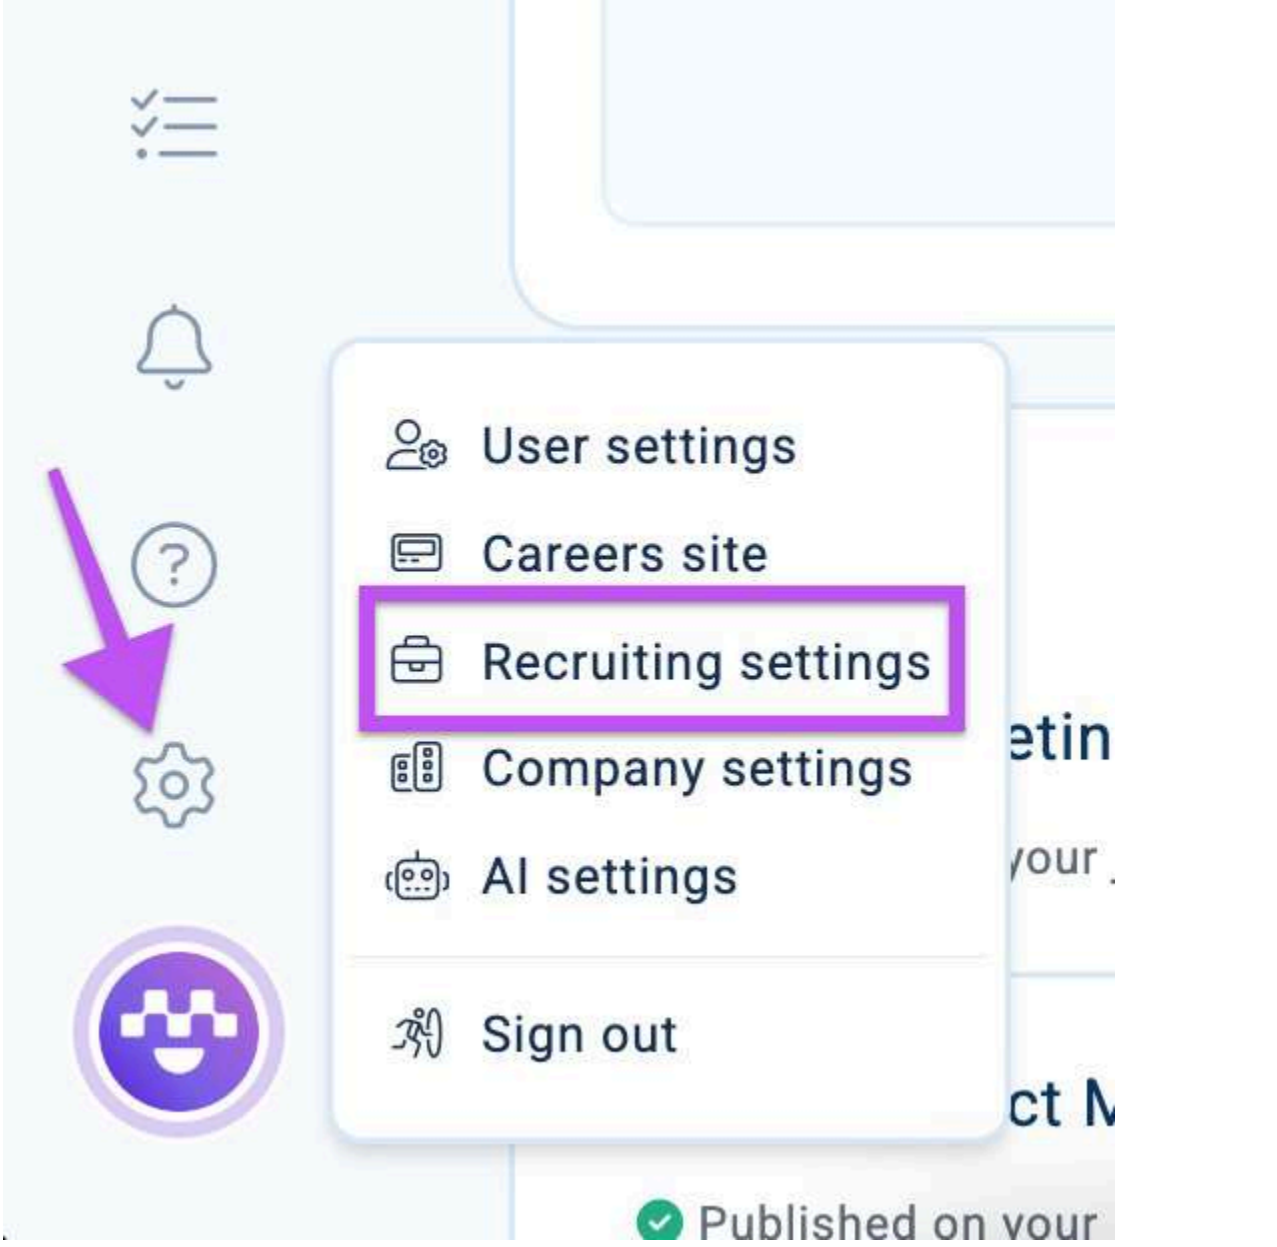

So, let's make sure you have all the right meeting templates in place!

Who Can Access Meeting Templates?

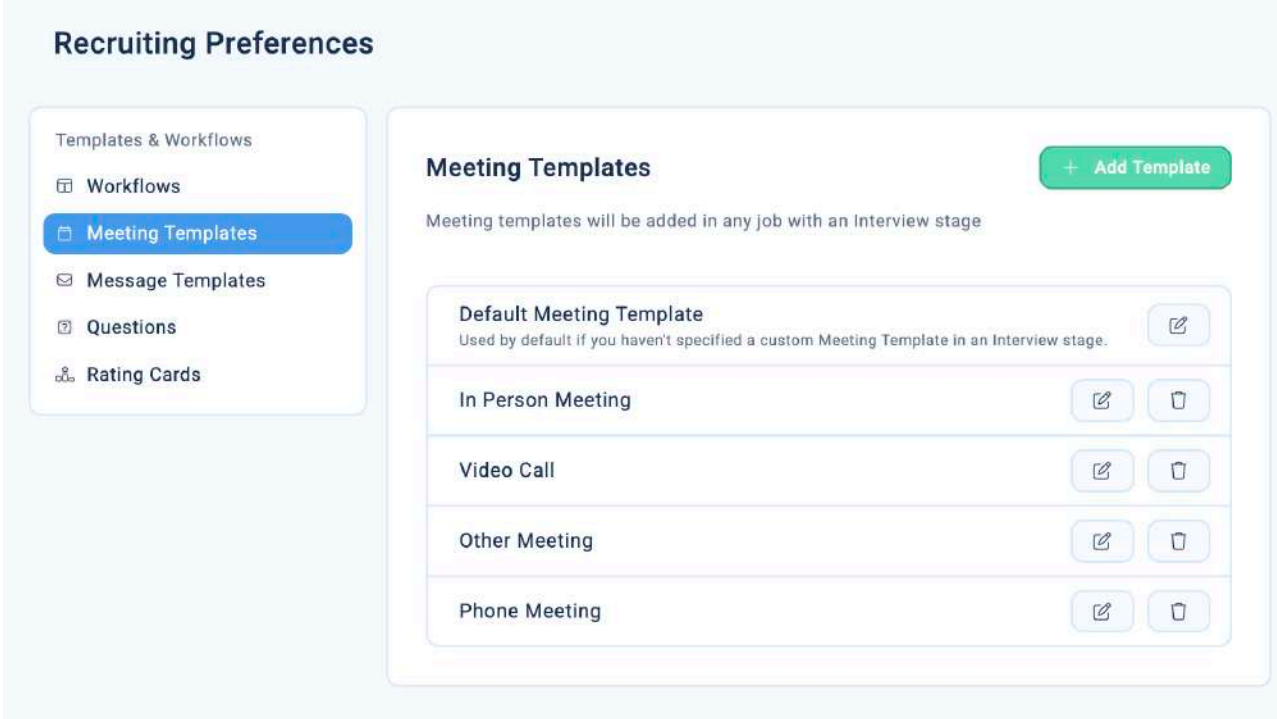

To access **Recruiting Settings**, you'll need to be an **Admin** or **Mega Admin**—so if that's not you, please reach out to your administrator for assistance.

Finding Your Meeting Templates

Click on the **settings gear** ⚙️ in the bottom left corner.
Select **Recruitment Settings** from the menu.
Navigate to the **Meeting Templates** section using the list on the left.

Bonus! We've already added a **default meeting template** to spark inspiration. Feel free to edit it or create brand-new ones that match your hiring process!

Creating a New Meeting Template

To create a new template, click the “+ Add Template” button in the upper right corner and fill out these sections:

- Meeting Template Name
- Meeting Title
- Duration
- Meeting Type
- Meeting Description
- Rating Card

Add Meeting Template

Meeting Template Name Required

Template name

Meeting Description Required

B I S L I W

Rating card

Rating card for meeting

Cancel

Save Changes

Meeting Template Name

This is an **internal** label so you and your team can easily find and select it. Candidates **won't see this**, so make it as clear as possible for your team.

Meeting Title

This is the **title candidates and interviewers will see** on the invite. Keep it **short but informative**—so everyone knows what to expect at a glance!

Duration

Time is precious! 🕒 Set how long the meeting will last so both the **interviewing team and the candidate** can plan accordingly.

Choosing the Right Meeting Type

Different interviews call for different setups! Let's break down your options:

- Phone Call** – Candidates will be told you're calling the **number they provided**. Simple and direct!
- Video Call** – Requires connecting your **Google or Microsoft calendar**. The system will generate a meeting link automatically and send it to attendees.
- In-Person** – Be sure to **include the meeting location** in the description so there's no confusion! No one likes last-minute emails asking, "Where do I go?" 😊
- Other** – For unique formats, select **Other** and provide details in the **Meeting Description**.

Crafting the Perfect Meeting Description

This is where you lay out all the **important details!** 🎯
Pro Tip: You can use **bullet points, links, and rich text** to keep things organized and easy to read. **Both candidates and the interview team will see this**, so make sure it's accurate and helpful!

Message Templates

Updated over 3 months ago

With **Message Templates**, you can set up pre-built messages that are automatically sent or manually with the click of a mouse at different hiring stages—whether it's confirming applications, scheduling interviews, or sending offers.

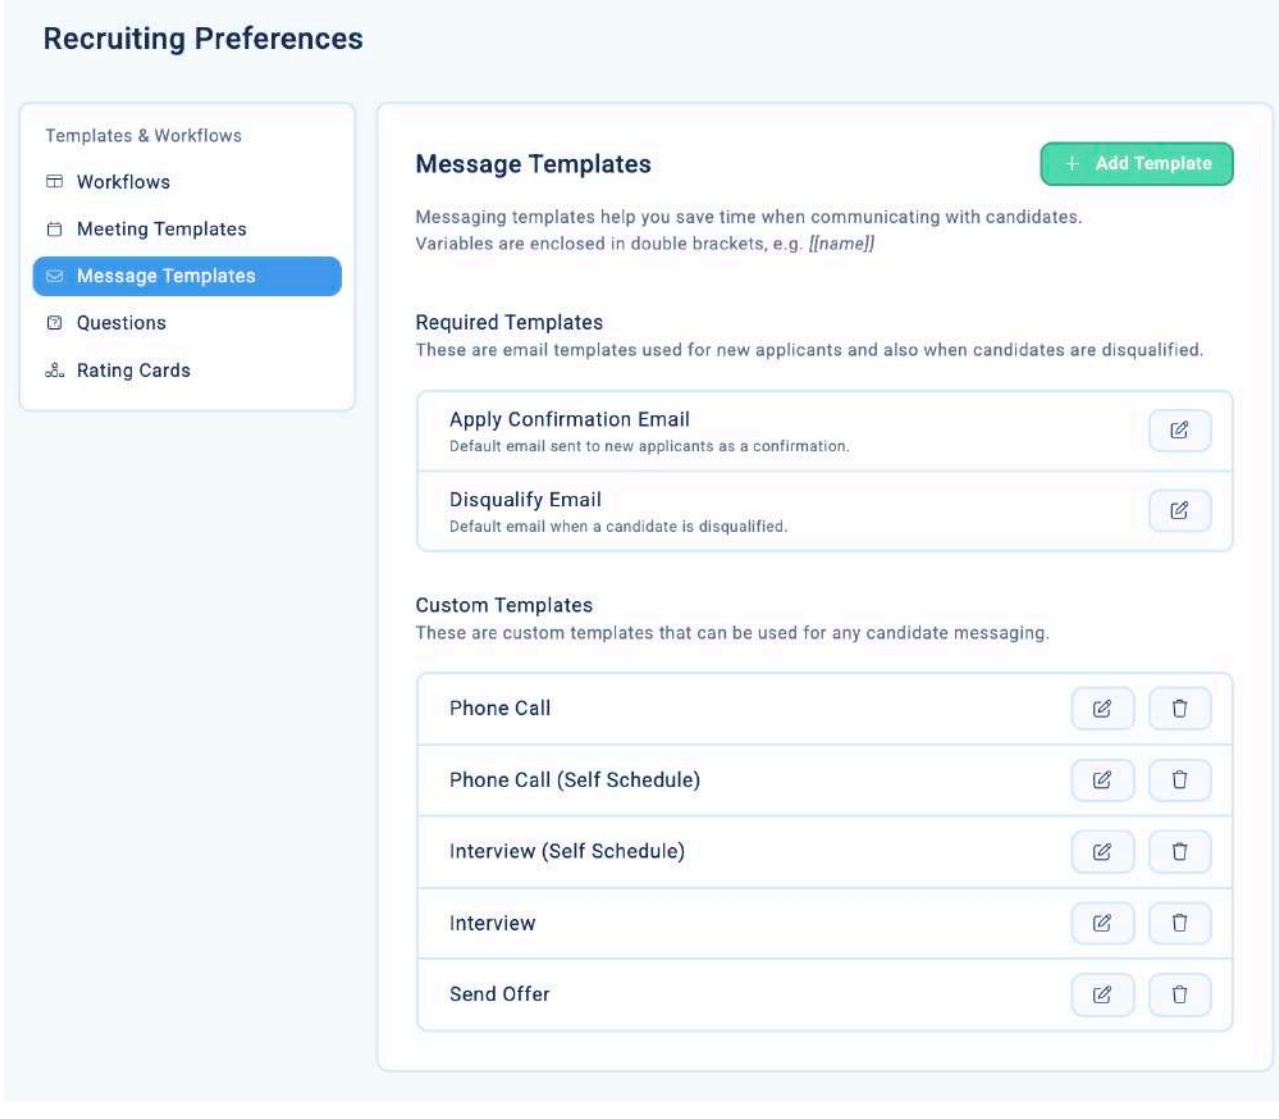

Who Can Access Meeting Templates?

To access **Recruiting Settings**, you'll need to be an **Admin** or **Mega Admin**—so if that's not you, please reach out to your administrator for assistance.

Finding Your Message Templates

Click on the **settings gear** in the bottom left corner.
Select **Recruitment Settings** from the menu.
Navigate to the **Message Templates** section using the list on the left.

Default Message Templates

We've already set you up with a few **default templates** to make things easier:
Our default message templates help streamline communication at every stage of the hiring process.

The **Application Confirmation** template ensures candidates know their application has been received, while the **Disqualification Notice** provides a polite and professional way to inform candidates they weren't selected.

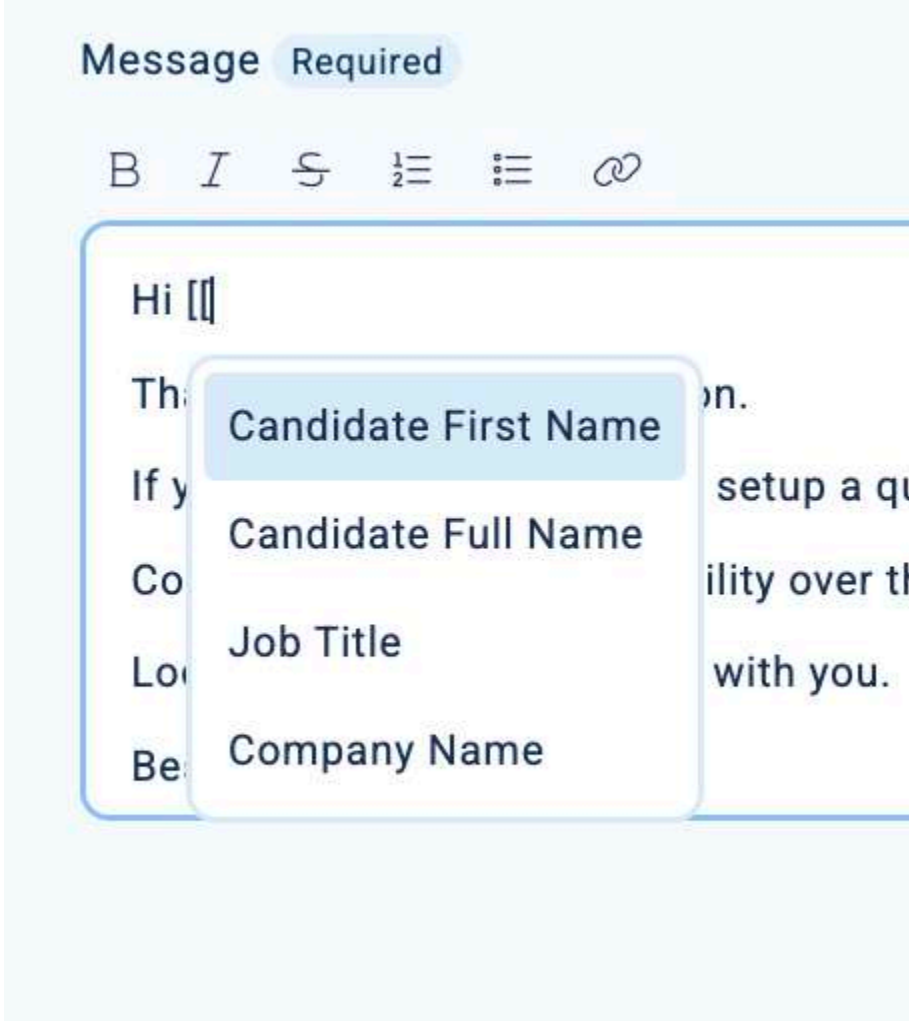

For scheduling, the **Interview Setup** template eliminates back-and-forth emails, making it easy to coordinate meetings. And when it's time to seal the deal, the **Offer Letter** template lets you send exciting job offers in seconds!

Of course, you can **edit these or create your own** to match your hiring process.

Personalize with Candidate Messaging Variables

Want to send **personalized** messages without manually filling in details? **Use variables!**

Just **add double brackets** around the variable, and it'll automatically pull in the right info when sending messages.

Here are the available variables:

- `[[candidateFirstName]]` – First name of the candidate
- `[[candidateFullName]]` – Full name of the candidate
- `[[senderFirstName]]` – Your first name
- `[[senderFullName]]` – Your full name
- `[[jobTitle]]` – The job title the candidate applied for
- `[[companyName]]` – Your company's name

Example, instead of typing:

"Hi Alex, thanks for applying to the Sales Manager role at Acme Corp!"

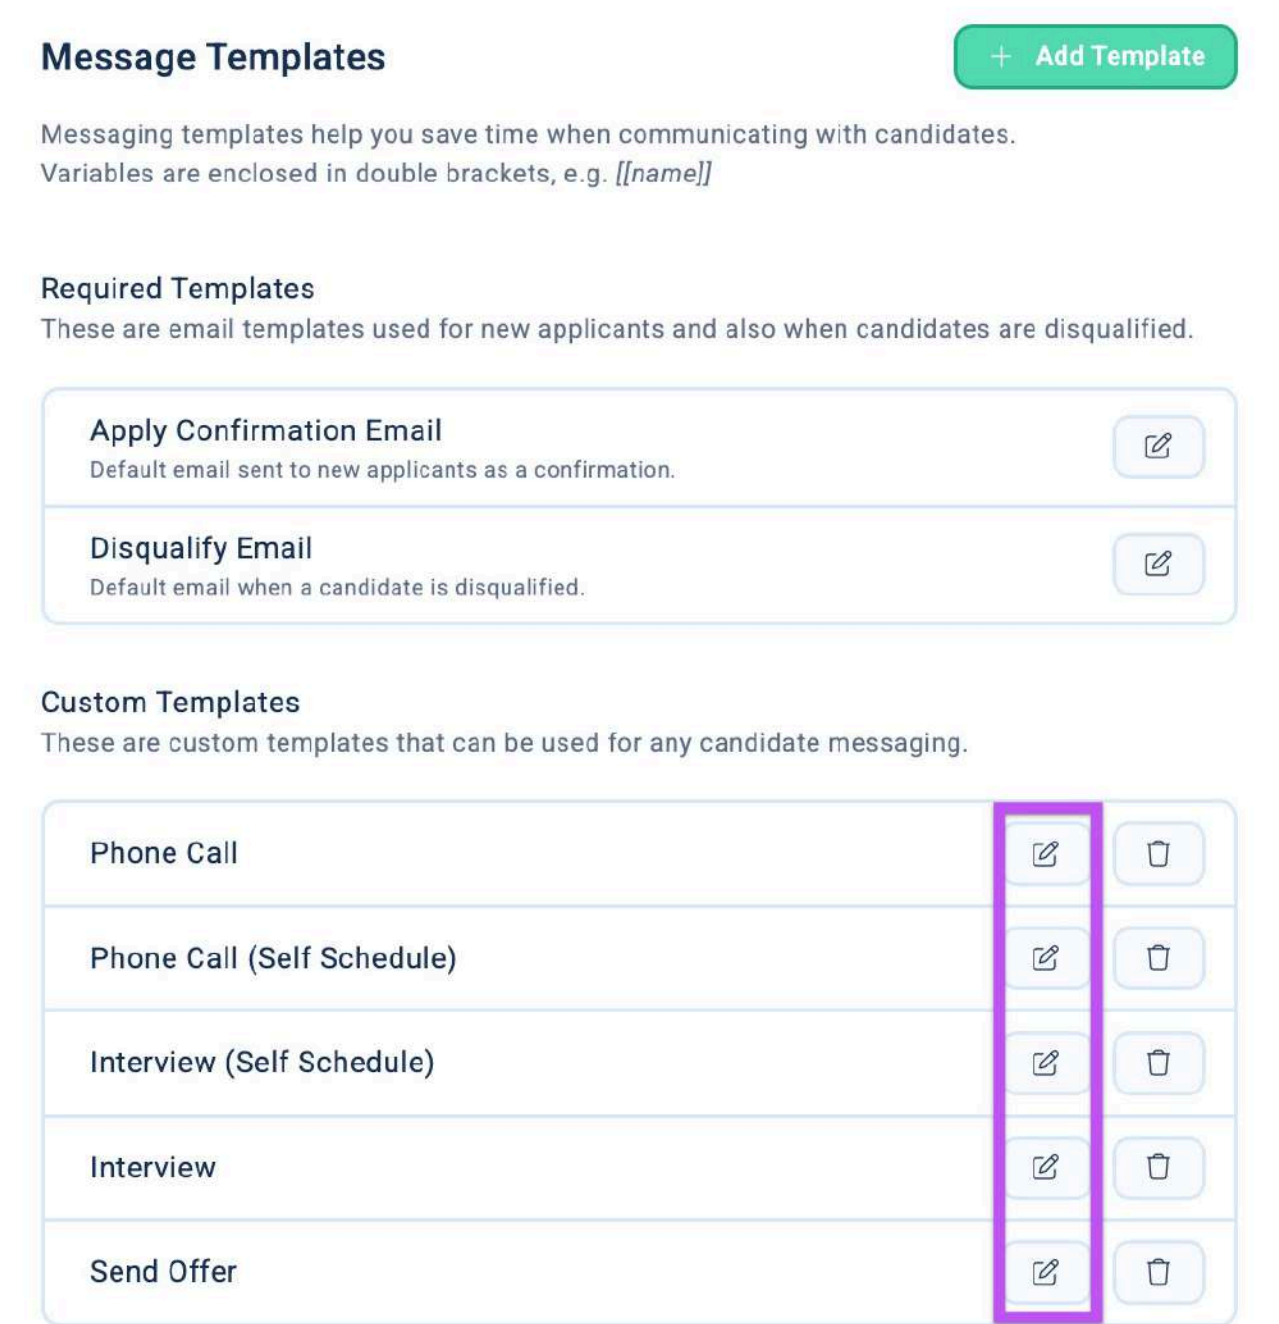

You can set up a template like this:

"Hi `[[candidateFirstName]]`, thanks for applying to the `[[jobTitle]]` role at `[[companyName]]`!"

Boom! **Personalized at scale.**

Editing Message Templates

Need to tweak an existing message?
Click the **pencil & paper** icon next to the template name.

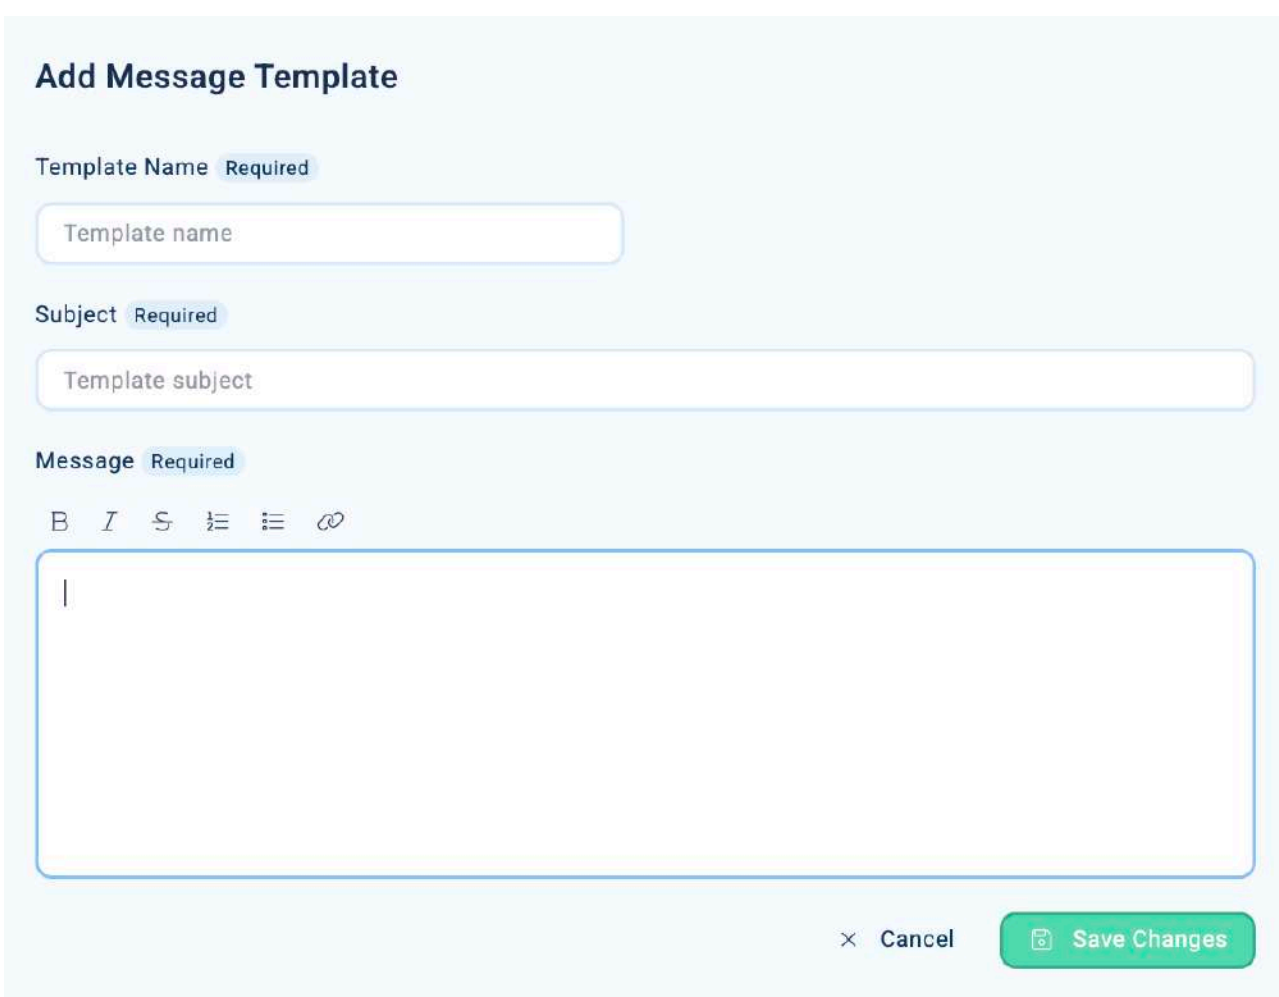

Make your changes inside the editor.

Hit **Save**, and you're all set!

Creating Custom Message Templates

Want a brand-new template?
Click the **"Add Template"** button in the top right corner.

The editor window will pop up—craft your message just the way you want.

Save it, and you're good to go!

Did this answer your question?

Candidate Questions

Updated over 3 months ago

Custom Screening Questions let you gather key details right from the application form! Whether it's experience, skills, or work preferences, these questions help you **identify top talent faster**.

Who Has Access to Screening Questions?

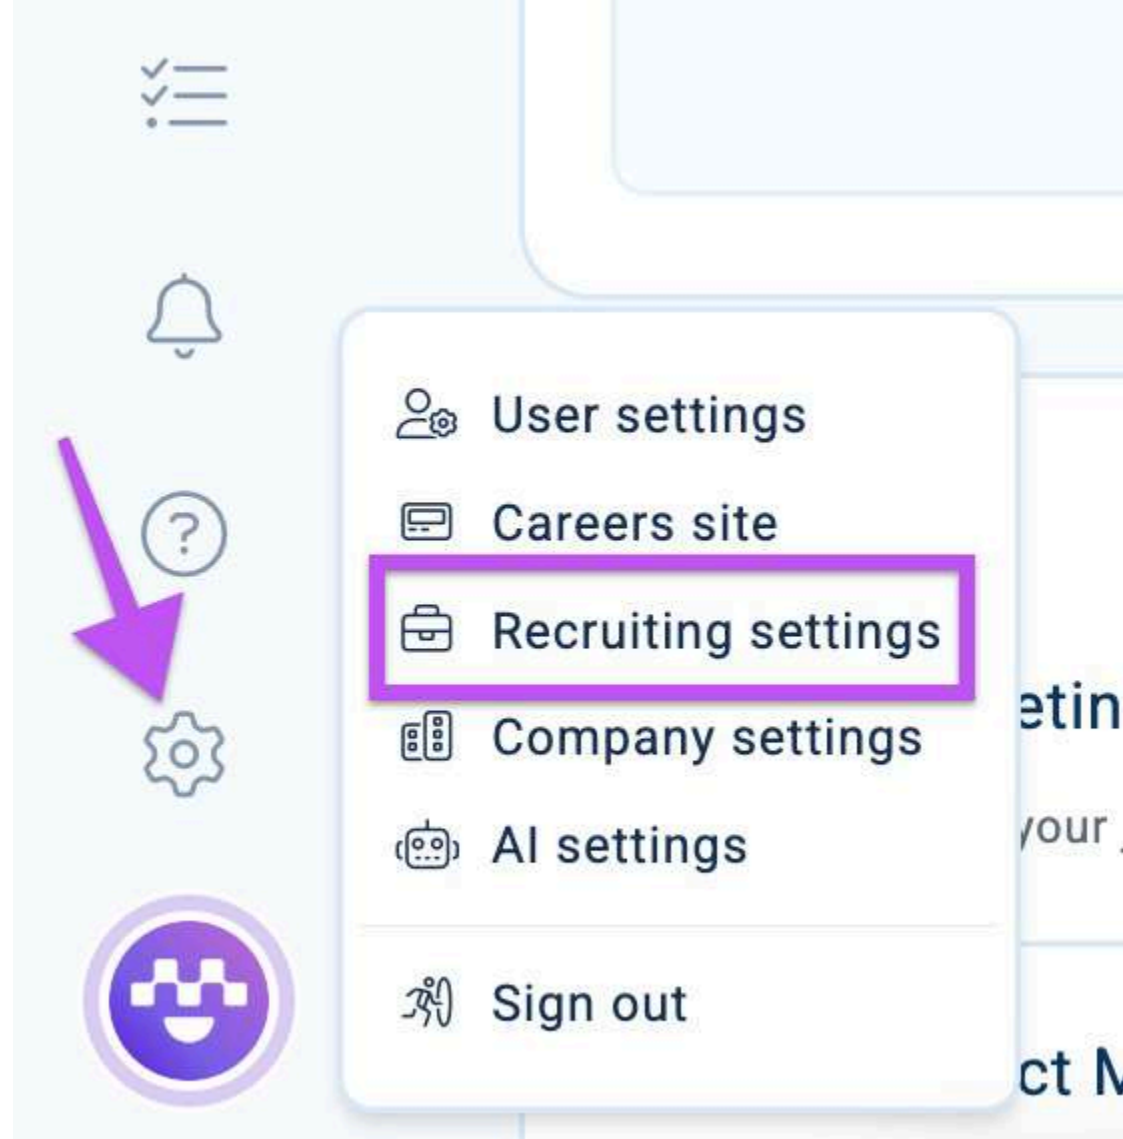

To access **Screening Questions**, you'll need to be an **Admin** or **Mega Admin**—so if that's not you, please reach out to your administrator for assistance.

Finding Your Screening Questions

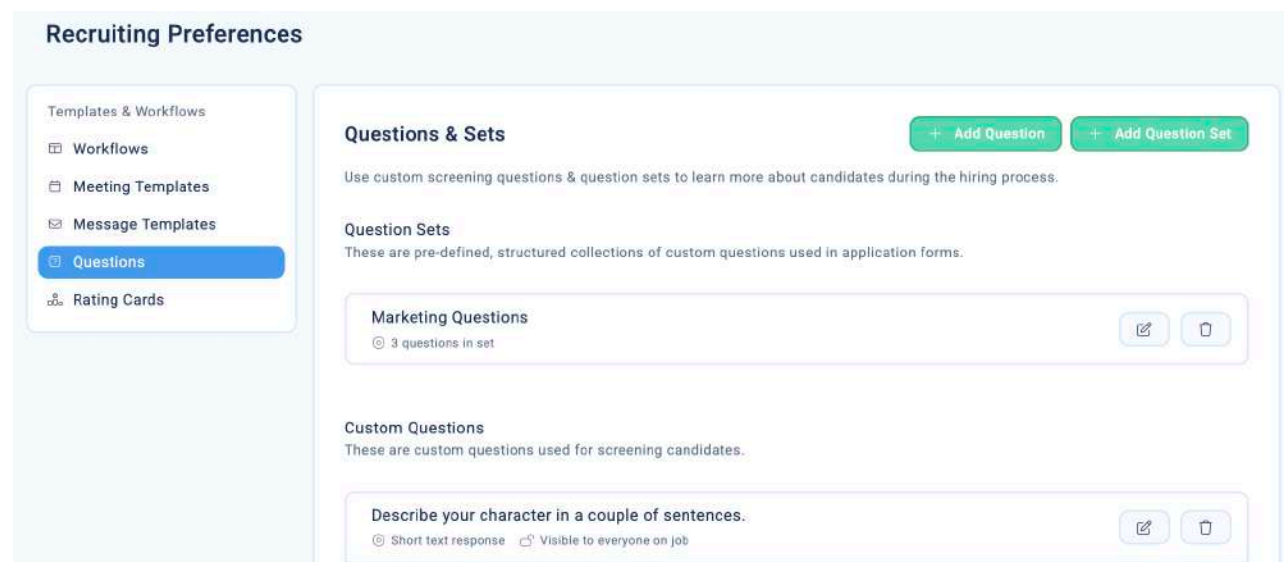

Click on the **settings gear** in the bottom left corner.

Select **Recruitment Settings** from the menu.

Navigate to the **Questions** section using the list on the left.

Bonus! We've already added some **default questions** to give you a head start! Feel free to **edit it** or **create brand-new ones** to match your application process.

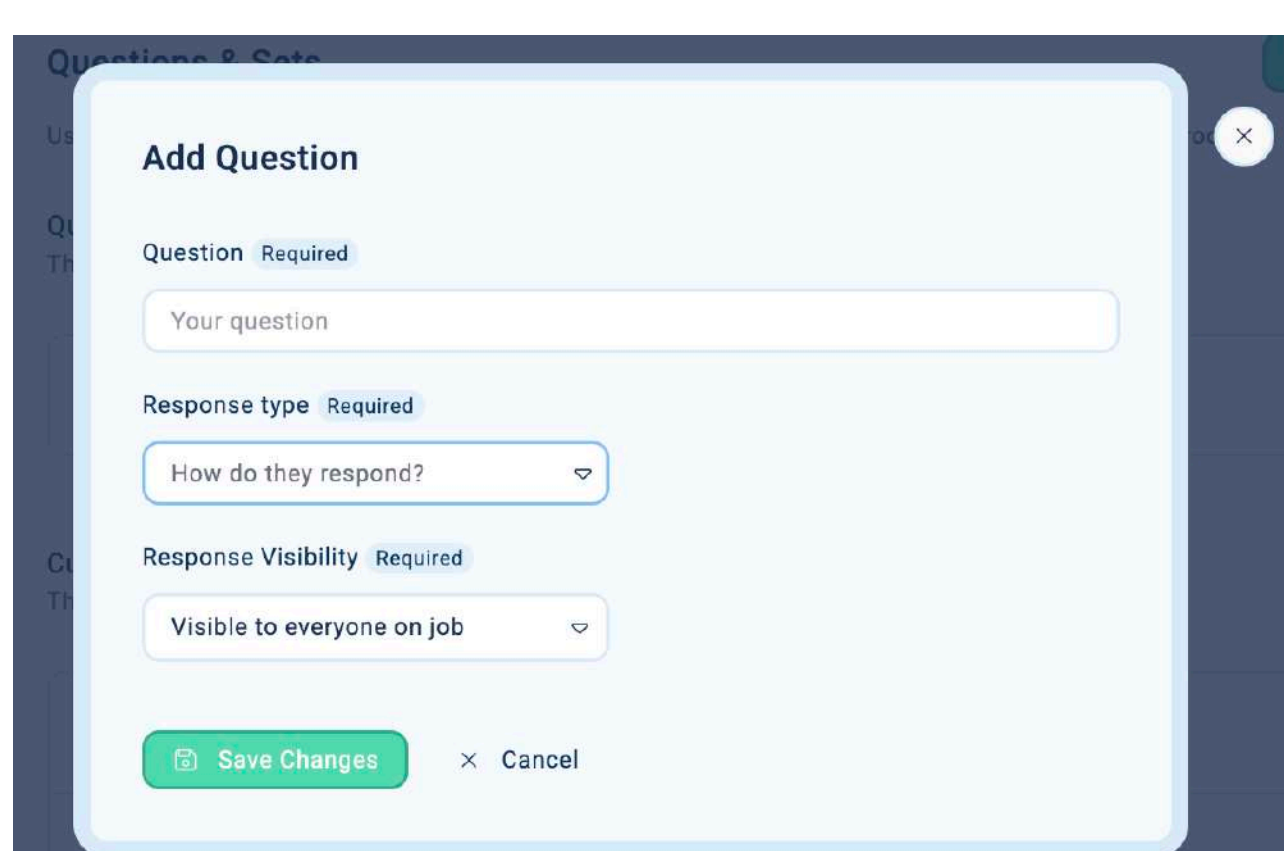

Creating a New Screening Question

Want to add a new question? Easy!

Click the **"+ Add Question"** button in the upper right corner.

A window will open—fill in your **question**, **response type**, and **visibility settings**.

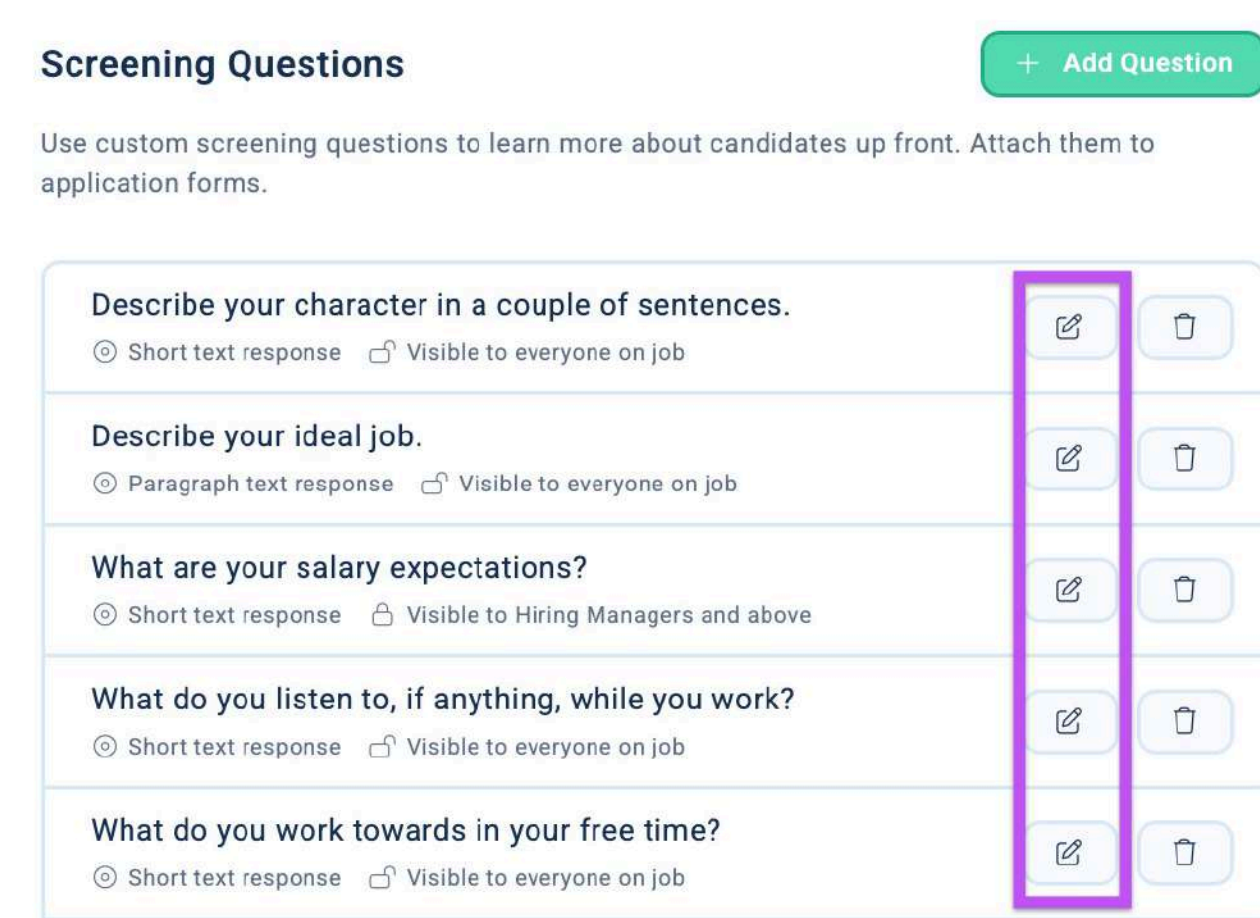

Hit **Save**, and you're all set!

Editing an Existing Screening Question

Need to make a quick edit? No problem!

Click the **pencil & paper** icon next to the question title.

The editing window will open—make your changes.

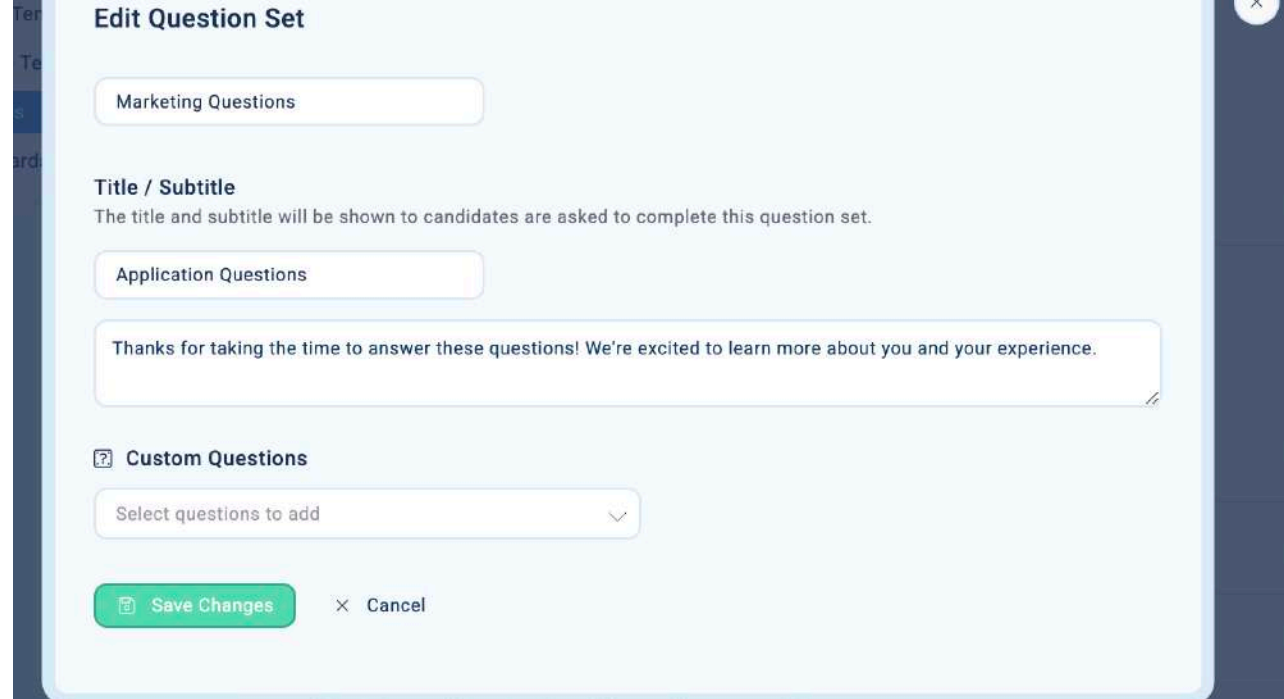

Save your updates, and you're good to go!

Creating Question Sets

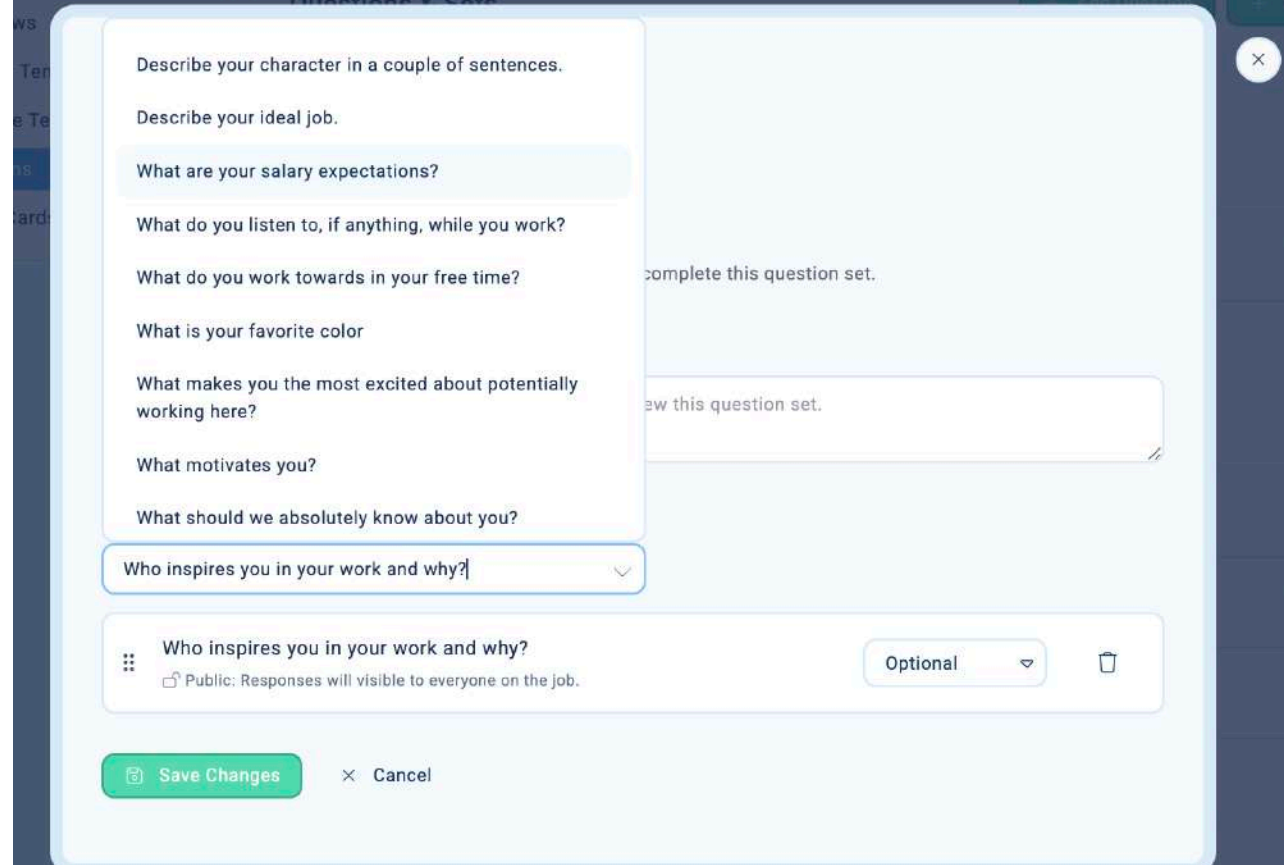

If you're asking the same questions across multiple roles or departments, **Question Sets** can make your life easier. They're reusable collections of custom questions that help keep things consistent—and save you from copying and pasting the same thing over and over.

Getting started is easy! Just hit **"Add Question Set"** in the top right. First, you'll name your set—this is just for you and your team, so pick something that makes sense for quick reference.

Next, you'll add a **title** and **(optional) subtitle**. These are what candidates will see when they're filling out the application, so make them clear and relevant.

Use the dropdown to pull in any existing custom questions you want to include. You can also decide if each question should be required or optional for candidates to answer.

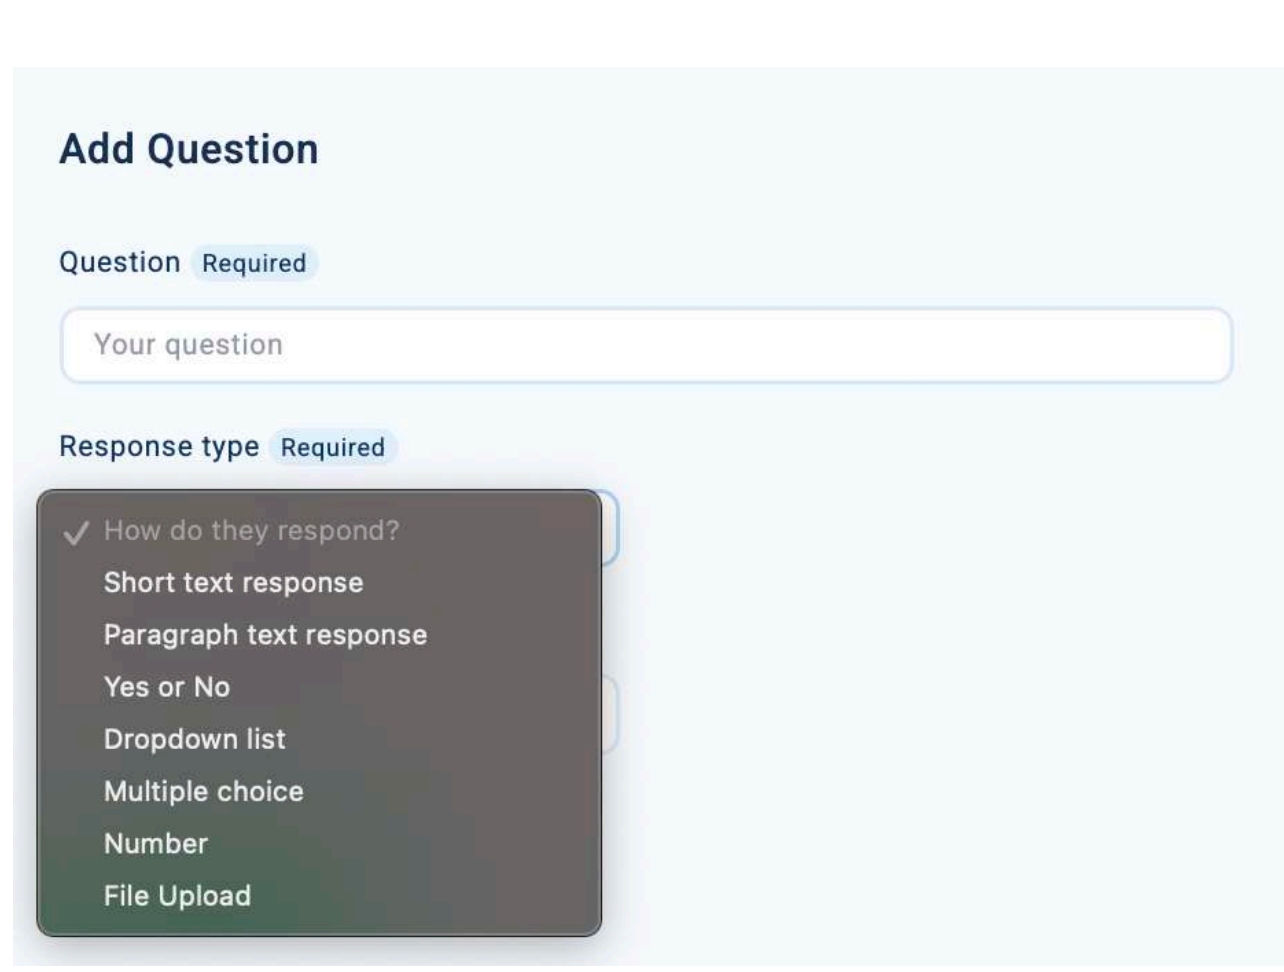

Your Question Set is ready to go and can be easily added to applications whenever you need it.

Different Types of Questions

Not all answers are created equal! Customize the **Response Type** based on the information you need.

- **Short Text Response** – Perfect for quick, one-sentence answers.
- **Paragraph Text Response** – Great for detailed responses when you need more insight.
- **Yes or No** – Keep it simple with a straightforward yes or no.
- **Drop-Down List** – Provide pre-set options for candidates to choose **one** answer.
- **Multiple Choice** – Allow candidates to select **more than one** response.
- **Number** – Ideal for questions like salary expectations or years of experience.
- **File Upload** – Let candidates upload portfolios, certifications, or other important documents.

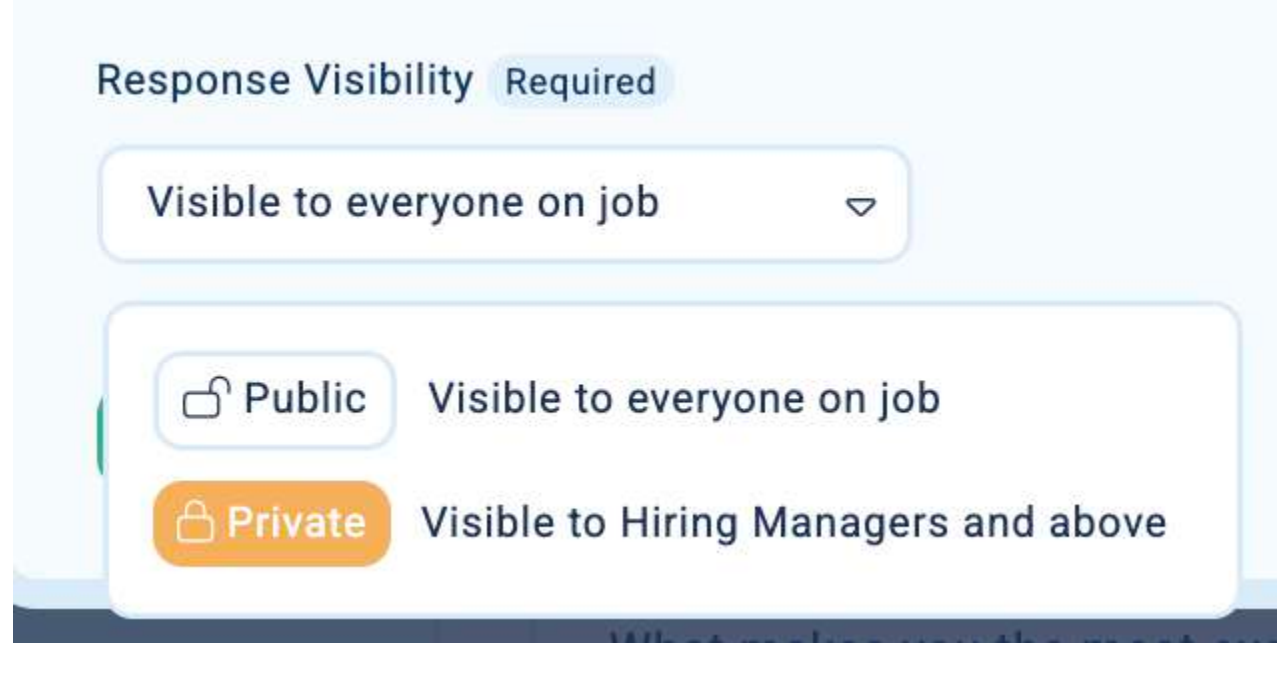

Response Visibility: Who Sees What?

Not every answer will be visible to **everyone** on the hiring team (think salary expectations). You can adjust **Response Visibility** to control who sees the candidate's responses:

Everyone on the hiring team – All members can see the answers.

Hiring Managers & Above – Limits access to managers and admins only.

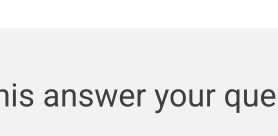

Now go set up those **custom screening questions** and make your hiring process *smarter than ever!*

Ratings Cards

Updated over 3 months ago

Rating Cards help you gather structured feedback on candidates during the **Review stage** of your hiring workflow. Unlike automation, this is where you bring in real humans to assess candidates and share their thoughts!

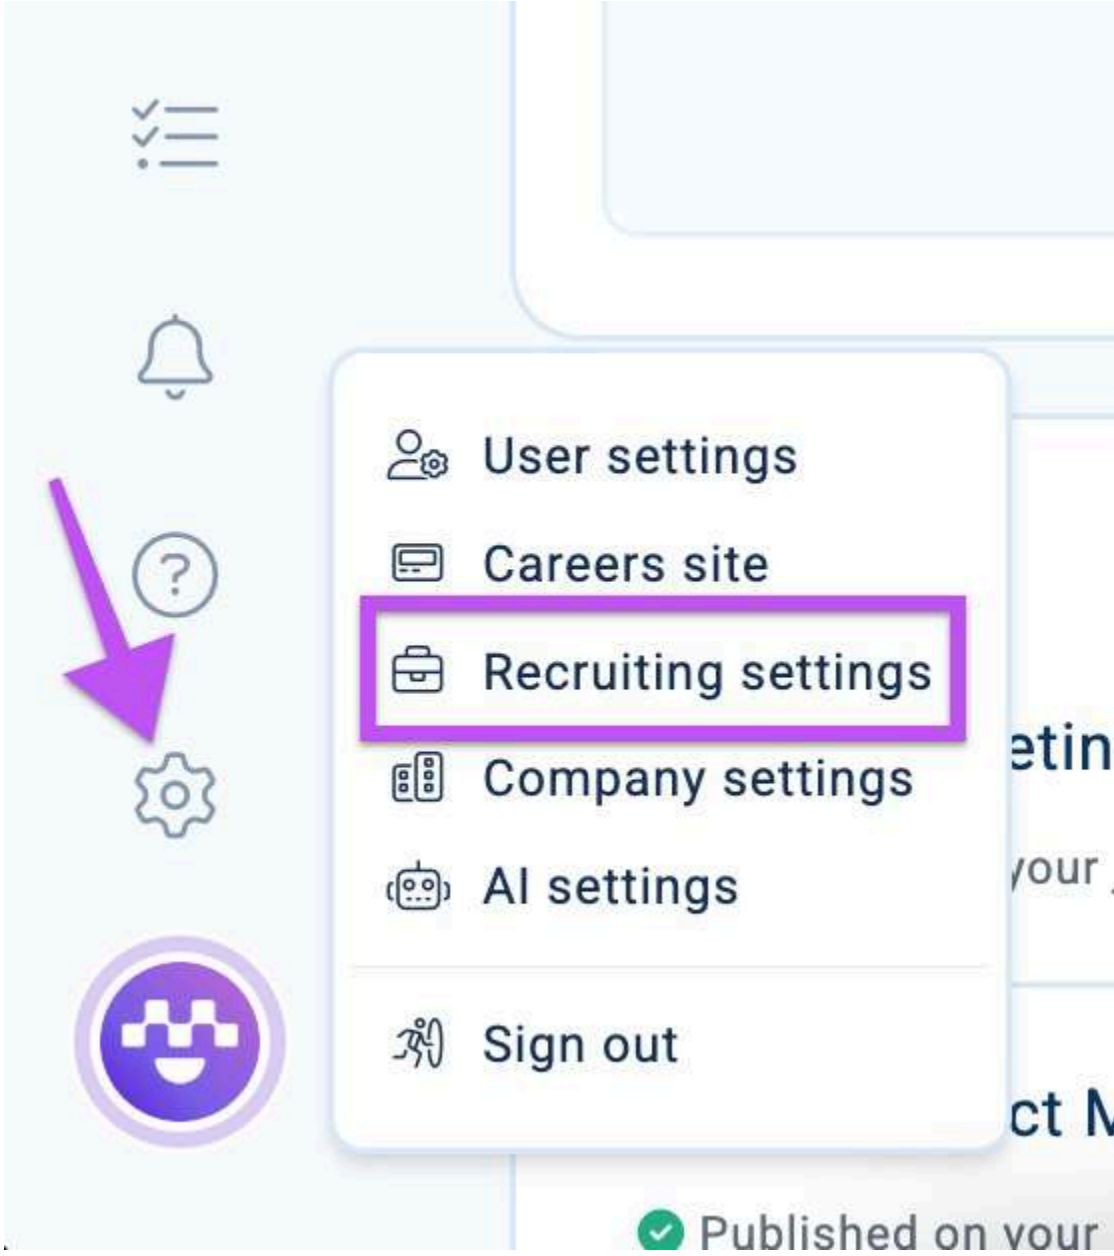

You can create **custom rating cards** with specific evaluation criteria so your team knows exactly what to look for when reviewing candidates.

Who Can Access Rating Cards?

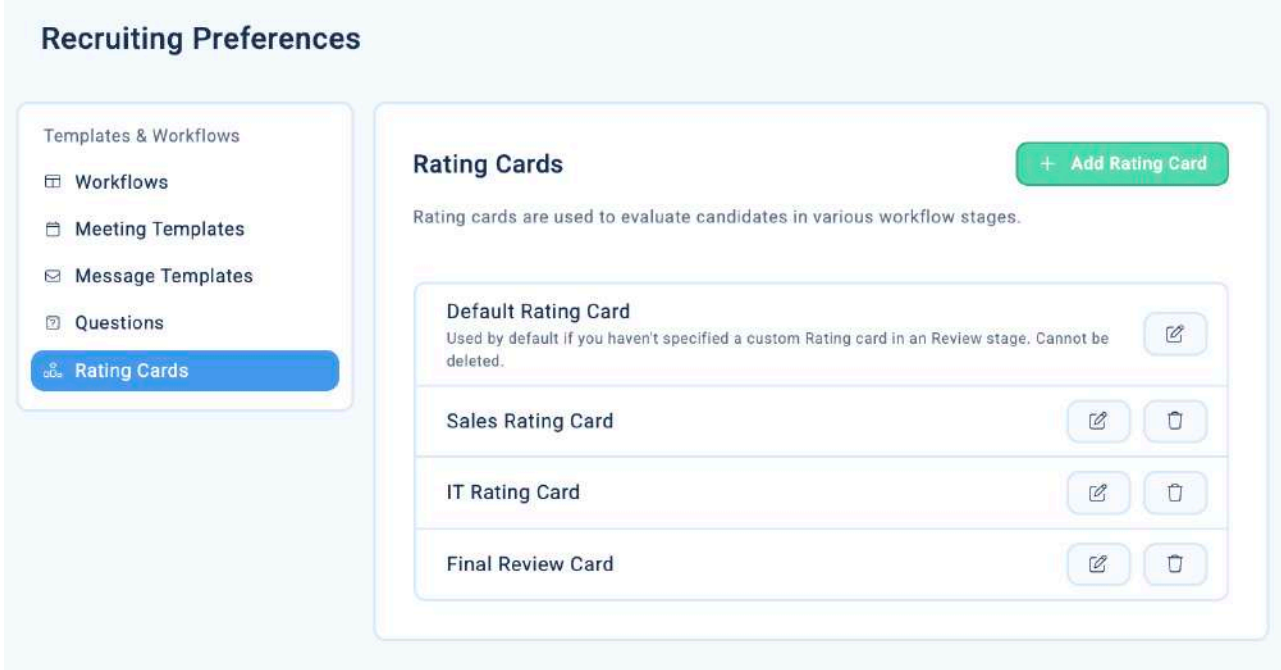

To access **Recruiting Settings**, you'll need to be an **Admin** or **Mega Admin**—so if that's not you, please reach out to your administrator for assistance.

Finding Your Rating Cards

Click on the **settings gear** in the bottom left corner.
Select **Recruitment Settings** from the menu.
Navigate to the **Rating Cards** section using the list on the left.

*We've already added a **default rating card** as a fallback option in case a Review stage doesn't have a custom rating card assigned. (Heads up—it **can't be deleted**!)

Rating Card Types

You've got **two** rating card options to choose from:
Basic Rating Card – A simple **5-star rating** system with a description field for additional comments.
Categorized Rating Card – A **detailed** card with **custom sections** to guide structured feedback on different aspects of the candidate's qualifications.
Choose the one that best fits your hiring needs!

Adding a New Rating Card

Need a custom rating card? Here's how to create one in just a few clicks:
Click **“+ Add Rating Card”** in the upper right corner.

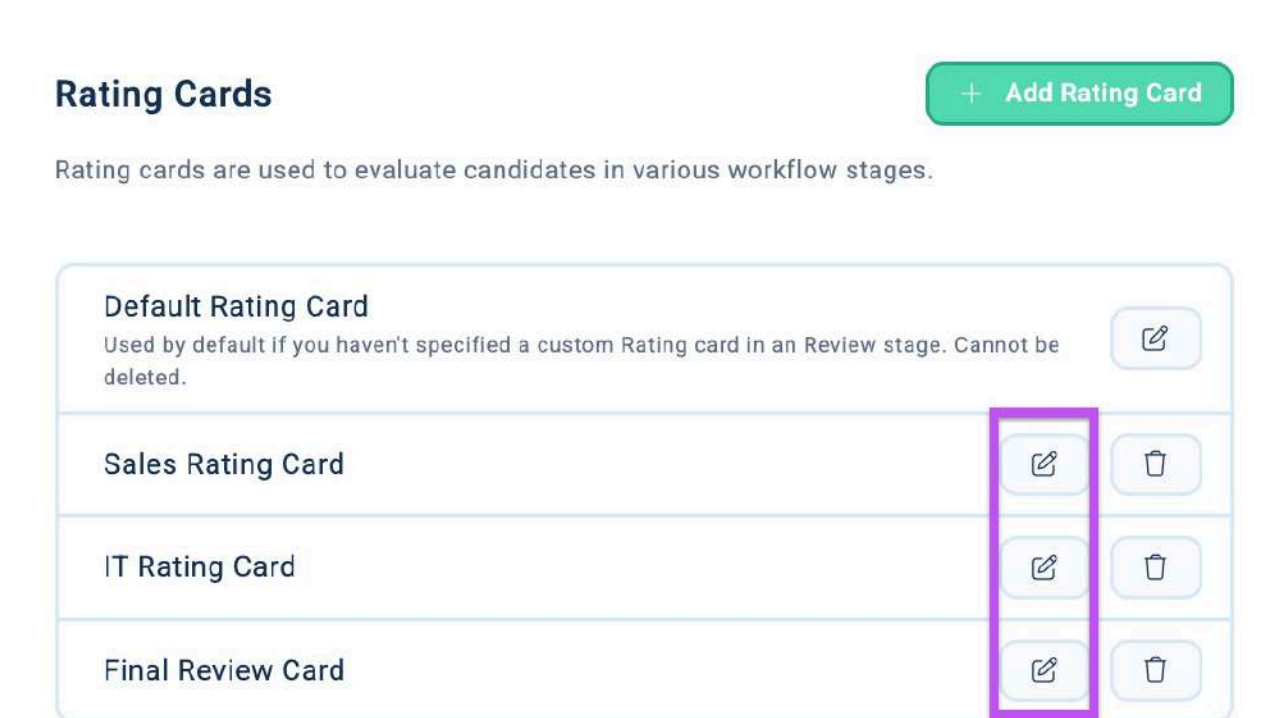

A window will open for you to complete:

- **Name** of the rating card
- **Description** (so your team knows when to use it)
- **Rating Card Type** (Basic or Categorized)
- **Custom categories/criteria** if using a Categorized Rating Card

Hit **Save**, and you're all set!

Editing an Existing Rating Card

To edit a rating card, simply click the **pencil & paper** icon next to its title, make your changes in the pop-up window, and hit **Save**—your updated rating card will be ready to go!

Edit Company Profile

Updated over 3 months ago

Let's make sure candidates know who you are! Keeping your company info updated is super easy—here's how to do it:

1. In the bottom left of your screen, click the settings gear and select Company Settings.
2. Once you're on the Company Settings page, look at the left-side navigation and click Company Profile.
3. Here, you can add or edit your **company name, website, and phone number**.

Heads up: The company name is the only required field, but we highly recommend adding your website. Why? Because when candidates click your logo on your careers page, they'll be sent straight to your website (which is kinda the point, right? 😊).

Once you're done making updates, just hit the **Save Changes** button, and you're all set!

Now go show off that shiny, updated profile!

Adding and Editing Job Locations

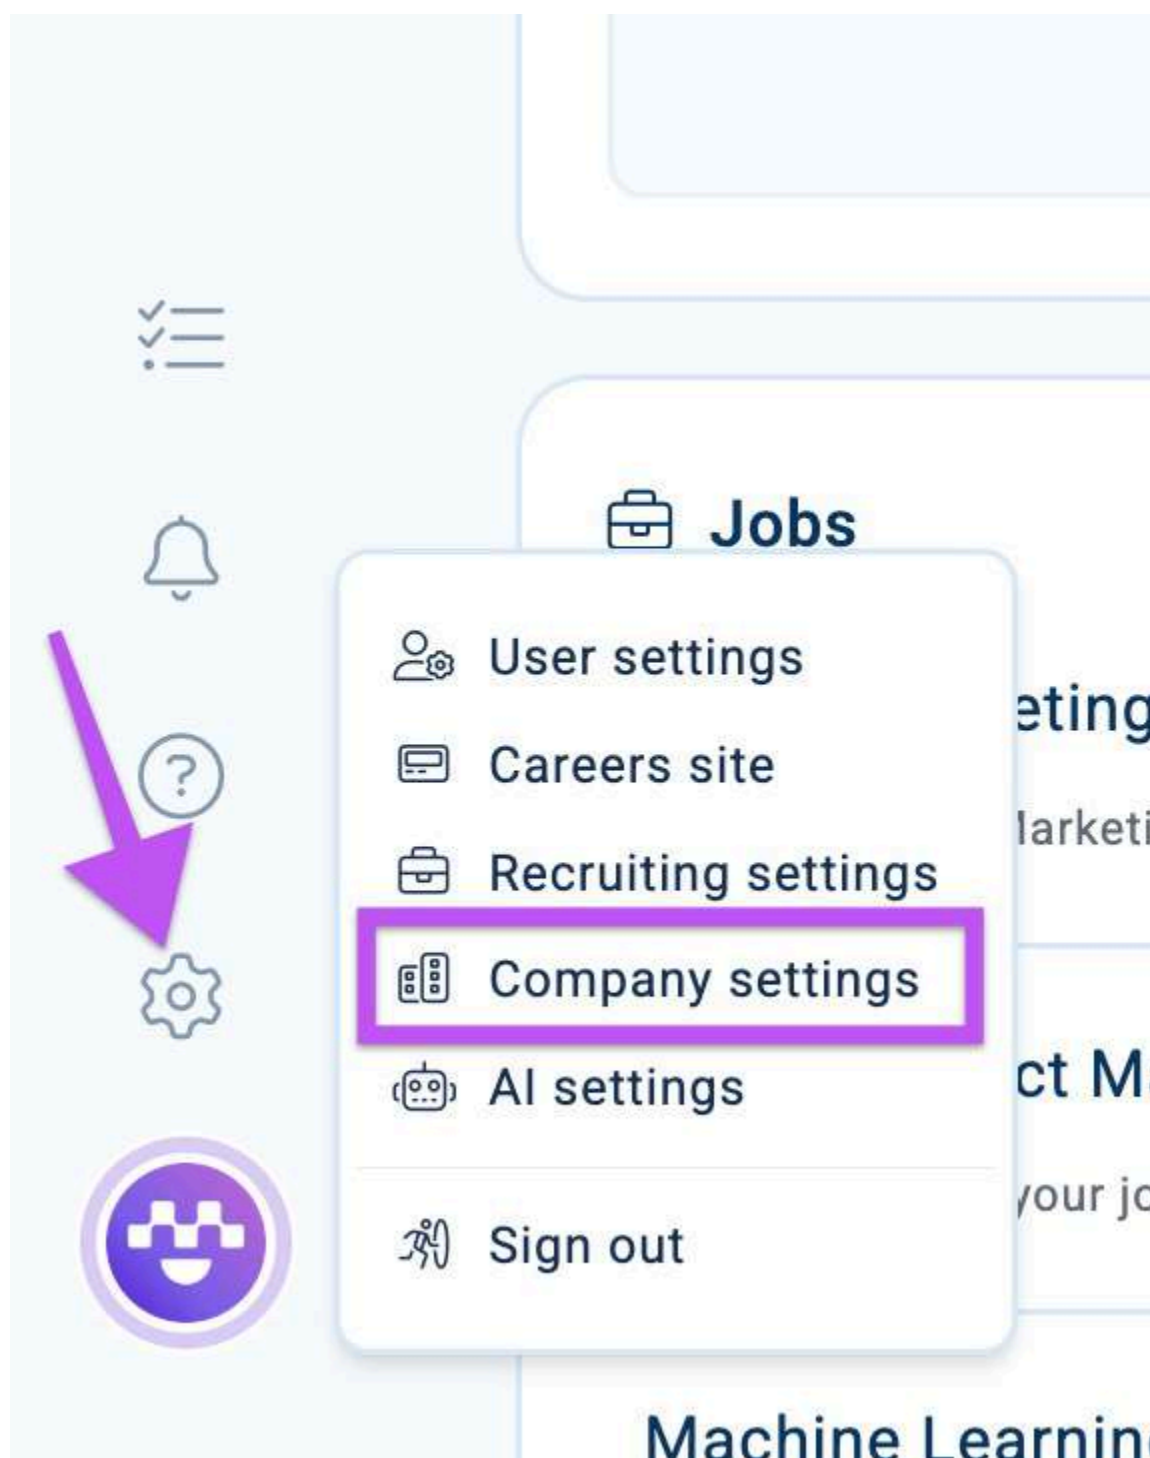

Updated over 3 months ago

Keeping track of your hiring locations is super important! Not only do they show up on your job postings, but they also help keep things organized on your career site. Adding all your office locations in **Company Settings** saves your team time and avoids mix-ups (because no one wants duplicate locations floating around, right? 😊).

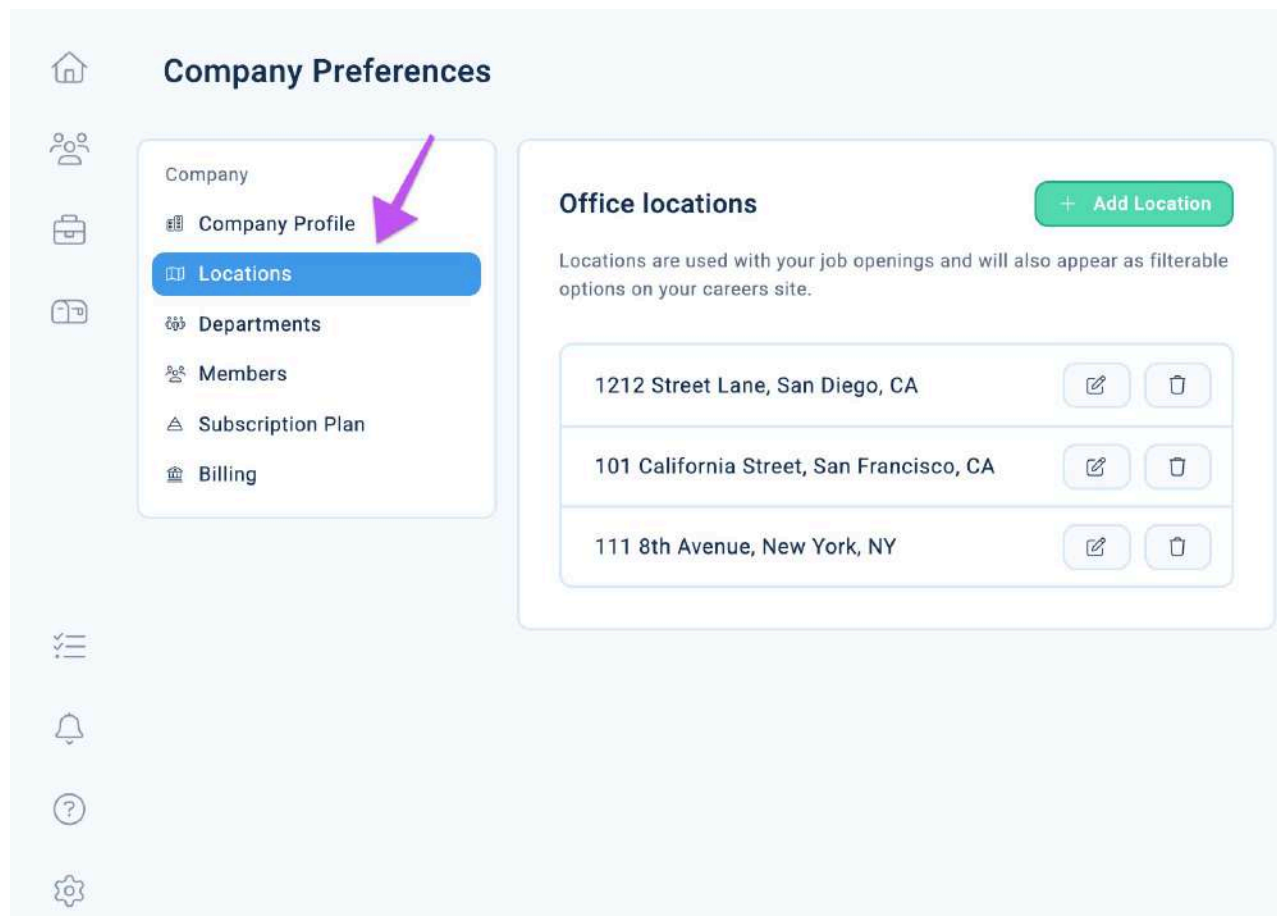

Adding a New Location

Ready to add a location? Here's how:

Head to the **bottom left** of your screen and click the **settings gear** ⚙️. Select **Company Settings**.

In the left-side menu, click **Locations**.

Click **Add New Location** and enter the details:

- Address
- Country
- City
- State/Region/Territory
- Zip/Postal Code

Add Location

Street address

e.g. 18144 El Camino Real

Country

Select the country

City

e.g. Sunnyvale

Postal code

Zip/Postal code

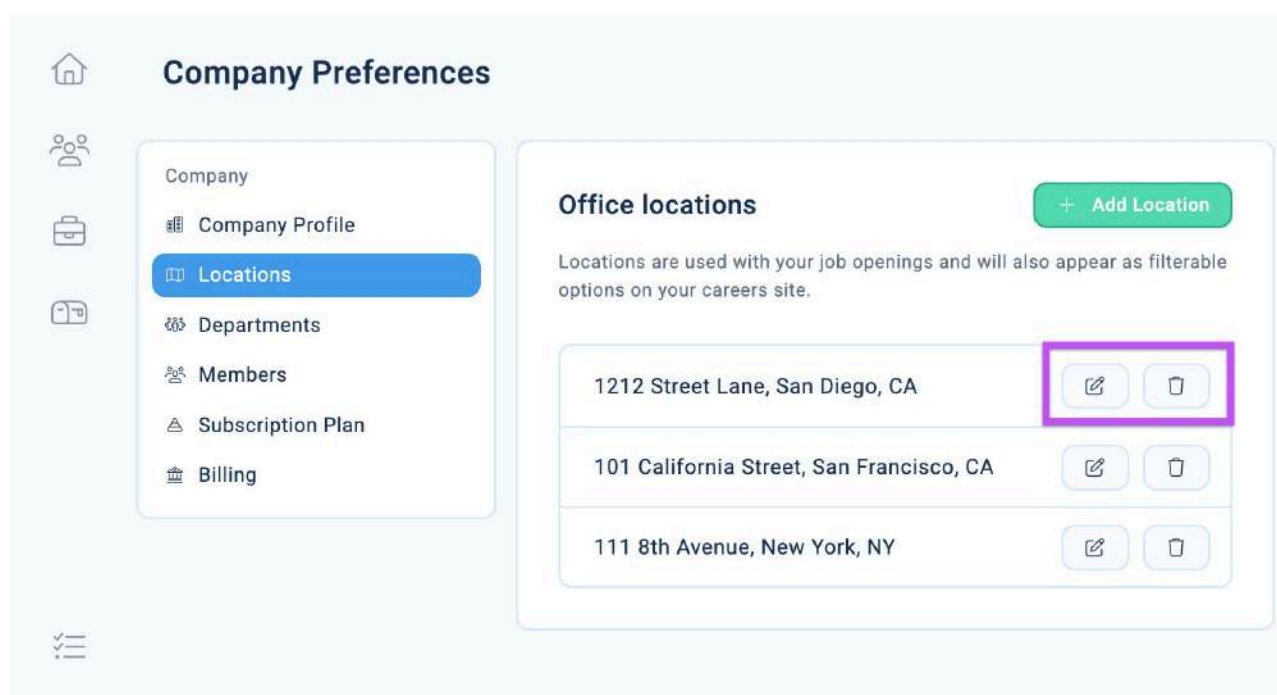

Cancel

Save Changes

Hit that **Save** button, and boom—you're done!

Editing or Managing Existing Locations

Need to make changes? No problem! You can **edit** or **remove** locations anytime from the same Locations section in **Company Settings**.

Using Locations in Job Posts

When you create a new job, your saved locations will automatically show up in a **dropdown menu** under the **Job Description** section. Just pick the right one, and you're good to go!

- Opportunities for professional development and continuous learning.
- Collaborative and innovative work environment.
- On-site amenities and wellness programs.

Office location

Where will this job be based? If remote, specify your main office or the one that's most relevant.

1212 Street Lane, San Diego, CA

Add new location

That's it! Now your hiring locations are all set up and easy to manage. Need help? Reach out, and we've got your back!

Adding and Editing Departments

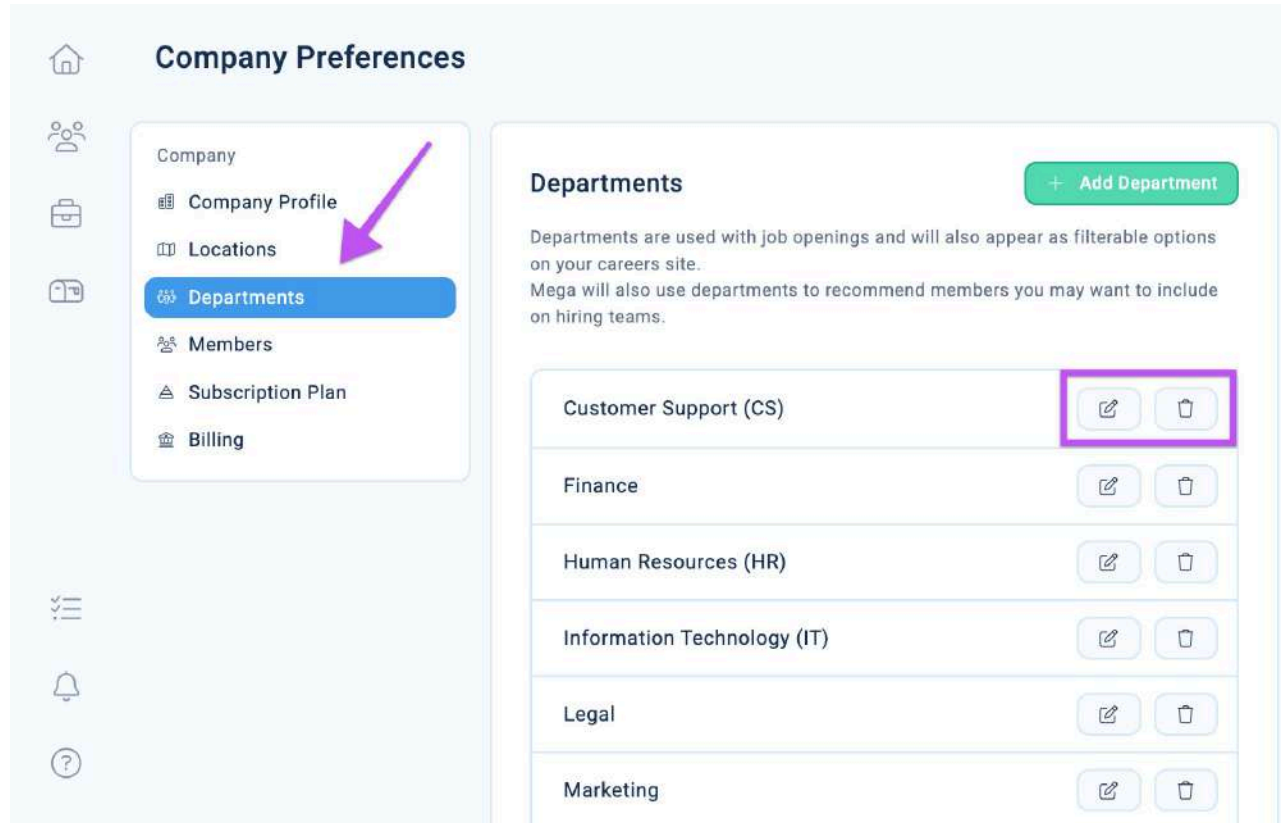

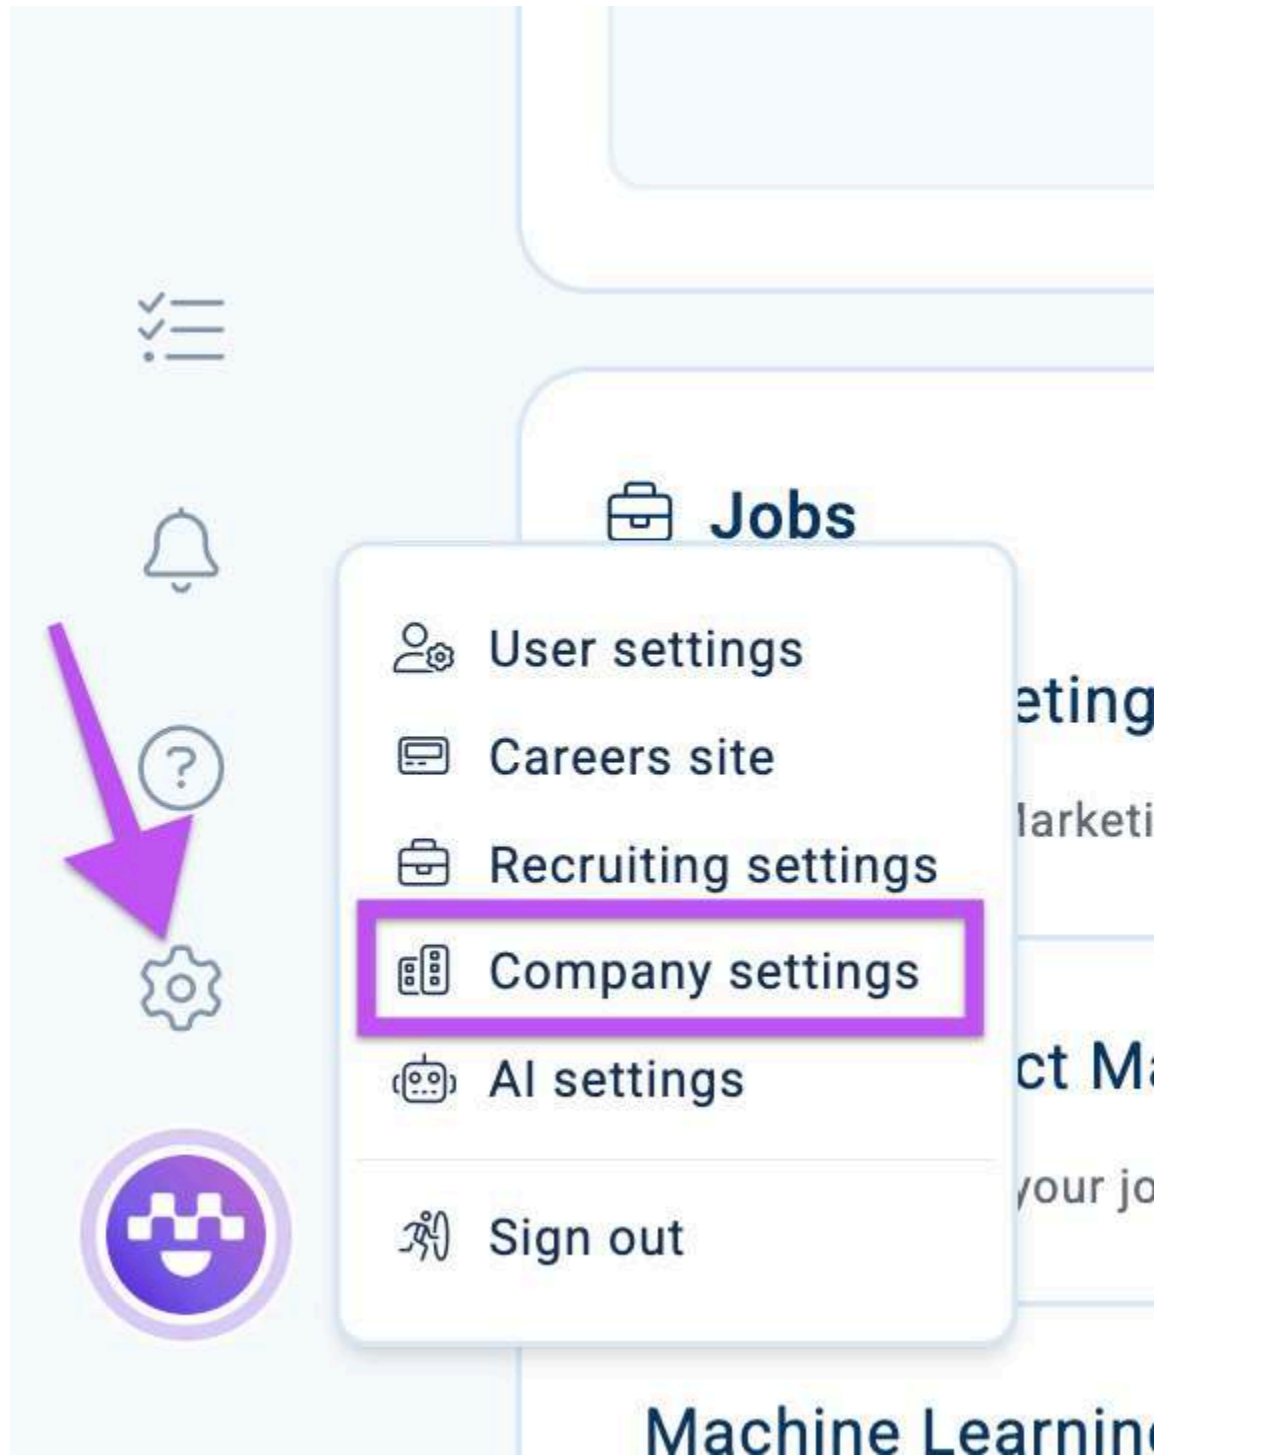

Updated over 3 months ago

Departments help keep your job openings organized and show up as filterable options on your career site. Plus, Megan (your trusty AI assistant) will use them to suggest team members for hiring teams, because who doesn't love a little extra help?

Where to Manage Your Departments

To add, edit, or remove departments:

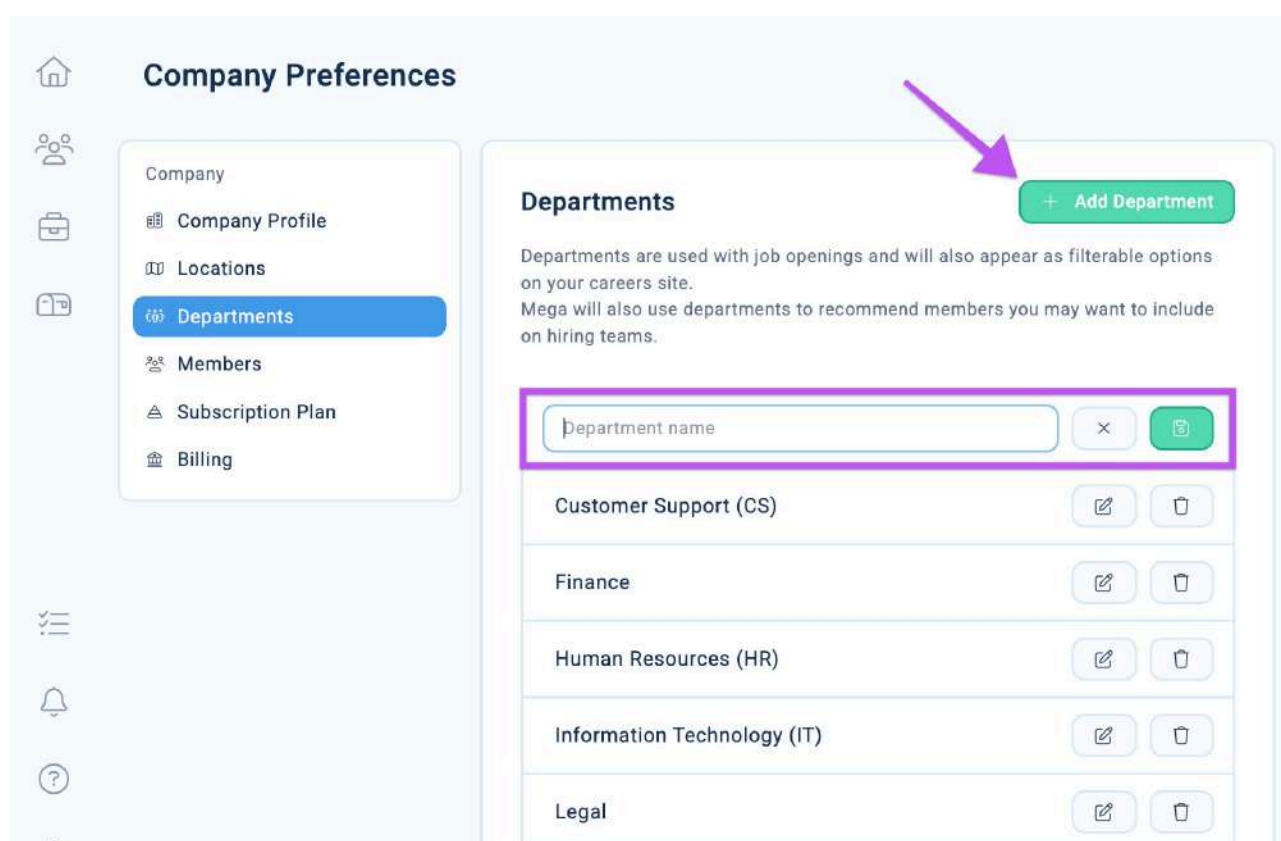

1. Head to **Company Settings**.
2. Look for the **Departments** section in the left-side navigation.
3. You'll see some default departments already there—feel free to **edit or delete** them as needed.

Adding a New Department

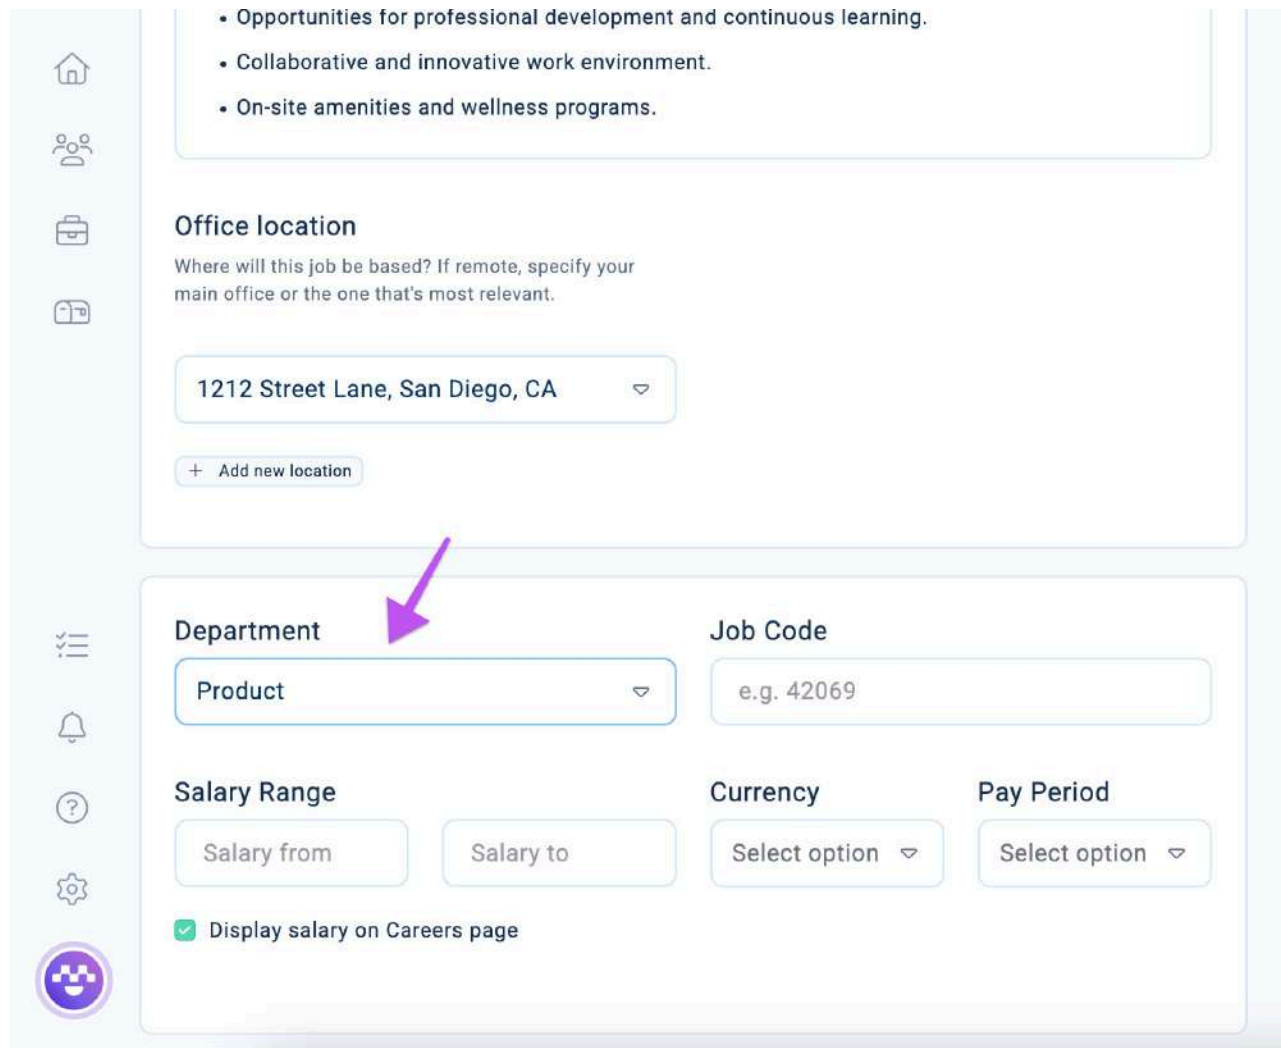

Need a fresh department? Easy peasy:

1. Click the **Add Department** button in the upper right corner.
2. Enter your new department name.
3. Hit **Save**, and boom—your new department is ready! 🎉

Assigning Departments to Jobs

When you're creating or editing a job, you'll find a Department dropdown at the bottom of the description section. Just pick the right one, and you're all set!

That's it! Now go forth and organize like a hiring rockstar!

Sending Offer Letters

Updated over 2 months ago

Found *the one*? Time to seal the deal! Mega makes it easy to send official offer letters with legally binding eSignatures—thanks to our partnership with [PandaDoc](#). No messy print-sign-scan nonsense here. Just a few clicks, and you're good to go!

Finding eSignatures in Mega

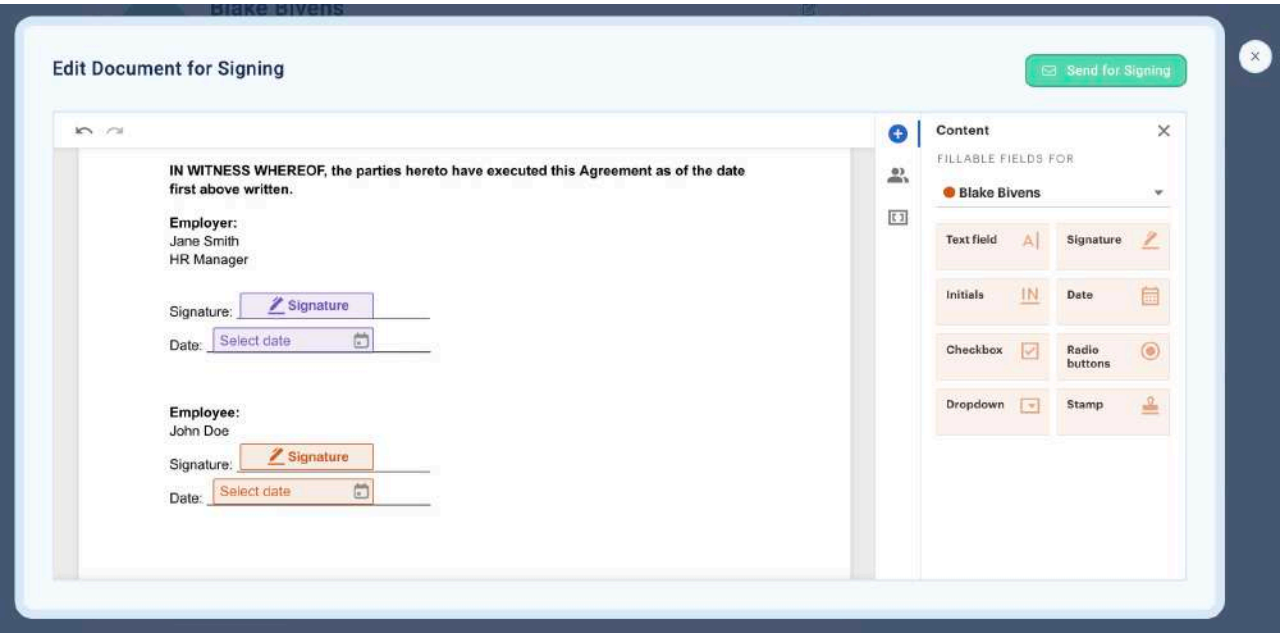

Head to the candidate's profile and pop over to the **Messages** section. You'll see a handy little **Pen & Paper** icon right next to your email and meeting options. That's your ticket to sending an eSignature request!

Adding eSignatures to Your Document

When you click to send a document for signing, a window will pop up where you can upload your PDF. Once it's in, the **editor** appears—this is where the magic happens. Here's what you can do:

- ✓ Add fields for the candidate to sign.
- ✓ Include other signers like HR, the Hiring Manager, or anyone else who needs to stamp their approval.
- ✓ Drag, drop, resize—make it all fit perfectly.

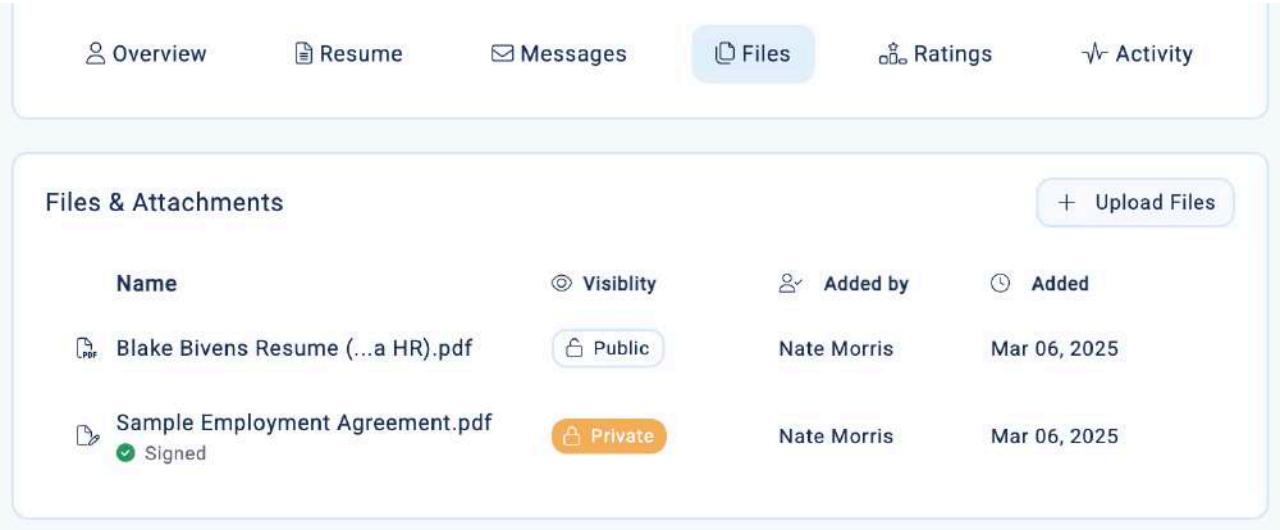

When everything looks good, hit **“Send for Signing”** in the top-right.

Tracking & Downloading the Signed Doc

Once sent, you can track when the candidate opens and signs the document—no more “Did you get my email?” follow-ups.

When it's all done, just head to the **Files** section and click to download. Easy peasy!

Embedding Jobs on Your Website

Updated over 2 months ago

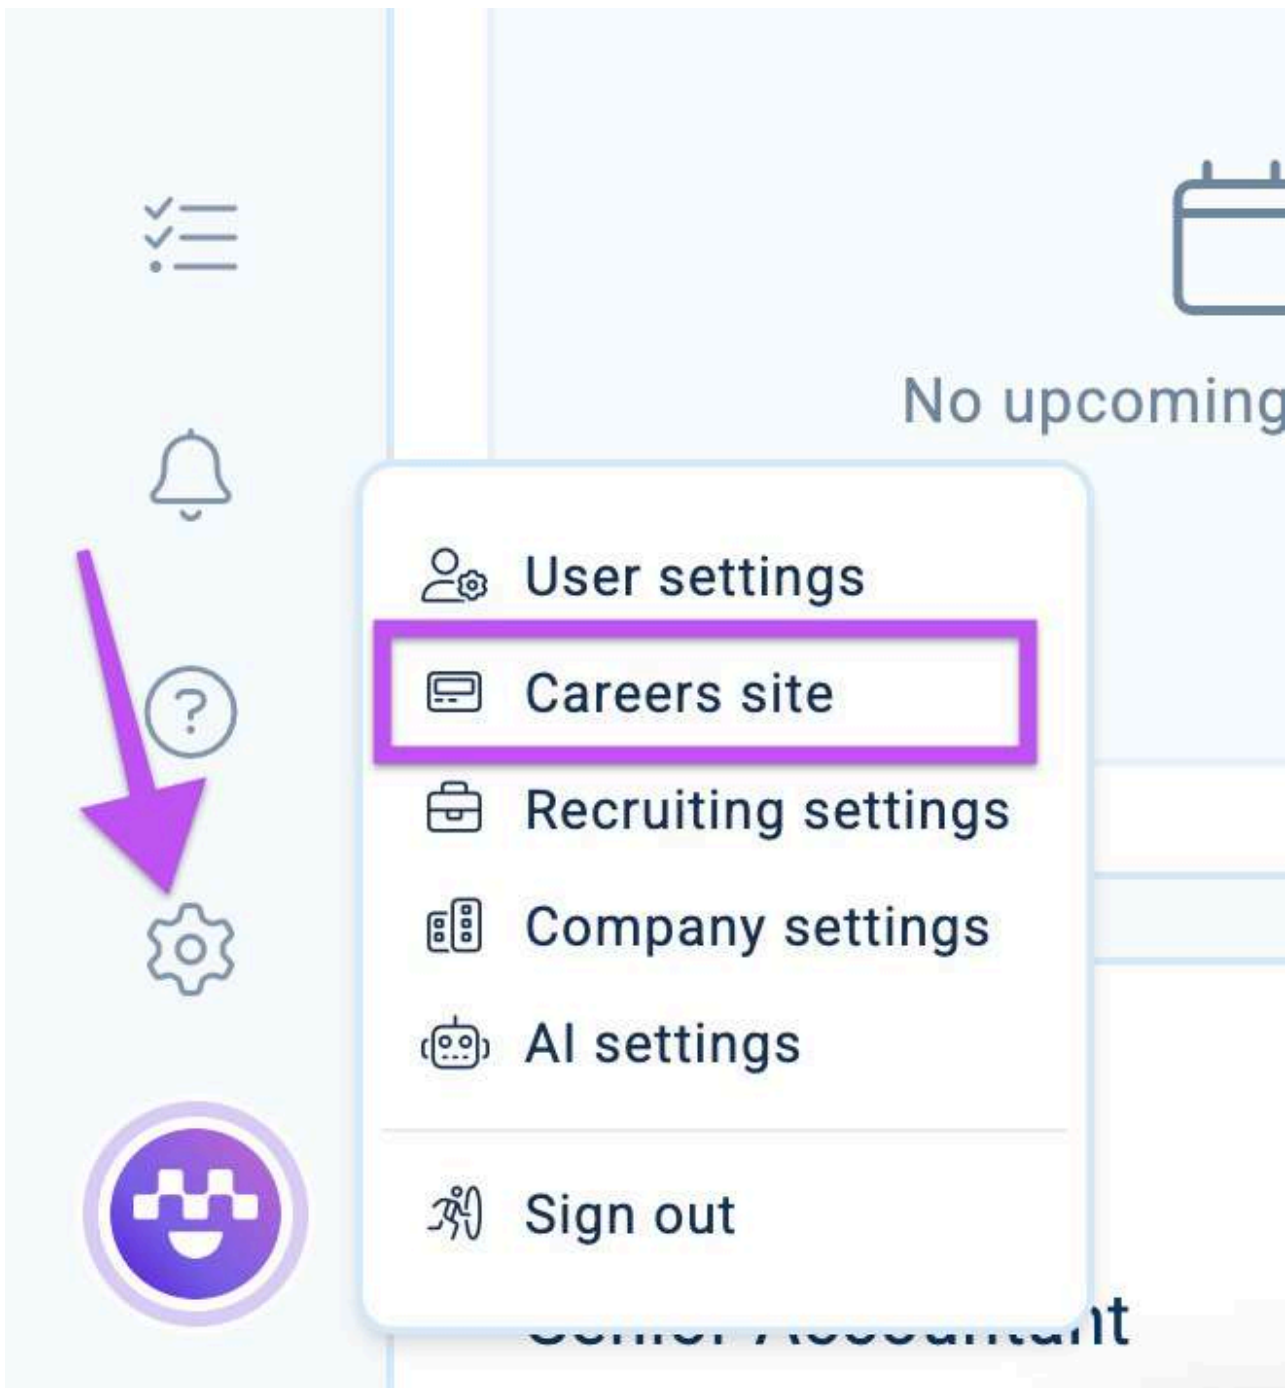

Got a killer careers page already? Nice! Now let's make it even better by embedding your Mega job postings right onto your site.

How to Embed Jobs on Your Website

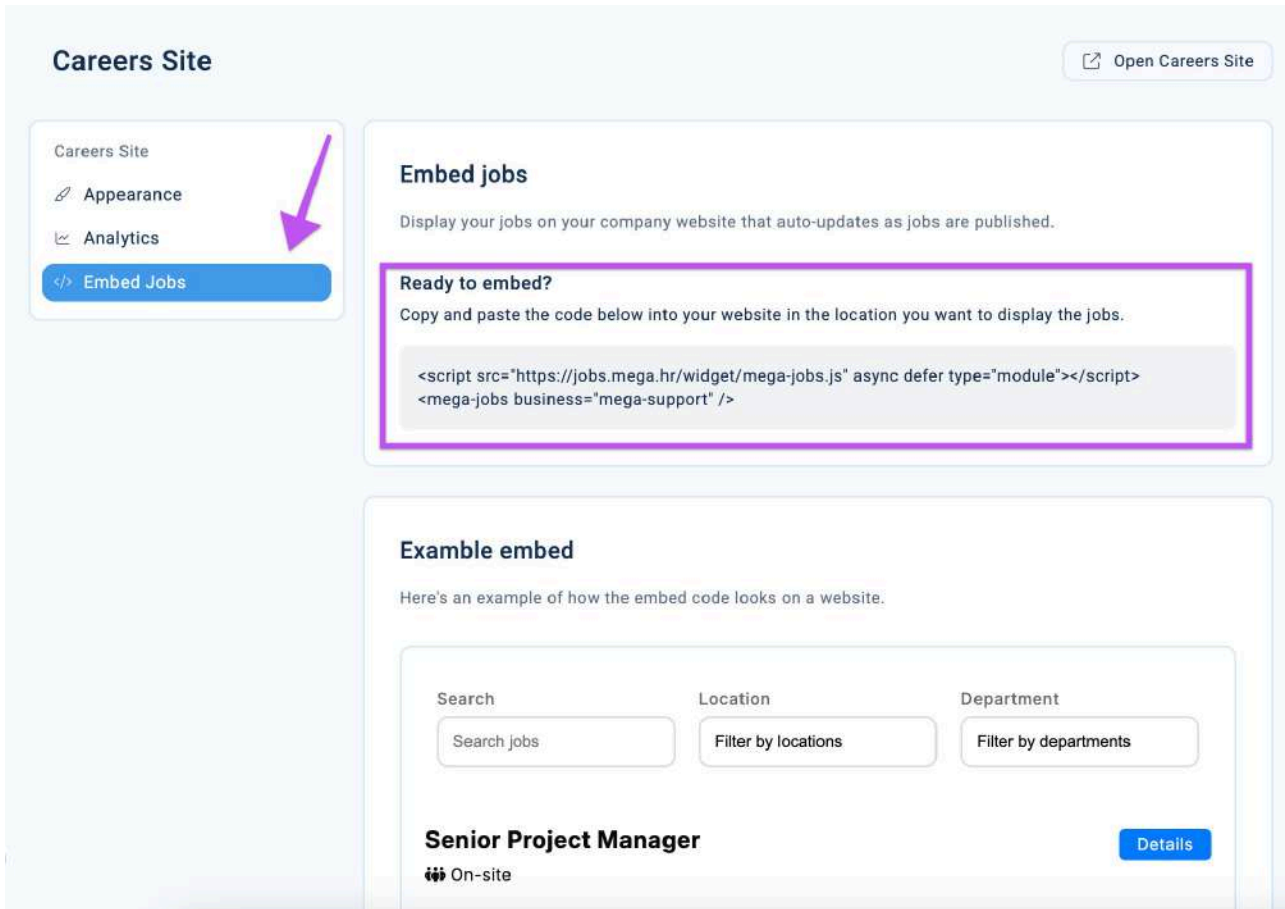

You can add jobs to your website—and if you want to make it match your site's design, you can customize it with CSS.

Setting It Up (Admin Access Required)

Click the **gear icon** in the bottom left corner and select **Careers site**.

In the careers site settings, choose **Embed Jobs** from the left menu.

Copy the embed code and paste it into your website. Boom, done!

Extra Customization

Want to tweak the look and feel? You can use CSS

```
/* fonts */
--mega-font-family: 'Inter', sans-serif;
--mega-font-size-sm: 14px;
--mega-font-size-default: 16px;
--mega-font-size-lg: 18px;

/* colors */
--mega-text-color: rgb(10, 10, 10);
--mega-primary-color: #007bff;
--mega-secondary-color: #6c757d;
--mega-focus-color: #007bff;
--mega-hyperlink-color: #007bff;
--mega-text-color-lighten: 0.6;

/* spacing */
--mega-max-width: 1024px;
--mega-padding: 20px;

/* border-radius */
--mega-border-radius: 5px;
--mega-border-radius-lg: 10px;

/* inputs */
--mega-input-padding: 8px 12px;
--mega-input-border: 2px solid rgb(221, 221, 221);
--mega-input-border-hover: 2px solid #c7c7c7;
--mega-input-border-focus: 2px solid var(--mega-focus-color);
```

Get creative and make it blend seamlessly with your site. Happy embedding!
